

MINNEAPOLIS.

OFFICE 65 SOUTH FOURTH STREET. MINNEAPOLIS GLOBULES.

Judge Jamison has made an order discharging U. S. Woodruff, assignee of Dickson & Kent, the estate having been fully settled up.

Peter P. Zschabang has been granted a divorce from Nellie E. Zschabang on the grounds of desertion.

Annie Thurston has begun an action for divorce from John H. Thurston, whom she claims has deserted her.

Judge Elliott has made an order allowing the final account of the receiver for the Northern Asphalt company, and ordering his discharge from his trust.

Judge Russell has signed an order extending the time for filing claims against the Tribune Job Printing company, insolvent, to Nov. 1.

Lewis Blanchard called at the police headquarters Friday and claimed that he had been robbed of a \$55 gold watch at the Union hotel, 119 Nicollet avenue. Blanchard comes from Chippewa Falls, Wis.

A fishing party, composed of officials and their assistants from the general office of the Chicago, Milwaukee & St. Paul railway, at Chicago, is registered at the Nicolet. They arrived in a special car and will leave today for the northern part of the state, where they expect to remain for several days.

J. B. Ames, one of the pioneers who came to this city early in the sixties, died Friday at the family residence, 2375 Fourth avenue south, of a severe illness lasting six weeks. The funeral will be held this afternoon at 2 o'clock from his late residence. The interment will be at Lakewood.

The Welsh of Minneapolis are planning an elaborate "Eisteddfod" for New Year's day. The programme will be made up of vocal and instrumental music, and a number of recitations, all in competition for prizes aggregating over \$200. Holders are expected from Linc. Springs, Io., and Mankato.

The report of James McMullan and Thomas A. Clark, receivers of the Knights of Labor Building association, was filed yesterday in the district court. The receivers show that while \$23,187.77 had been received, \$22,596.26 has been expended, there being a balance of \$591.51 in their possession. McMullan asked to be discharged. The hearing on the allowance of the estate will be Oct. 20.

DIME NOVEL YOUTHS.

Board a Moving Train and When Put Off One Shows Fight. Robert Frasse, sixteen years of age, and Harold Martinson, a bar-footed, tow-headed lad of twelve, were locked up yesterday afternoon for disorderly conduct. William Ward, special officer in the Milwaukee yards, alleges that Frasse caught the train and when compelled to leave offered to fight one of the train hands. The other boy is said to have thrown a brick through a window of a passenger train. One of the occupants was struck on the head, but not seriously wounded.

Half of the Claims Paid. Elbridge D. Jackson, assignee of the Wilford & Northway Manufacturing company, has made a report to the company, in which he shows that he has paid off 50 per cent of the claims in two dividends of 25 and 25 per cent respectively. He originally gave a bond for \$100,000, and now, as the assets that may come in his hands are estimated at \$50,000 in value, Judge Elliott has made an order releasing the old bond on the filing of one for \$10,000. This report shows that the assigned estate will pay but little more to the creditors.

Sick Man's Fine Suspended. E. G. Riley, who has been treated at the city hospital for diphtheria for the past two weeks, was discharged from the hospital last night. Riley, it will be remembered, was arrested for drunkenness Sept. 30 by Officer Kelly. The next day he was taken sick, and the central station was thoroughly fumigated to prevent the spread of the disease. Before being sent to the hospital the prisoner was fined \$10 or ten days, but sentence was suspended.

Was a Cold Drive Home. G. Tracy, a farmer from Edna Mills, left his wagon standing on First street south, near Nicollet avenue, for a short time last night. On his return a cookshook overcoat was missing. The thief was traced to the police.

An Energetic Beggar. Alex Gains asked a passer-by for 10 cents on lower Nicollet avenue early last evening. When he was refused he threatened to knock the man down. Officer Shelly looked Gains up for vagrancy.

Slept Too Soundly. Louis Blanchard slept in a room with several others at a lodging house at 119 Nicollet avenue Friday night. During the hours of slumber some one stole Blanchard's valuable gold watch.

HAVE 'EM ON A LIST

THE BLACK SHEEP WHICH ARE MIXED IN WITH MINNEAPOLIS FLOCK.

CITY'S RELIGIOUS CENSUS

PRACTICALLY COMPLETED IN ONE DAY AND PROMISES TO BE A SUCCESS.

