

ASPHALT THE CHOICE

MARSHALL AVENUE RESIDENTS SUSTAINED BY THE ASSEMBLY
NO PROTESTING VOICE HEARD
B. F. Conway & Co.'s Bid Will Be Accepted if Mayor Smith Gives His Assent to the Act.

No further delay is anticipated in the paving of Marshall avenue. At the meeting of the assembly last evening unanimous approval was given to the action of the board of public works in awarding the contract to the B. F. Conway company, and now all that remains is the indorsement of the mayor and the legal publication of the act.

Confident that the assembly would repeat the action of the board of aldermen at its meeting last Tuesday evening in awarding the contract, few property owners concerned themselves with the matter.

The action of the board of aldermen in killing off the final orders authorizing the paving of Minnesota, Minnehaha and Decatur streets, and the repudiation of the award of the contract for the paving with asphalt of Jackson street and Central Park place, took the controversy from the hands of the assembly, but it did not prevent Assemblyman Benson from voting no when new preliminary orders for these streets were introduced.

There were two preliminary orders, one for Jackson street and the other for Central Park place, both naming asphalt as the paving material. Unexpectedly no debate resulted. Mr. Benson's voice only being heard when he asked to be recorded as voting no. Six members were recorded as favoring the new orders.

From the board of public works was received a final order for the paving of Eighth street, from Broadway to Kilston street, with sandstone, but the board refused to indorse it, sending it to the committee on streets for discussion.

TWO POLES CUT DOWN

Clausen Commences Crusade Against Unauthorized Ones. City Engineer Clausen yesterday began his crusade against poles and wires that occupy the streets without authority by chopping down two poles that have for some time been disfiguring the park at the corner of Third and Summit avenues.

The ownership of the two poles was denied by several telephone and electric light companies, but before removing them Mr. Clausen informed himself as to whether any of the city wires were attached.

Relative to Police Commissioner Lawler's letter, published in the Globe yesterday, Mr. Clausen yesterday refused to talk, saying he did not care to enter into a controversy. A reply will probably be forthcoming at the next meeting of the police board.

CORN CROP A FAILURE.

Gen. Baker Says Wheat Yield in Blue Earth Is Fine. Gen. J. H. Baker, of Mankato, and for years a leading authority on the subject, arrived in the city last night, and is at the Merchants.

Gen. Baker is entirely out of politics and just now is more interested in the outcome of the crops than anything else. Thrashing in Blue Earth county is progressing favorably, and the wheat yield is better than was anticipated, but the corn crop is almost a failure.

ANDREW SCHUCH

GROCERY CO., Broadway and Seventh

The big store offers big inducements today. Don't miss them. They will do your purpose good.

Blueberry Sale. Now is the time to get Blueberries for preserving cheaper than at any other time this year.

16-quart case in quart boxes, extra fancy stock. \$1.25

Honey. 3 tumblera pure strained, per lb. 25c

Try a jar of the celebrated North Oaks Butter, fresh from J. J. Hill's farm.

The Andrew Schuch Grocery Co. THE BIG STORE, Broadway and Seventh, St. Paul.

NO MORE STREET CONTRACTS.

Advancing Season May Prevent Starting of New Work. Commissioner Mabon has advanced the opinion that there will be no more contracts for street paving made this year. He says the time is too short to complete the orders and place the contracts this year.

Many of the aldermen say the situation has been made up to the board of public works, and they have it in their hands to give property owners the benefit of the paving which has been assured.

DOUBTS GROCERY TRUST

JOHN F. KELLY, OF THIS CITY, KNOWS NOTHING OF COMBINE. He is Inclined to Believe that the Story Has No Reliable Foundation in Fact.

As far as could be learned last evening none of the wholesale grocery houses of St. Paul has been included in the prospective membership of the grocery trust which it is reported is to be formed by firms in that line of business, or has been invited to send a representative to the meeting which it has been announced will be held in New York for the purpose of organization.

