May, Minneapolis Close. Day.

May, Chicago 65% 665% 665%
May, Duluth 64% 65% 65% 65%

CHICAGO, Dec. 5 .- Business on 'change today was pared down to very small proportions by the interruption to wire facilities by the by the interruption to wire facilities by the recent storm, and the tendency of grain prices was principally for this reason slightly downward. Wheat closed 14@%c lower; corn unchanged and oats 1/4c lower. Provisions, however, were firm and closed 17/2@11/2/c higher. Wheat was lower from the start. May opened at 66@66%c, a decline of 1/2@1/2/c from Saturday's closing price, and in the first few minutes of trading, dropped to 65%c. Telegraphic communication with the East was seriously interrupted on account of the recent storm, but enough news filtered through to show the general drift of speculative tendency abroad and at the seaboard. It was decidedly bearish, and this marker was affected accordingly. The lack of wire facilities also seriously interfered with business, almost no orders either to buy or sell coming from the outside, and the market in consequence was extremely dull all day. This in itself had a depressing effect on prices, but also kept them within a narrow range. Liverpool was 1/2@1/2 lower, and reported an increase in stocks for the week of about 75,000 bu. Beerbohm estimated the world's shipments of wheat and flour at about 10,000,000 bu. Beerbohm estimated the world's shipments of wheat and flour at about 10,000,000 bu. Beerbohm estimated the world's shipments of wheat and flour at about 10,000,000 bu. The quantity afloat for Europe was estimated to have increased 3,500,000 bu. Northwest receipts were heavy, notwithstanding the unfavorable weather; Minneapolis and Duluth reporting 1,647 cars, compared with 1,598 last week, and 1,315 a year ago. Chicago receipts were 17 cars, none of contract grade. A slight reaction followed the decline to 65%c, due to a little buying against puts by the local crowd, but this was soon satisfied. The ent storm, and the tendency of grain prices slight reaction followed the decline to 65%c, due to a little buying against puts by the local crowd, but this was soon satisfied. The May option, however, sold up to 66c, and remained close to that point until the close. It once touched 65% 665%c, but got again to 66c, which price ruled until near the close. The market was apparently entirely in the hands of the local talent, and their operations were so limited that the pit at times presented almost a deserted appearance. May closed at 65% 66c.

\$4.52\\(\frac{5}{2}\)\(\frac{1}{2}\)\(\text{Bstimated receipts Tuesday: Wheat 350 cars; corn, 700; oats, 420; hogs, 35.000 head.

OTHER GRAIN MARKETS.

GRAIN GOSSIP—Gossip by private wire to C. H. F. Smith & Co., St. Paul, members of the New York stock exchange and Chicago board of trade. —The Ohio state crop bulletin for December shows that the condition of the growing wheat crop in Ohio has fallen off 2 points since Nov. 1, due to ravages of fly and grub worm. Still its condition is 100 per cent of full average. Corn area in Ohio for the year 1898 crop is given as 2.854, 564 acres, producing 111,354,701 bu, or 38 bu per acre; largest crop, except that of 1896, in the history of the state. —Advices from Russia say the reports of the threatened famine there are growing more gloomy every day. Count Leo Tolstol has petitioned for permission to form relief committees to cope with the distress. The czar has contributed a half million roubles to the Red Cross to aid the starving peasants. —St. Louis—58,000 bu No. 2 red wheat in Venice elevator, which is regular, has been sold to millers, and will not be delivered on contracts, as anticipated. This is about one-third of the contract stock here. Not a bu has yet been delivered on contracts.

NEW YORK, Dec. 5.—There was much interest and curiosity manifested in Wall street today regarding the president's message. When it was published it was found to be so free of matter calculated to affect the value of securities, that the course of prices was left to the influence of the technical causes. The recent view of professional traders has been that the message would prove to be a bull document, and they have brought stocks recently under that conviction. Upon the publication of the message it was natural, therefore, that this element should self to take their profits. But the chief effect of the anticipation of the message was to curtail operations in the stock market. This tendency was emphasized by the absence of telegraphic communication with many points in country owing to the storm. There was not entirely lacking also the proverbial disposition of stock exchange traders to a feeling of timidity over the advent of a session of congress. There is something of a prejudice in Wall street against some of the measures which representatives and senators assembled at Washington design for the wel-

ing of timidity over the advent of a session of congress. There is something of a prejudice in Wall street against some of the measures which representatives and senators assembled at Washington design for the welfare of the public, and a desire to be let alone in methods for the profitable employment of capital, against which congressional legislation is at times directed. The prevailing tone of the market, therefore, became increasingly heavy as the day wore on.

There was a period of comparative strength in the morning, especially in some of the stocks which showed strength last week. Metropolitan Street Railway mounted strongly 4½ points and then reacted 3½ on realizing upon the increase in the quarterly dividend to annual 7 per cent rate from a 5 per cent rate, Pacific Mail and the Iron Steel stocks continued moving upward, but reacted sharply before the close, particularly Federal Steel. Sugar fluctuated quite irregularly on the varying rumors concerning the status of the competition in the trade. There was rather a notable advance in a group of the Gould stocks, and some of the low priced railway shares were also strong. United States Express rose to 57% at one time, but reacted to 55c, and American Express dropped 5 points. The majority of the standard stocks were, however, notably dull, and for the most part heavy. This was especially true of the grangers and the Pacifics. There was some firmness manifested in the coalers, on the strength of the code weather.

The bond market was decidedly more active than stocks, and prices were better maintained, though there was a reaction from best prices in the late dealings. A number of lately dormant issues were brought into activity and moved sharply upward. Total sales, \$5,306,000. U. S. 2s advanced ½ in the bid price.