MANY AMUSING INCIDENTS.

And Others Which Were Not So Amusing Experienced by the Workers.

The great work of taking a religious census of Minneapolis, undertaken by the churches of the city, has been practically completed. A half-dozen districts and a comparatively small number of homes were missed, but these will be taken care of tomorrow, and the work will be done except for the matter of tabulation. Every denomination in the city has been represented in the movement, and every one has endeavored to reach every class and condition of man in the city.

Nothing could more clearly show the seriousness with which the church people of the city look upon this effort than the manner in which the work was performed yesterday. Of seventy-four chairmen of districts, every man was on duty at the appointed time, and the dozen extras who were provided were put on visiting duty. The visitors in some instances worked against heavy difficulties, were met coldly or with contempt, and though often discouraged pushed the work through to completion in almost every district, as reports received late in the afternoon and evening showed. In order to finish up a number of districts, work had to be done in the evening, and after a day's hard work several of the visitors, though tired, cheerfully volunteered their services.

The committee did not feel that any summary of results could be made last evening, and, therefore, advised district chairmen to hold cards until all of the visiting in their districts had been completed. The work of tabulation will begin Monday and will be completed as soon as possible. The cards will then be distributed among the churches, and the real work for which the census was but a preliminary will begin.

At the end of a year it will be time enough to estimate the practical results and approve or condemn. All day long the scene at the Y. M. C. A. office of the general committee was a busy one. The brigade of boys, who were to act as messengers, was on hand promptly and did yeoman service for the committee. They stuck to the work with pluck and determination, and which characterized the whole movement. One boy, C. Brannum, met with a painful accident through the break-down of his wheel. He was badly cut upon the chin, and had to call the services of a doctor, who stitched up the wound, bandaged it and sent the boy home. But the boy borrowed another wheel and went directly to the services of a doctor for duty. The committee very wisely issued a furlough.

At an early hour the boys began to return to their offices with their district reports, and the committee soon knew that the work was to be a success. With 1,100 workers in the field, they returned with the reports of their work, and sent their aides, the wheel corps, to dinner at a down-town coffee house, in squads of ten, and immediately set to work to prepare and send out their second letters of inquiry as to how the work was progressing, in order to have them ready when the boys returned. These letters would bring the information which was eagerly desired, as they would furnish exact information as to the status of the work, and any lingering doubts as to the success of the day's work were dispelled when the replies began to come in. Some districts even then reported their work as complete, others said, "almost through," and still others, "We'll finish easily by evening." Visitors from other cities were completed went to other districts where aid was scarce and cheerfully took up the work there, and thus the work was carried on until dark.

One of the pleasant incidents of the day was an exchange of telegrams with the Washington, D. C., committee, which took census of their city yesterday, too. Rev. Hugh Cork, after the reports of the committees began to come in, sent the following: "Here the services will be conducted by the Washington, D. C., canvassing Minneapolis today. Workers very enthusiastic. Reports most encouraging. Wire immediately of your progress. Newspapers anxious for same back."

The following reply came back: "Hugh Cork, the man who has been proving successful. Enthusiastic support from workers and newspapers. Congratulations. The magnitude of the number of people employed, and from the time it took to complete the ground. Many who were not gotten through by noon worked until almost dark. One couple turned in nearly 500 cards. Sixty-five thousand cards were sent to districts, though, of course, that many would not be used. All kinds of receptions were met with. One couple were met at the door of a substantial house on Tenth street, and though ladies of stylish appearance, were refused admittance by the servant until the lady of the house called. At another place the lady of the house had all of the cards filled out when the visitors arrived. At another the woman of the house said she hadn't time to answer their questions because she took more time in explaining the reasons for having taken to fill out the cards. At another place there were sixty boards, and a card had to be made for each. At others answers would not be given. At others no one was at home and second visits had to be made. It was a big undertaking, but it was carried out with success. A large number of the solicitor visitors were mothers, who had in mind their own boys, and perhaps when they were in the ranks, and the number of people from young people's societies was nearly as large a fact which one pastor commented upon as not reflecting great credit upon such organizations."