John F. Kelly, of the firm of Foley Bros. & Kelly, when asked last evening for information in regard to the project, said he had seen it stated in the papers that such a plan was on foot and that a meeting of wholesale grocers was to be held for the purpose of organizing, but otherwise he had heard nothing of it at all, and he has no doubt that there was nothing in it. Our firm has not received any sort of request or invitation to join in any plan of that kind, and he knows for the fact that he would therefore be the first person to receive anything of the sort that might come. I have not heard any mention of the proposed trust or combination among the grocers of this city, and I am quite sure that if there really was any such scheme in contemplation some of us would have heard of it.

According to report it is intended to start the trust with a membership or constituency of about 10 per cent of the 270 wholesale grocery houses in this city, or from 25 to 275 of the leading firms in that line.

In Labor's Field.

President Henry Glase Jr. presided at a meeting of the Chalmers union last night, when there were two initiations and the union approved of strikes in Philadelphia, Pa., and in Providence, R. I. A union label was granted a factory in the city. The Labor day committee reported preparations for a good showing Labor day, when the union will have 150 men in line. Frank Uman was elected banner carrier. Receipts, \$7.38, disbursements \$16.

Stonemasons Out of the Parade.

The Stonemasons' union decided at last night's meeting not to turn out in the Labor day parade. This is accounted for by the fact that, owing to the dull state of trade, the great majority of members are expected to leave the city soon. The communication was received from James F. McHugh, Washington, D. C., general secretary treasurer of the Journeymen Stonemasons' Union of North America, saying that he would like to see the union on Monday evening next. A special meeting will be held at Assembly hall on that evening to welcome Mr. McHugh to this city, on behalf of the union stonemasons of St. Paul. The balance of the meeting was devoted to questions of a purely routine character.

Labor Day Committee.

The Labor day committee met last night and made some progress towards Labor day celebration. The Citizens' orchestra of eighteen pieces was engaged to head the Labor day parade. Bids on privileges on the grounds will be received. The committee is expected to meet on Monday evening next. A special meeting will be held at Assembly hall on that evening to welcome Mr. McHugh to this city, on behalf of the union stonemasons of St. Paul. The balance of the meeting was devoted to questions of a purely routine character.

Stonemasons Will Have a Float.

The attendance at last night's meeting of the journeymen stonemasons' union was large. The principal question of importance was the Labor day parade celebration. The committee having the preparations in charge was directed to make arrangements for a suitable float for the parade. August Zruenig and Andrew Peterson were appointed to receive applications and referred to the proper committee. A communication was received from James F. McHugh, Washington, D. C., asking for four bricklayers, but as there were no idle members the secretary declined to accept the request. The receipts of the meeting were \$12.30, disbursements \$14.35.

LABOR NOTES.

The Painters, Mason Tenders, Steamfitters unions and Trades assembly meet tonight in assembly hall. The Printing Trades council held a well attended meeting last night, which was of a routine character. The hall board met last night and audited the books of Secretary Treasurer and Grigier, which showed receipts for month past \$253.70, disbursements \$257.06; balance on hand, \$48.38.

FROM HOUSE TO HOUSE.

Water and Sewer Connections Permitted to Be Made in This Way. In a letter to the council City Engineer Clausen says he is opposed to the granting of special permits which allow water and sewer connections from one house to another. He says it is in direct conflict with the city ordinance prohibiting them. The letter was in answer to a petition from D. A. Michaud, of the West side, who desired to connect his water connections with some property he owned at 88 South Wabasha street, instead of connecting directly with the main. Despite Mr. Clausen's protest the permit has been granted by the assembly.

AERIAL VIEW OF TWIN CITIES.

Chicago Photographer to Take View From Balloon. A bird's-eye view of St. Paul and Minneapolis is to be taken by George R. Lawner, the Chicago aerial photographer, who arrived in the city yesterday and who is making preparations for his flight. The pictures will be taken from his motor balloon, which is eighty feet high and requires 25,000 feet of gas to inflate. His camera weighs 140 pounds with a plate of 250 pounds. Mr. Lawner has gained a national reputation through his work.

CHARGE MAY BE SERIOUS.

