

WHOLE WEEK OF FUN

ST. PAUL'S FREE ENTERTAINMENT FOR STATE FAIR VISITORS WILL BE

THE BEST EVER ARRANGED.

EXECUTIVE COMMITTEE SATISFIED AFTER HEARING THE REPORTS OF OTHERS.

FAIR TO OPEN WITH A CROWD.

Twin Cities Expected to Bring Out Thousands on Labor's Great Day.

The executive committee having in charge the carnival of fair week met yesterday to hear the reports of the chairmen of the various committees of the entertainments on the different nights, all of whom reported that their plans were being carried out nicely.

On Monday night the Venetian carnival on Lake Como will be a magnificent affair, and will justify the expenditure of the several thousand dollars made for this purpose.

The bicycle parade will also take place on this evening, and it is expected that several thousand wheelmen will be in line. All the plans have been perfected for the carnival on Tuesday evening.

The Wednesday and Thursday night features will be unique, something the like of which was never before seen in the Northwest, and they merit the appropriate name of "fire nights."

The fortress on Willow island is already in course of erection and will be defended by about a hundred men in armor, under the command of C. W. Hall. The attacking forces, under command of Capt. Bean, will make a furious assault, and the attack will be carried out without any understanding between the two generals.

The companies of militia in Merriam Park and the local forces, under the command of Capt. Bean, will make a furious assault, and the attack will be carried out without any understanding between the two generals.

In the attack a vessel belonging to the defense will be burned to the water's edge. Aside from the fireworks, some novel fire effects are promised, and it is expected to be a grand spectacular scene.

The preparations for the Mardi Gras carnival on Friday night are going on apace and some very entertaining and remarkable features are secured. The city will run riot with mirth and good fellowship on this night, and it will be a fitting windup of the week's sport.

Maj. Cooley has this in charge and has secured a number of assistants who are equally enthusiastic as himself. The fire department will also make an actual run, with every piece of apparatus, that evening.

Chairman Nichols, of the Dawkron brigade, has arranged for a parade of this remarkable company of "the finest" on this evening and has secured a full equipment of special apparatus.

The executive committee has increased the appropriations for the fire department and for the military of the fire nights spectacles, so that they were sufficient funds to carry out their part of the programme on the most elaborate scale possible.

The visiting companies of militia will be quartered at the army.

A request from the committee signed by Chester R. Smith, chairman, is that all business men decorate and illuminate their respective places of business during fair week.

STATE FAIR PLANS. The street cars between the Twin Cities and the state fair grounds at Hamline were throughed all day yesterday with exhibitors and workers going to and fro in their work connected with the great exhibition.

The secretary's office was also thronged with people arranging for exhibits, and his mail was loaded down with belated entries.

Now that Mayor Doran has returned home, it is expected that Ald. Stutzman, the chairman of the committee appointed to investigate the manner in which fines are imposed upon and collected from the disorderly houses, will call another meeting of that body in the course of a few days.

Aid. Kenny, who is a member of the committee, when asked yesterday when the next meeting would be held, said: "I can't say definitely, but the committee adjourned subject to the call of the chairman, but it will be held soon."

Then the report that the committee had decided to drop the matter without further investigation is not true.

Aid. Stutzman, in an interview published by the Globe a week ago, declared that the committee would resume its investigation in due time after the return of the mayor.

CHEAP RATES NEXT WEEK. Merchants' Excursions Allowed by the Western Association.

The roads of the Western Passenger association have decided to grant a rate of one and one-third for the round trip for those who desire to attend the meeting of the Merchants' association in St. Paul next week.

Excuse for their Arrest. Roy Thomas, Charles Johnson and Matilda Wilson, arrested Monday in a charge of receiving stolen property, were allowed to go on their own recognizance in the police court, yesterday.

THE ANDREW SCHOCH GROCERY COMPANY, Seventh & Broadway.

ONE ROUND OF JOY SUCH HAS BEEN THE TOUR OF THE GLOBE'S PLEASURE PARTY.

AND THE CONNECTING TRIPS ARE STORED RICHLY WITH PLEASANT RECOLLECTIONS.

Special Correspondence of the Globe. NEW YORK CITY, Aug. 31.—We deferred writing until we had been seated in the hope that we might add our impressions of the Athens of America to a letter for the Sunday Globe, but found only too late that it would be impossible for it then to reach you in time for publication that day.

It is difficult, too, while sight-seeing to get down to writing, even if it were conceded that the fresh observations, vivid as they are, were any better than the sober second thought.

