BUSINESS WAS OF THE RUSHING SORT, THOUGH PROFESSIONALS HELD FLOOR

B. & O. WAS A LEADER

Talk of Deferred Dividend Was the Cause of Especial Activity in That Security-Liquidation Felt.

NEW YORK, June 25 .- There was considerable speculative activity in the stock market today, and the fluctuations in prices were quite wide and frequent. The net changes are mostly small, so that the result of the day's trading is not con-clusive as to the turn in prices. The market was exceedingly irregular all day and at times very much confused. The opening depression in sympathy with Lon-don, where the Chinese outbreak had an unfavorable effect was generally over. unfavorable effect, was generally overcome. Prices then broke with some violence, the bear attack being directed especially against Baltimore & Ohio. Continued pressure was in evidence also
against Brook n Transit.
Baltimore & Ohio is one of those stocks
which has been most advanced in prices

which has been most advanced in prices on predictions of a dividend disbursement, and whispers were current today that the declaration of the dividend would be at least deferred. The stock suffered to the extent of 4 points at the lowest level. Brooklyn Transit sold to 49, which was 2% below Saturday's level.

In sympathy with this acute weakness,

the whole market sold off, and apparently the liquidation of last week was renewed in force. But the market gave evidence later of being oversold, and the bears began to absorb stocks to cover their short contracts. There was a genamongst the bears, the covering move-ment being conducted in a well ordered manner. Bulls attempted to extend the advance, but prices had not risen more demand from the shorts diminished to almost nothing

almost nothing.

The dribble of ilquidation was sufficient to turn prices downwards again, and they were only partly arrested at about last night's level, where the movement became very irregular at the close. The principal influence in causing the doubtful mood amongst the professional bears was the sharp break in wheat. The fact that the break was largely due to technical causes and to pressure to realize on the part of an overextended long interest did not seem to lessen its effect, in spite of the continued reports of the damage wrought to crops in the Northwest. The stock market was apparently as much oversold as the wheat market overbought, and the professional realization caused the relexation in each.

The apprehension caused by the Saturday bank statement was also soothed to some extent. The conviction gained ground that the sharp decline in cash reserves was due to preparation for the withdrawal of government deposits, and possibly, to the placing of bids for the New York Ceutral stocks, which were awarded today, to the amount of over \$2.00,000. The apparent easy situation in the money market was a source of relief. The opinion expressed by a director of the Reichsbank, in an Associated Press dispatch from Berlin, was a potent influence in relieving uneasiness regarding the situation in Berlin. The opinion expressed by this director that a reduction in the German bank discount could be made were not the semi-annual set-