The conservative churches showed an unexpected energy and interest in the work. The First Baptist church, for instance, had a number of workers in the field. It was noticeable that the larger churches did not equal the smaller in the proportion of number of workers furnished. The Eighth ward turned out the banner number of visitors, 159 in all, though the number of churches in that ward was only 50. The Seventh ward was next with 75. There was an absence of help from some of the churches which are made up of foreigners and for this reason districts inhabited largely by Poles, Bohemians, Italians and Germans were left until Monday.

Arrangements were made for a late hour of the afternoon for a rally of the visitors and all who took part in the work or are interested in it for this afternoon at 2 o'clock at Plymouth Congregational church. Experiences met with, interesting incidents, pathetic scenes and the great success of the work will furnish topics for remark. Rev. Hugh Cork, J. B. Sutherland and other members of the committee will be present. It is sure to be an interesting meeting.

Hugh Cork, who has worked indefatigably for the success of the census, is it is sure to be an interesting meeting. He expressed himself as well pleased with the results, which, he believed, would be of great benefit to the city. He followed up with vigorous work, church and Sunday school.

Late yesterday the census committee show reports from about half of the districts with a total of 25,000 cards. Allowing four or five cards to a household, the population represented is about 150,000, or half of the city, showing that the work of the canvassers has been thorough and reasonably accurate.

IN UNCLE SAM'S CLUTCHES.

Three Suspects Held on Charges of Train Robbery. E. F. Geary, George Vernon and James Ward, the three men tried in the municipal court yesterday for the robbery of a train, were dismissed, but were immediately re-arrested on a United States warrant charging them with high larceny in a train robbery.

The warrant was sworn out at the instance of Assistant United States District Attorney George H. Starnes, who has in his possession sufficient evidence against the men to show that they were implicated in the hold-up of the Northern Pacific train at Elk River, Minn., Sept. 26. United States Marshal R. T. O'Connor and one of his deputies, Col. T. Sheehan, were on duty at Elk River that afternoon, and as soon as Judge Holt dismissed the cases the arrests followed.

The prisoners were taken to the city and immediately to the federal building, where they were arraigned before United States Commissioner James H. McLaughlin, who found them guilty to the charge. They asked that the case be continued till Wednesday at 10 o'clock, and the court granted their request. They are held in default of their bail, which is \$2,000, in default of which the prisoners were locked up in the county jail.

It is believed that the three men are accused men. He will have a number of witnesses subpoenaed from Fargo, Jamestown and other points in the northwestern part of the state, and have acquaintances.

James Ward is from Peoria, Ill., he says. He was arrested soon after the robbery on suspicion of being one who, if not actually implicated, at least knew something about it. No evidence against him was brought against him and he was discharged.

There is one other Illinois man in the trio. George Vernon says his home is in Elgin, Ill., but that he has not been there for some time. He claims to have been working in the harvest fields of the Northwest ever since the harvest season commenced, and that he was on his way home when arrested on the charge of vagrancy. He asserts his knowledge of any part of the train robbery.

E. F. Geary does not tell where his home is. When asked he said he preferred not to say anything about it. Geary, too, has been working with a threshing outfit, he says, and will bring witnesses from North Dakota town to testify to his character.

It was shown at the trial in the municipal court yesterday afternoon that all of the men had money on their persons when arrested on the charge of vagrancy. They claim it was nothing more nor less than a tramp-up scheme to hold them while the United States authorities could take the proper steps to get them to their trial. At the trial the men strenuously deny any knowledge of the slung shot, revolver and knife which Officers Fox and Hennings, who made the charge of vagrancy, charge, think they saw Ward and Geary hide under the sidewalk.

The prosecution think they have some strong witnesses in John Helton, the section boss, who is said to be ready to swear that Ward is one of the men implicated in the hold-up; Conductor P. Corcoran and Brake-man E. L. Hall.

A telegram was received here yesterday from Theodore Morstad, of Chittenden, Minn., stating that James Ward, alias James Cochran, alias James Abner, with his two pals, E. G. Geary and George Vernon, are thought to be wanted at that place for blowing a safe. The sheriff of the county will be here Monday, it is expected, to try and identify the trio.

MRS. BOOTH-TUCKER COMING.

Will Be a Guest of the Mayor While in the City. Consul Booth-Tucker, the second daughter of Gen. Booth, and wife of the commander of the Salvation Army forces in the United States, will visit Minneapolis Oct. 25 and 27. She will be accompanied by Brigadier Lewis and the event will be of the greatest importance to the Salvation Army in Minnesota, and special arrangements are being made for their entertainment. The consul and brigadier will arrive at the Milwaukee depot at 6 o'clock in the afternoon, when they will be met by the mayor.

