W.; "Fanciful Predictions of War," by William Ward Crane; "A Ute Funeral," by Paul W. Beck; "The Petrified Legs," by J. Armo Knox; "Our Soldiers' Songs," by William Ward Crane; "The Craze for the Uncoversions," "The Destroyer," by Paul R. Heyl.

FOR SALE BY ALL BOOKSELLERS AND NEWSDEALERS.

AN ADVANCE IN WHEAT

Continued from Fourth Page.

Mexico, for about all the hogs shipped out of this country go to this Southern republic. Mexico is gradually becoming a more liberal nation, and our wheat is a valuable product. This is partly because Americans are getting to be heavy investors there, and as "trade follows the flag," the wheat of the Mexicans and Yankee push—Drovers' Journal.

SCARCITY OF LAMBS.

There is such a scarcity of lambs and prices for feeding stock are so high that some of the best of the lamb-raisers are experimenting with calves. The plan is to feed them the same as lambs, and market them as fat yearlings. There is no good reason why they should not succeed and make good profits, except that prices for calves are about as high as prices for lambs—Drovers' Journal.

STEEPS WITHOUT WOOL.

The principal kind of meat consumed by the people of Mexico, both native and foreign, is the mutton of the Somali, or black-head sheep, and no matter by whom eaten, all pronounce it the best mutton ever tasted. This sheep, as its name indicates, is from the Somali country, on the African coast. These sheep have no wool, but short, fine hair, similar to that of a goat. The most considerable thing about them is that they have a large lump of pure fat growing right at the root of the tail, and this fat varies in size and weight according to the condition of the sheep. A medium-sized lump of this fat weighs about four lbs. such a sheep, which weighs from 25 to 30 lbs., is sold at from four to five rupees (50c to \$1.05). The skins, when sun-dried, are exported, and large quantities of them go every year to the New York market, where they are known as "mocha skins" but, like the "mocha coffee" of commerce, this is merely a term and nothing else. In 1897 these skins were imported into New York to the value of \$125,235—New York Press.

The Cubans will make a great mistake if they admit free duty on the common scrub cattle of Mexico and Central America. Through the duty-free status of the Spanish there are no cattle left in Cuba worth considering, and the whole island will have to be re-stocked. The most profitable thing to do would be to get good blood at the start, for in this business the quality counts for more than quantity. If Cubans seek like commoner stock from the South American countries they will get the same quality such as Mexico has, that is practically worthless. The stamp of American progress, however, will be in evidence in the future, and there will be improvement in the live stock line as well as in other lines of business—Drovers' Journal.

SOUTH ST. PAUL HORSE MARKET.

George W. Wentworth, of the South St. Paul horse exchange, reports a number of buyers from the States and Canada, but with only a limited trade. Barns are well stocked but the bad weather of the week was unfavorable for the out of door trial of horses. The following are representative sales:

One pair drafters, \$2000 \$270 00
Draughts, extra, ranging \$1200 \$190 00
\$ 6 general purpose horses \$50 00

MIDWAY HORSE MARKET.

The early reports of transactions received from this market comes from Barrett & Zimmerman. There were large receipts during the week, but the most considerable was wholly of heavy and general utility horses. Lumber and logging men were on the market for the heavier class of animals. There were few Western horses offering, though the demand was good for the class, and no call for general purpose horses. The following quotations are made for serviceable sound horses from 4 to 8 years old:

Wt. Price.
Drafters, extra, ranging \$1700 \$130 00
Draughts, extra, ranging \$1200 \$190 00
Draughts, common, ranging \$1000 \$5 00
Farm horses, extra, ranging \$1400 \$0 00
Farm horses, common, ranging \$1000 \$0 00

CHICAGO HORSE MARKET.

F. J. Barry & Co. say: Receipts have been liberal during the past week, but the market has not been all that could have been wished for. While all horses of high quality have been in strong demand and sold well, and a rule realized a very satisfactory profit to the seller, the more ordinary stock has been in only fair demand and sold at moderate values. The leading feature of the market for smooth 1200-1500-lb. chucks, heavy drafters of extra quality, and stylish coaches and sponges. There is a considerable call for a good grade of breeders weighing from 1200 to 1700 lbs. As yet there has been but little inquiry for Southern stock, owing to

SCRATCHED CONSTANTLY

Baby Badly Afflicted with Eczema.

Hands, Face, and Cloves Covered with Blood.

Face Covered with Large Sores. Medical Treatment Useless. Cured by Cuticura.

SKIN NOW SMOOTH AND ROSY.

My niece's little baby boy, two years old, was so badly afflicted with Eczema that he needed constant watching. It was all over his face, and he scratched the sores constantly. Mornings, his clothes would be stained with blood, and his face and hands would be covered. His family never could take him out as his face was always full of large sores. They had medical treatment, and tried everything they heard of. She commenced using the CUTICURA REMEDIES last spring and found that at last she had a wonderful healer. The sores left his face and he was entirely cured, and now his face is so smooth and rosy that no sore had ever been there to mar it. Mrs. L. J. ROOT, New Scotland, N. Y. Feb. 16, 1898.

