SOCIETY AT BEST Continued From First Page. women split their delicate gloves in applauding the effect. It was a charming surprise, and the people on the floor caught the spirit of it instantly.

The supper rooms were crowded of course—it would be just as if they were not. People found such seats as they could, and ate very sparingly of the cold viands that are usual at a charity ball. The collation was daintily served, and the great crowd was taken care of in a manner that left no more room for complaint as to the supper than there was because of the entertainment down stairs.

Altogether, the function was socially one of the most successful that the city has seen, and there could be no doubt of the financial success, for the crowd was calculated to make glad the hearts of the ladies who had labored to make it a success.

NEW ORLEANS, La., Nov. 23.—Competition is apt to be very brisk among the transcontinental lines for what is called second-class tourist travel, this winter. Dyspepsia. Geo. S. Sealy, of 75 Nassau St., New York, says: "For years I have been troubled with rheumatism and dyspepsia, and I came to the conclusion to try your pills. I immediately found great relief from their use. I feel like a new man since I commenced taking them, and would not know by without them. The dyspepsia, which I used to have as often as I ate, is now entirely gone. I am satisfied if any one so afflicted will give them a trial they will surely cure them, for I believe it all comes from the system being out of order—the liver not doing its duty."

A GREAT REMEDY. For Sufferers From Piles. Dr. Redmond, a specialist in the study and treatment of piles and rectal diseases, recently stated that the Pyramid Pile Cure, the new discovery for the cure of piles, was the most remarkable remedy he had ever seen or tried in any respect, and that was the instant relief experienced in all cases, no matter how severe, from the moment the remedy was applied. This was the more surprising to him because he had carefully analyzed the preparation and saw traces of opium, cocaine or similar poison could be detected.
