You know what our politics are, and you are the ones to choose be-tween those parties and those policies Under the Republican administration the trusts have increased. now, you will get enough if the Repub-lican party stays in power. "When I remember how people have learned in the last four years what a trust is, when they ought to have known in advance, I am reminded of one of Sol-omon's proverbs. I think there is a great deal of wisdom in what Solomon said, and he stated his wisdom in such a way that people ought to be able to under-stand it. He said: "The wise man fore-seeth the evil and hideth h mse.f, but the foolish pass on and are punished." At times I find a Republican who can-not remember long sentences. I con-densed this so they can remember it. Solomon's proverb reads this way: "The wise man gets an idea into his head, the foolish man gets it in the neck." Discussing the Philippine question he said: "You will search history in yain for a

he answered warmly, saying that the Republicans never wanted to discuss the race question except in campaign times. "I am glad you spoke of the negroes. If you will look with the Sulu treaty, you will not have a chance to talk about the negroes during the campaign. I do not know of a purer piece of hypocritey than the hipocracy of the Republican who defends the Sulu treaty and con-dems the amendments in the Southern states. Under the Sulu treaty the flag foats over the Sulu lands' palace, and under section 10 it is provided the slaves can buy their liberty at the market price when they earn enough to do so working at nothing a day. If you find there is a race question in this country that will require all the patriotism and oil the intelligence of the people, North and South, to solve, is that a reason why you should drag in another race question. Is that a reason why you should bring hto this country \$000,000 brown people, not to share in the destiay of this country. There is not a Republican in position to defend the negre question. The Repub-lean party has taken the negro for thirty years to an office door and then tied him on the outside. The negro has bestowed presidents on the Republican party, and the Republican party has given the ne-groes janitorships in return." Discussing the Philippine question he said: "You will search history in value for a more dishonorable part than the Repub-lican party has taken in turning a war for humanity into a war for conquest." He then referred to the fact that a company of soldiers for the Philippines had been organized in Wahpeton, and asked how much of the Oriental tride should be required in exchange for the life of one of them. He wanted expan-sion of trade as much as any one, he said, but he was not willing to put one American boy on the block and auction him off for all the trade of the East.

Mr. Bryan said in part. "I am going to assume that every Republi-can who has done me the homor to come here today thinks more of his country than he does of his party, and if I can convince the Republicans present that they can better serve their country by voting our ficket than by voting the Re-publican ticket. I shall expect them to join with us in this campaign. I ask not what they did in 1956; I ask not what they may do in four years hence; suff-cient for today are the issues of today.