Beyer Likely to Be Arraigned for Assault With Dangerous Weapon. Frank Beyer, who was before Judge Hine in the police court yesterday, will most likely have to stand trial on the charge of assault with a dangerous weapon on when his case comes up this morning. It is alleged that Beyer is the man who slashed Peter Johnson, 432 Oak Fifth street, across the leg with a knife about three weeks ago. Johnson was then remonstrating with several drunken men for making a noise near his house. Beyer left the city, but recently returned.

LAW COLLEGE GROWS

ST. PAUL INSTITUTION HAS ATTAINED RECOGNIZED STANDING. FACULTY IS STRENGTHENED. D. W. Lawler to Join Faculty, Which Includes Senator Clapp, Hiram F. Stevens and Other Notable Jurists.

Hon. Hiram F. Stevens, dean of the St. Paul College of Law, leaves for Denver the last of this month to attend the annual meeting of the Association of American Law Schools, which precedes the meeting of the National Bar association, before which he has been invited to deliver an address.

The St. Paul college, which Mr. Stevens represents in Denver, although only established a year ago, has leaped at once to a ranking among the established law schools of the United States. Its catalogue just issued shows that it has a faculty of 12, which includes, besides Mr. Stevens and Mr. Lawler, Judge H. R. Brill, instructor in law of evidence; Senator Moses E. Clapp, special lecturer; Henry W. Childs, instructor in law of taxation and of insurance; Marcellus L. Countyman, instructor in law of contracts; Edmund Durmet, pleading and practice; Clarence W. Halbert, law agency; Oscar Hallam, law of personal property; Charles G. Lawrence, law of equity; William H. Lightner, law of torts; and several other notable jurists; M. D. Munn, constitutional law; T. D. O'Brien, law of corporation; N. M. Thygerson, law of torts; Francis E. Thayer, law of negotiable instruments and of sales; Ambrose Tiche, elementary law and law of municipal corporations; William G. White, law of partnerships and of wills.

The school furnished instruction last year to forty-five students, formed into two classes—the first-year class consisting of twenty-nine men, and the second-year class consisting of sixteen men. This body of students who entered the course of an entirely new institution, relying on its strength of faculty and its course of instruction, will be greatly augmented this fall by the proved merits of the school. At the last session of the legislature an act was passed providing in substance that graduates of a Minnesota law college complying with the prescribed standard, and the character of which was approved by the supreme court of the state, should be entitled to a certificate of admission to the bar without special examination or the payment of fees. The St. Paul College of Law, which is now in the process of being organized, is a college of the prescribed standard and the supreme court issued a certificate of approval.

Of the forty-five men in attendance the last year, five were from outside of St. Paul, and the officers are exerting themselves to have the school presented to the attention of all who contemplate a legal education in this state. For this purpose thousands of catalogues have been distributed throughout Minnesota and the Dakotas.

The fall term of the college begins Wednesday, Sept. 18. The sessions are held in the evening, beginning at 7:30 o'clock, in the county court house. The regular course of study for the degree of LL. B. covers a period of three years, divided into a first, second and third year.

State Superintendent of Public Schools Olson and Inspector of Graded Schools Rankin returned last evening from Pine City, where they went to investigate public schools with the view of placing the district in the high school list. They were accompanied by Attorney General Douglas and J. Adam Bede, state stenographer of Pine City, accompanied the party to St. Paul.

The investigation proved very satisfactory to the officials, who are well pleased at the showing made by the schools. Suggestions were given as to improvements in the buildings and other cognate matters.

During the day the visitors were entertained with a ride on the outside of St. Adam Bede was seen at the Windsor last night, and he is very enthusiastic over the big potato crop in the vicinity of Pine City, saying that it is a pretty good showing. They are being marketed on a raised on \$5 an acre, and especially when the yield runs as high as 150 bushels to the acre.

MINNESOTA IS SAFE

BIG STEEL STRIKE WILL NOT REACH THE IRON MINES.

The Northwest, in the opinion of Dwight E. Woodbridge, of Duluth, now being held in Twin Cities will not be affected by the big steel workers' strike. He does not expect that it will in any way extend to the iron mines of the Northwest, and, unless it is prolonged, will have little effect on the Minnesota iron mines.