We left Duluth under favorable weather, and indeed, have been fortunate in this respect ever since. The rest, refreshment and pleasure the lake trip affords are indescribable, and the attention and agreeableness of the employees of the North West made the trip of the Globe party in every particular a grand one.

The first day we enjoyed the picturesque shore of Superior, reaching the pictured rocks before nightfall, and were early next day at the Soo and all were out bright and early to watch the operation of the locks.

Down the St. Mary's and through Lake Huron, all conditions served to make the voyage of the pleasure party a most enjoyable one. We arrived at Buffalo, there was not one of our quartette who did not take a longing glance back at the palatial steamer, in spite of the cordial reception given us by the escort which had come to the dock to take us to our Buffalo shelter.

Next morning we made an early start for Niagara, and spent a very interesting hour or two, which was mostly spent in the park, in a still, but none the less vigorous, hunt for the goats. One, or he, even went so far as to ask the driver where they were kept.

However, this one was most happily spared to other pleasures, and told by some one on the tour, no doubt, after we got back. We also visited the Three Sisters, the island, that is, of course, and numerous other corners around the falls, which are situated in the Maid of the Mist, a boat which the sure Canadian navigation which the Maid of the party, out of our party of course, prepared themselves with least get wet, or dry, during the past week.

This trip alone during the five weeks of the contest. It is the only way to properly view the falls. The captain, to whom the Globe gave us a letter of introduction, tendered us the most cordial reception, and we wished to take the trip. He paid us every attention, pointing out places of special interest, and spared no pains to make our stay enjoyable.

First we lunched at Hotel Lafayette on the Canadian side, enjoyed a view of the falls from its top, rode to Chippewa along the rapids on the Canadian side, and returned to Buffalo in time for evening dinner, retiring early, and left for New York at an early hour.

We were in the thick of the travel to the Buffalo encampment, and the New York Central, always busy, seemed almost a mere stream of cars, and met one after another hastening on to the big reunion at Buffalo. We enjoyed the old, and well groomed, farms of Western New York, differed from the city and the next homesteads they are of our own state, and the Mohawk valley was at its best.

But the scenic treat was yet in store for us, the much anticipated and most anticipated, even. Historic memories and quaint traditions were awakened every mile, almost, by the recurring names of stations whose sign boards, as we passed, were flashed by them at a mile a minute.

And then the marvelous beauty of the Palisades, in their incomparable grandeur. So rapid was the succession of interesting scenes that the long day seemed but a short ride, and buried in the soft cushions, it seemed all too soon that we found ourselves in the vast portals of the Grand central depot, awaiting us the private carriage from the Hotel Majestic.

The Majestic is gorgeous and we have the swellest suite of rooms in it. Everything in the house is retained, and the host, Mr. Rothschild, is an excellent fellow. We did nothing our first morning here, but in the afternoon drove about the business, and visited the chutes and other fakes, saw the Bowery of the island, and then proceeded to Manhattan beach for dinner.

We went after dinner to Sheephead bay to see the races, but, unfortunately, there were none that day, and we returned to Manhattan beach, attended the Sousa concert, and in the evening the Bostonian production of "Robin Hood," returning to the hotel about 2 a. m. pretty well fatigued.

Thursday the ladies devoted to shopping, while the men were busy preparing for the trip to Boston, which began that evening at 5.30. We soon made the acquaintance of the officers of the famous Fall River line, and had a grand trip, on our arrival in the morning, to the Hotel United States, where we were again hospitably greeted. Leaving the hotel about 10.30 for a view of the city and its

KLONDIKE AT HOME

PEOPLE DO NOT HAVE TO GO TO FROZEN ALASKA TO FIND GOLD.

RICH RAINY LAKE COUNTRY.

M. C. FRENCH, OF MINE CENTER, TALKS ABOUT ITS AURIFEROUS QUALITIES.

U. S. MINING LAWS ARE NEEDED.

Until They Are Applied to Minnesota, Americans Prefer to Go Over Into Ontario.

"Its rather too bad that there should be so much to favor the prospecting of the Klondike gold fields, as compared with the investigation of the riches of the American fields in contiguous territory," said M. C. French, of Mine Center, Ont., who came out of the Rainy lake gold region yesterday morning and registered at the Merchants'. He was commenting on the disadvantages under which the American miner has been obliged to labor in both the Klondike country and in the rich country in Northern Minnesota.