AGAIN ABLE TO SWALLOW. Nebraska Man Uses His Throat After

Months of Uselessness. OMAHA, Neb., Dec. 5.-A remarkable surgical operation of a most delicate character was successfully per-

formed at St. Joseph's hospital by an Omaha physician, John Gettch, of Norfolk, who lived for eighteen months on food inserted into the stomach by means of a rubber tube, was placed upon the operating table and had the artificial orifice in his stomach closed and completely mended, after the greater portion of his internal system had been turned, twisted, kneaded and all but removed.

The troubles of John Gettch began

about two years ago, when he swal-lowed a quantity of concentrated lye. The agony over, Gettch found a stric-ture of the throat had resulted. The swelling continued until this organ was absolutely useless and Gettch could swallow nothing. For eleven days he went without food and finally begged to be killed.

The abdominal walls and the walls of the stomach were sliced and a rubber tube inserted. This operation was performed a year and a half ago. Gettch proved an admirable patient. His constitution was an excellent one, ticated the prescribed foods between his teeth and then fed himself through the tube. But even this process palled. New hopes were held out to him of complete recovery. Another operation was suggested, and he consented to again submit to the knife of the sur-

The operation performed today is one of a very small number in medical history.

WEDDING PARTY MOBBED.

White Toughs Break Up a Colored Marriage Celebration.

DERBY, Conn., Dec. 5.-Bride and bridegroom were mobbed, church decorations destroyed and refreshments captured by assault by a crowd of white persons, who descended, without invitation, on a colored wedding here. Joseph Douglass McDuffle and Miss Mary M. Fountain were the parties to the marriage. White men, boys and women gathered before the Macedonia Baptist church early in the evening, and when the doors were opened they rushed in and occupied all the seats and the aisles, outnumbering the

colored folk two to one.

The bride and groom were unable to reach the altar for half an hour. As icine. Call or write for partic the Rev. Mr. Johnson had been delayed by a blockade, the bridal party stood there in confusion until driven behind the organ by a fusillade of snowballs and cabbage stumps. the minister arrived there was such a hubbub that he could scarcely heard, but he managed to conduct the ceremony.

Then the white persons tore up and divided the bank of evergreens and flowers at the altar. A fight followed. The bride's train and other clothing was badly torn and the bridegroom was roughly treated. roughly treated.
Part of the mob followed the bridat

party to the home of the bride's mother, and captured the refreshments.

The bride's brother at this point, however, got a revolver and set a buildog free, and the white roughs retreated Edward Lincoln was shot in the shoulder, thigh and foot, two other white men were wounded by bullets and one was slashed with a razor. One negro had his nose broken and another his wrist broken.

PASTOR SHOVELS SNOW.

Practical Religion Scores a Triumph in a Long Island Town. GREENPORT, L. I., Dec. 5.-Prac-

tical religion scored a marked success in East Marion when the village sidewalks were cleared of the snow that had made them impassable. A determined body of volunteer snow shovel-lers was led by the Rev. Mr. Rowley, pastor of the First Baptist church, who demonstrated that he could handle a snow shovel as well as a text

A series of revival services is to begin at East Marion. The snow which fell made the sidewalks impassable, and under these conditions the attend ance at the revival services would

have been limited.

Mr. Rowley decided to clear the sidewalks. He made a house to house canvass. His parishioners responded readily, and at 9 o'clock this morning about twenty able bodied men, led by dominie, set to work. All the big drifts had been shoveled through at 2 o'clock this afternoon, and no person will be obliged to stay away from church.

State Electro-Medical Institute, 301 Hennepin Ave. Minnoapolis, Minn. trate Eph Keigwin, is at the point of

death at his home in this city. Keigwin has done more to make matrimony Jeffersonville's chief industry than any other man. He has been magistrate since 1877 and has mar-ed nearly 9,000 couples. He has been a favorite with elopers, having three of the elopers' irate parents and the

CAUSE OF WRINKLES.

Smelling Salts Are Said to Have a Bad Effect. From the New York Herald.

From the New York Herald.

The woman who wishes to retain the beauty of her face—and what woman does not?—should forego the use of the smelling bottle, for, according to a well known New York physician who has lately been making experiments in that line, the use of smelling saits encourages wrinkles.

"If you don't believe me," he said, "stand in front of a mirror and inhale the purgent odor from a smelling bottle and notice the number of lines that form about the eyes, nose and mouth. Each sniff taken from the bottle causes the same screwing up of the face, and each time the unbecoming lines deepen. Remember, also, that it is an unpleasant experience which has called up these wrinkles. Those caused by laughing and talking are bad enough, but the wrinkles formed by the use of smelling saits give an absolutely undesirable expression.

"But if you are already in possession of wrinkles which have been produced in other ways than by the use of saits, then smelling saits are a specific for removing them." causing them to stay away. In almost every case the wrinkles formed by laughing and crying are in an exactly opposite direction to those produced by inhaling salts, and in this case smelling salts act like a charm in caus-

ing the unbecoming lines to disappear." Alcohol as Fuel.

A new invention of great importance has just been patented by a German chemist, Julius Norden, of Aldenhoven, Germany. He has succeeded in hardening alcohol until the becomes a solid mass. This will insure a becomes a solid mass. This will insure a very much greater popularity for the employment of alcohol. It now comes in small cylindrical pieces, packed in patent tin boxes, that can be used for cooking, lighting, heating and the various uses of everyday life. The solidified alcohol burns without a wick, can be blown out after use and then harvens again within a minute. The danger of explosion is absolutely done away with.

Production of Cowhells.