Mr. Woodbridge bases his opinion on the fact that there are no unions among the iron miners. They are well paid, and are enjoying a prosperity that is not at present care to jeopardize. A sympathetic strike on their part is out of the question.

One is not moving as freely from some of the Michigan ranges as is desired, but it is not due to the strike. The movement of ore to the furnaces of the East this year, he says, is a record breaker. "Minnesota this year, for the first time, Mr. Woodbridge says, will ship more ore than the States of Michigan and Wisconsin combined. The price paid for the ore in Duluth the closing of a deal by which the United States Steel corporation secured a fifteen-year lease on a \$300,000 building, to be erected by some of its officers, is the highest in the history of the world, but the biggest steamship operator.

Buy Louisiana Bonds. The purchase of \$75,000 of Louisiana state bonds recently authorized by the state board of investment was consummated yesterday. The price paid for the bonds, including premium, was \$22,224.61, two-thirds of which is paid from the permanent school fund and the remaining one-third from the state institutions fund. The bonds bear interest at 4 per cent, and run until 1914.

When a soap says: "Your money back if you want it,"

that soap is Fels-Naptha.

Fels & Co. makers, Philadelphia.

WIDOW USES SUIT

APPLICATION OF MRS. S. D. LORD FOR DOWER IS DENIED. IS AN INTERNATIONAL CASE. Lord Died in England, With Property in St. Paul, and Widow Was Dismissed With Her Allowance.

Judge Bazille, of the probate court, yesterday heard the petition of the widow of the late Samuel D. Lord, for leave to set aside the will and to reopen the estate, which was denied for the reason that the application was not made within the time prescribed by law, which would have been a nine-year-old girl.

Samuel D. Lord was for many years a resident of St. Paul, and before leaving for England, where he died, accumulated a large fortune by dealing in tax titles and real estate.

He left this country several years ago at an advanced age, and subsequently married in England, the result of the union being a nine-year-old girl. At the time of his death his will was probated both in this country and in England, and the widow, who was not satisfied with her allowance, sent Albert Gasquino, a British attorney, to St. Paul for the purpose, if possible, of reopening the estate, so that she could secure the wife's full dower or share of the estate, which would have amounted to one-third.

After hearing all the testimony in the case, Judge Bazille decided against her for the reason stated, the law being that applications to reopen an estate must be made within six months after the final decree or settlement.

WANT THE BOOKS OPENED.

Stockholders of New Year Mines Company Getting Anxious. The case of C. C. Bragg against George M. Nelson, secretary of the New Year Mines company, in which an application for a mandamus compelling the latter to open the books of the company, came before Judge Kelly yesterday in court last evening, on the application of a Miss Curcio to have them committed to the state school.

The latter informed Judge Bazille that the mother of the children had died a few years ago, and that she was practically to shift for themselves, the oldest child, a girl of ten years, acting as a mother, and the youngest, a child of five. The father of the children was in court, and he explained that he was conducting a saloon at a place where the owner had gone on a vacation, and that he was willing to pay for a suit of clothes, and for providing a suitable place could be found.

Judge Bazille continued the case for two days, and the court will be held to be made to see that the future welfare of the little ones is provided for.

MOTHERLESS TOTS IN COURT.

Application to Have Them Sent to State Home. A trio of bright little tots, the children of Emil Liebisch, who resides on Mendota street, were in the probate court last evening, on the application of a Miss Curcio to have them committed to the state school.

The father of the children was in court, and he explained that he was conducting a saloon at a place where the owner had gone on a vacation, and that he was willing to pay for a suit of clothes, and for providing a suitable place could be found.

Judge Bazille continued the case for two days, and the court will be held to be made to see that the future welfare of the little ones is provided for.

Nelson Asks for \$2,500.

Magnus Nelson has filed a claim against the city, growing out of a claim sustained by a fall on a sidewalk on Geranium street. The accident occurred last July, and he claims that his injuries are permanent. Nelson wants \$2,500.

BEDE ON POTATOES

J. ADAM THINKS THE TUBER IS A PAYING CROP.

Supt. Olson, Attorney General Douglas and the Pine City Humorist Put to Locate High School.