DR. WATT'S OFFICE AND LABORATORY.

230 Hennepin Av., Minneapolis, Minn. The oldest and most successful Specialist in the West for the cure of Chronic, Nervous and Private Diseases. Suffering from evil effects of youthful indiscretion, late erection, late marriage, nervous debility, varicose, unnatural discharges, loss of vitality, falling memory, untidiness to marry, blood, skin, and other ailments, speedily cured. He employs the most approved methods, and will GUARANTEE a cure, or refund the money. In strict confidence, at moderate expense. Consult with Dr. Watt, who has cured thousands who thought their cases hopeless. No Exposure. LADIES suffering from any form of Female weakness, Proliferation, or other ailments, permanently restored to health. Twenty-five years' experience. Offices and Parlor, 230 Hennepin Av., Minneapolis, Minn. FREE consultation. Call or write for list of questions. Medicines sent free from observation. (See hours) Oct. 17 to 19, 1897.

work to prepare and send out their second letters of inquiry as to how the work was progressing, in order to have them ready when the boys returned. These letters would bring the information which was eagerly desired, as they would furnish exact information as to the status of the work, and any lingering doubts as to the success of the day's work were dispelled when the replies began to come in. DEADENS THE NERVE.

NEW ANAESTHETIC EUCALIN EXPERIMENTED WITH AT JAMES-TOWN HOSPITAL. JAMESTOWN, N. D., Oct. 16.—A recent experiment with eucalin, the newly-discovered anaesthetic, at the state hospital for the insane in this city, have been entirely successful. Heretofore there has been no known method of artificially producing an insensibility entirely free from risks of death, and deaths have occasionally occurred under the administration of anaesthetic vapors. With this latest discovery local insensibility can be produced, leaving the remainder of the body in its normal state.

The new substance, which comes from Germany, was recently obtained by Superintendent Moore of the asylum and a series of experiments entirely satisfactory in results was obtained. The severest test was the amputation of the lower third of the right leg of a man sixty-eight years old without the use of either chloroform or ether, followed by rapid and painless healing of the stump. The disease which necessitated the removal of the leg was the death of the bones of the foot, ankle and the bones of the leg immediately above the latter, causing inflammation and sloughing of the softer parts. It is a general prostration being attendant upon the absorption of poisonous materials by the circulation. Unless the operation had been performed death would have been inevitable. He had for years been a sufferer from rheumatism which had effected his heart and this, with his age and general debility, made the use of a general anaesthetic very unsafe and dangerous.

As much of the eucalin was put into two or three tablespoonfuls of water as the water would dissolve and with a hygienic strainer the drops of the solution were injected under the skin. About an inch from the center of the incision another was made and then the incision in closed. Last night this was done and the patient was given the seat of the discomfort. No other pain was experienced and the patient ate his breakfast as usual, the operation being performed in the afternoon, and an hour after the dressing of the stump he was sitting up in bed eating dinner. At the end of nine days dressings were removed, stitches taken out and the patient is now on his feet. The patient's general health has much improved since the operation. He has gained in flesh and strength and the constant pain is replaced by a sense of blood poisoning, caused by the decay of the bone, is a thing of the past.

Eucalin is a substance prepared from a South American plant; it is similar in its local action to cocaine, but without any of the poisonous effects of the latter, even though it be employed in much larger doses. It is undoubtedly suitable to replace cocaine, while in many cases such as the above, it will be utilized for the painless performance of operations in which the use of chloroform or ether was formerly thought to be indispensable.

MURDER CONFESSED.

Owatonna Tramp Admits the Shooting of Policeman Winkelmann. NEW ULM, Minn., Oct. 16.—The sheriff has been called to Owatonna by a message that one of the prisoners in the Owatonna jail had admitted that he was the murderer of Policeman Albert Winkelmann in this city, on the morning of July 4, two years ago. John Ives, a tramp, who had served out a thirty days' sentence in the Owatonna jail, upon being released told the sheriff that one of the other prisoners had made a confidant of him and confessed that he had fired the shot which resulted in the death of Policeman Winkelmann. This prisoner has gone under different names. Ives says he knows him as Tom Hoagen, but he is now awaiting the action of the grand jury on a charge of larceny under the name of Michael Enright.