CUTICURA WORKS WONDERS

In all the world there is no other treatment so pure, so sweet, so specifically effective for distressing skin humors of infants and children as CUTICURA, greatest of skin cures, best purifier, and humors, it softens, soothes, relieves, permits rest and sleep, and points to a speedy, permanent, and economical cure, when the best physicians, hospitals, and all else fail.

PREPARED BY CUTICURA REMEDIES, GREAT OF SKIN PURIFIERS AND CURES.

Sold throughout the world. PUTTER DRUG AND CHEM. CO., Sole Importers, New York, N. Y.

How to Cure Eczema, Erythema, Itch, etc., mailed free.

KING OF THE SHOCKED

MR. EUSTIS MAKES A SPEECH WHICH MAKES VOTES FOR MR. LIND

AN INSULT TO THE LATTER

His Reference to Mr. Lind's Waiting for a Feed Box Full of Oats and a Halter Not Relished by the Audience—Farmers Told They Have Not Sense Enough to Hold Their Wheat.

WILLMAR, Oct. 23.—(Special.)—Friday night the hero of Guaranty Loan and my-policy fame appeared on the stump for the first time before the citizens of Willmar. An audience of over 1,000 men, women and children gathered to hear the speaker, and listened attentively for two hours and a half to the G. O. P. candidate for governor.

A most respectful, intelligent and witty critical audience never faced Mr. Eustis yet in his journeyings. At first it was disposed to admire the speaker and liberally applaud his rhetoric. But all at once the speaker turned to personal remarks about Lind, and proceeded to state that Mr. Lind was only a little distance away from the Republican fold, and at the headquarters of the G. O. P. caravansary was "an empty stall, a feed box full of oats, and a halter for him to put on, as soon as he (Lind) should return, which he no doubt would do before long. "Only a little distance out," he said, "John Lind will soon return and take his oats."

SHOCKS THE AUDIENCE.

To say that this gross and yet realistic illustration of the speaker's train of thought shocked the audience is putting it mildly. Two-thirds of the audience were warm admirers of Lind, and to have it suggested to them that Lind's opinions on political questions were a matter of a "feed" was indeed putting it in the most delicate manner. And then here was a man out seeking the votes of intelligent men for the highest office in the state whose central idea of politics was to feed a stall, a feed of oats and a halter! The various emotions of wonder, bewilderment, scorn, contempt and surprise that swept over the audience at this time, and quite evident to the most carelessly observed, were a sight never to be forgotten. The audience fairly started, wondering what would come next.

GOOD TIMES HAD COME.

The next emphatic statement from the speaker was that the good times promised before election in 1896 by the Republicans had come. There were a few farmers in the audience, and a look towards several of them discovered a broad, sickly grin on their faces. "Good times come!" Yes, the sleek, fat, officeholder, present and prospective, but to the farmer who now sells his wheat at less than it cost to raise it and has his farm operations increased by unfair and vicious state inspection and gradings!

THE CANADIAN CHEESE TRADE.

The statistical position of cheese has undergone a very marked change during the past few years. The exports from Canada having shown a rapid increase at that time, as compared with the corresponding period last year, reducing the deficit in the United States from 274,000 boxes in Sept. 9 to 140,000 boxes. On Sept. 9 the combined shipments from Canada and the United States for the present season fell below the total of 1,000,000 boxes, whereas the deficit has now been reduced to 479,382 boxes. The shipments of the past two weeks from ports have sprung ahead of the same period last year, and at this rate the deficit will be turned into an increase; but we believe the market is not so bright as it appears. The fall market has undoubtedly been large, both in the province of Quebec and Ontario. The figures have been exceptionally favorable for milk production; but despite all this, the general impression is that the market will be large at the close of 1897, and the figures will be in excess of 1,000,000 boxes. The market has declined fully 5c since last week, sales being made of about 2,000 boxes of the best quality, at 8 1/2c, while the Western Union, a lot of 500 finest Eastern September, at 8 1/2c, while the finest Western Augusts have sold at 8 1/2c and 8 1/2c. These figures will be a fair idea of value.—Montreal Trade Bulletin.

AMERICAN APPLES IN EUROPE.

The United States consular at Chemnitz, Germany, advises Americans to ship apples this year to Germany. If good fruit is chosen, such as will stand a long voyage—the Baldwin apple, for instance—he is confident that the business will prove to be a paying one. Complaint has been made in Germany of the introduction of the San Jose scale, which is one of the most destructive diseases known to the fruit. Investigation has shown that the fear of this scale has been exaggerated. It is not so fatal as it is represented to be, and a course would soon result in destroying the export business. German experts are now in the United States studying the air-borne insects, they have not yet been known. The hardy winter apples usually command a high price in Europe. These apples are shipped to England as well as to the continent, and the business has been proved to be worth the trouble to establish it. In New York state, in Pennsylvania, and in the northern part of Virginia and in some parts of the United States, but disassembled fruit is not shipped abroad. Such a course would soon result in destroying the export business. German experts are now in the United States studying the air-borne insects, they have not yet been known.