"What we need to develop the riches of Northern Minnesota," continued Mr. French, "is the application of the mining laws of the United States to the Rainy Lake country. As things are now a man has to perjure himself to get hold of a piece of the public domain or scrip his holdings. Now there is no particular objection to lying according to the laws of most people but there are those who had rather go over into Canada and get away from the necessity of perjury. Over there one can buy what land is needed for the sum of \$2.50 per acre and get a title. On this side one can neither homestead nor buy, and there is little use of prospecting for gold if some other fellow is going to come and camp with you when you make a strike. At present the development is largely on the Canadian side, and it is being brought about by American capital. There are a number of paying properties on this side and if the proposition that will be put before congress to apply the mining laws to Northern Minnesota goes through at the next session, I honestly believe that the Klondike excitement will give way to the discoveries in this very state. The work of the past year has enormously developed that country in spite of the depression and the lack of speculative money. In the Klondike country, on the other side of the border, three new properties have been developed lately, and their riches are demonstrated in the phenomenal showing made by one of them—Poley, which cleaned up some \$35,000 since the beginning of April. The "A. D. 2" and the Preston are two other bullion producers, and they are turning out big returns, though I am not sure of the figures. In the Lake of the Woods country there is one mine whose output is really unprecedented. The Mikado has been operated with every standard of efficiency since August, and cleaned up \$60,000, which is certainly a remarkable showing. The Sultana is located near Rat Portage, and there has been a ten-stamp mill made there, and the effect of that two millions have been offered for the property. That would argue plenty of wealth, wouldn't it? There will be about twenty-five mills in operation in the Klondike country by the end of the year, and if the gold should come out this way you would not hear much of the Klondike."

"The Canadians have all the best of it in the development, and they do not talk as much about what they get out as we would on this side, otherwise the Northwest would be afire with the excitement now. On the American side there are a number of paying properties being operated and there is plenty of evidence of deposits of the precious metal, but nothing will be done on this side until the prospector can go in there and be sure he will be protected in his finds. In the Manitowish district there are a number of St. Paul people interested, and they are all in a fair way to make a barrel of money. They know enough about the country to be quite certain that there is plenty of available wealth and some of them have large holdings. "It seems to me that if the state at large would give some attention to securing the application of the mining laws to the mining country the public wealth would be added to in a way that would prove a boon to the taxpayers. The matter of transportation into the country is no longer a problem and the gold region on the American side is reached easily enough now. And after what we hear of the manner of getting into the Klondike why one might feel that it was merely a pleasure trip to go into the Rainy Lake country, even under the conditions of the present existing transportation ten years ago."

A party of forty-seven tourists, the Ravenna, will arrive in St. Paul this morning from the East, on the way to Yellowstone park and the coast. The tourists will spend the day in the city registering at the Ryan.

C. W. Armour and G. M. Bey, owning large packing interests in Kansas City, registered at the Ryan yesterday.

Senator Henry Keller, of Sauk Center, and Senator O. J. Wing, of Kenyon, were at the Merchants' yesterday.

R. North, of Ortonville, is stopping at the Merchants'. Harold Streeter, a banker of Larimore, N. D., is a Merchants' guest.

F. C. Benson, of St. Cloud, is at the Merchants'. Mr. and Mrs. J. H. Koop, of Brainerd, are at the Ryan.

Duluthites, F. E. Searle and H. M. Peyton, registered at the Ryan yesterday.

H. P. Hubbell, of Winona, is a Ryan guest. W. H. Yale, of Winona, is stopping at the Ryan.

Mr. and Mrs. John Parker, of Appleton, are registered at the Clarendon.

James McHale, of Shakopee, registered at the Clarendon yesterday.

W. L. Nieman and Miss Nieman, of Sauk Rapids, are at the Windsor.

A. D. Grant, Duluth, is at the Metropolitan.

John E. Martin, Spokane, registered at the Metropolitan yesterday.

ONE ROUND OF JOY

SUCH HAS BEEN THE TOUR OF THE GLOBE'S PLEASURE PARTY.

AND THE CONNECTING TRIPS ARE STORED RICHLY WITH PLEASANT RECOLLECTIONS.

Special Correspondence of the Globe. NEW YORK CITY, Aug. 31.—We deferred writing until we had been seated in the hope that we might add our impressions of the Athens of America to a letter for the Sunday Globe, but found only too late that it would be impossible for it then to reach you in time for publication that day.

It is difficult, too, while sight-seeing to get down to writing, even if it were conceded that the fresh observations, vivid as they are, were any better than the sober second thought.