Enright's tale, told by Ives, corroborated the little evidence that was adduced by the coroner's inquest. Winkelmann was still living when found early in the morning of the 4th, and his last words were that he had been shot by a tramp. He had also had trouble on the afternoon of the 3d with a tramp, whose description tallies with Enright. The county will take steps to have both Enright and Ives brought here for a hearing.

WHEN KITTY LAUGHS.

When Kitty laughs, her boisterous glees brings instant, echoing mirth to me; When Kitty frowns, my soul is shook with terror—Kitty. —Detroit Free Press.

S. E. OLSON CO., THE BIG STORE, MINNEAPOLIS. MERCHANT: TAILORING!

YOU CANNOT AFFORD....

To remain longer in Ignorance of the STYLISH, PERFECT FITTING SUITS, OVERCOATS and TROUSERS being made in our Merchant Tailoring Dept. Your tailor charges you \$40 to \$50 for a Suit such as you want. OUR PRICE on these Suits is \$25 to \$35, and we guarantee a PERFECT FIT, BEST TRIMMINGS and HIGHEST CLASS WORKMANSHIP.

Our \$20 Business Suit is a wonder.....\$20 An Imported Melton or Kersey Overcoat for.....\$25 Fine Clay Worsted Suit, imported to order.....\$25 Fine Evening Dress Suit, full silk-lined.....\$45 Beautiful line of Trousers, worth to \$9.....\$6 Our Covert Cloth Top Coats are a marvel of comfort and elegance.

N. B.—Mr. H. T. Meginniss (formerly of St. Paul), manager of our Tailoring Dept., will be pleased to receive a call from his St. Paul friends, assuring them that he is better able to serve them in his new field than ever before.

S. E. OLSON CO., The Twin Cities' Greatest Store, MINNEAPOLIS.

IMPORTANT ANNOUNCEMENT

AT 8 O'CLOCK Monday Morning, Oct. 18th, BEGINS OUR 12th Annual OCTOBER SALE!

This Great Bargain Benefit so Prolific with money-saving opportunities at a time of the year when wants multiply, when so many urgent needs must be provided for, comes as a boon, especially to the economizing masses, an event anticipated by weeks and months and swelling in magnitude and far-reaching importance with each recurring year.

At no time since we began our business career in this city have we been so well situated to give our customers and friends a general Price Picnic as at present. Preparations for this sale have been going on for a long period past and our Departments are all overflowing with THE BEST.

In order that every one shall have equal show with everybody else, we place many "Extra Specials" on sale from 8 to 11 every forenoon during the week to induce early trading and avoid as much as possible the customary congesting during afternoons.

For your guidance we have printed Price Lists of the Special Bargains. Ask for one at either entrance.

Extra salespeople engaged, and we hope to make the entire service adequate in all respects. Kindly report any inadvertences or errors. Our ONE aim is that NO one shall go out dissatisfied or from the "Big Store."

Oriental Rugs!

We have just received the first shipment of a most superb collection of Magnificent Oriental Rugs. The purchase consists of some 500 pieces, embracing practically every sort of Oriental known to the trade.

They were carefully selected, piece by piece, under the most favorable conditions, by a thoroughly competent expert.

We own them at prices fairly a surprise to ourselves and which we never expect to be able to duplicate.

It goes without saying that whatever our good fortune our customers come in for a good big share.

Our special quotations may be found in our regular advertisements from day to day.

We place on sale for Monday 75 Antique Anatolian Mats, universally sold at \$3.50 to \$5.00 each,

At an Even \$2.

What Makes Men Strong?

ELECTRICITY—The Fountain of Youth, the perpetual energy which sustains all animal life. It is the source from which springs the bubbling spirit of joy in young manhood. It is the vital element which keeps up the nerve force in old men to a good old age. When the body is charged with it the vital powers are strong. Confidence flashes from the eye and the step is firm. Without it—well, how is it with you? Are you weak, gloomy, wanting physical and brain force? If you are weak you should begin at once using this famous appliance for weak men.

DR. SANDEN'S NEW BELT.

THIS GIVES WHY NOT Strength. Be Strong

Are You Not Tired of Useless Drugging?