Among the arrivals at the Windsor hotel, last night, were Frank A. Weld, Moorhead; J. F. Millsaps, Winona; C. E. Cooper, Mankato; George E. Kleeberger, St. Cloud, all of whom are members of the library commission of the state public schools and presidents of the boards of trustees of the normal schools. They were in the city at this time, to attend a meeting of the commission, which will be held at the state capitol building, and the presidents of the normal schools they will be in the city for a few days.

The investigation proved very satisfactory to the officials, who are well pleased at the showing made by the schools. Suggestions were given as to improvements in the buildings and other cognate matters.

ADVOCATE GOOD ROADS

CONFERENCE TO BE HELD IN COUNCIL CHAMBER THIS AFTERNOON.

A good roads conference will be held in the council chamber this afternoon. Invitations were yesterday extended to the committee on streets of the two county bodies, city and county attorney and members of the board of county commissioners to be present.

The conference was called by Mayor Smith and is for the purpose of making an effort to secure for St. Paul participation in the \$50,000 that the commissioners will spend next year on roads and bridges. St. Paul Mayor Smith says, "The city is entitled to a share of the \$5 per cent of the taxes raised for the use of the county, and he thinks it only proper that a portion of the fund be spent on improving the roads where they connect with the city limits."

MAY BE ST. PAUL MAN

UNKNOWN MAN IS FOUND DEAD IN CHICAGO.

A special from Chicago last evening conveyed the information that the body of a man, with the skull fractured and a stab wound in the chest, was found lying in that city of the Chicago, Burlington & Quincy railroad tracks.

Among other effects in the pocket of the dead man, were several business cards of C. E. Harnisch, saloonkeeper at 40 Sibley street, this city, and a call at his place of business revealed the fact that he is still alive, and doing business as usual.

He was unable to throw any light as to the identity of the dead man, the only explanation being that he must have visited his saloon at some time, and taken the cards from a case on the counter.

EQUALIZE THE RATES

FIRE INSURANCE MEN ADOPT NEW SCHEDULE, INVOLVING 25 PER CENT INCREASE. BUSINESS HOUSES AFFECTED.

Revised Rates Do Not Apply to Dwellings, and Are Less in Some Cases Than Formerly. Mercantile firms which occupy old-fashioned buildings peculiarly susceptible to tests designed to equalize the fire will hereafter be compelled to pay higher insurance rates in accordance with a revised schedule adopted by companies all over the United States.

The increase ranges from 10 to 25 per cent, according to the construction and fire proof qualities of the buildings affected.

At the same time there has been a correspondingly reduction in the rates charged on firms which are housed in buildings constructed on modern principles and along the lines prescribed by the national board of fire underwriters.

G. W. La. Brande, local inspector for the board of fire underwriters, said yesterday that the move had been made for the purpose of equalizing risks. It was considered unfair to assess the same rate upon a merchant who occupied a modern building equipped with all reasonable precautions against the spread of a possible fire, as was charged a merchant in an old-fashioned building built many years ago, and with practically no precautions against the spread of a fire. It was accordingly determined to equalize the risk by adding to those who were in poorly protected buildings what was taken from those more favorably situated.

"It has been thought," said Mr. La Brande yesterday, "that our action is a reflection upon the fire department of the city, but the reverse is the case. The most old-fashioned building in the mercantile district receives precisely the same protection as does the most modern, but the same chance of saving the property doesn't exist in both instances. As a matter of fact, our reductions have in the aggregate been slightly in excess of the increases which we have imposed, and if the schedule of the fire department was not what it should be, we would certainly make no reductions at all. In no case has the rate been raised more than 25 per cent, while some of the reductions have amounted to as much as 33 1/3 per cent. The whole thing amounts to an equitable distribution of the rates charged on the total risks in the city, and the same thing has been done in every city in the Union."

"The new schedule took effect on the 27th of last month, and the fact that merchants recognize the justice of our move shows that it involves no undue discrimination."

It was rumored on the streets yesterday that the advance made had in some cases amounted to as much as 50 per cent, but this is a gross misapprehension to be absolutely false. The limit has been 25 per cent in this city, and in the majority of cases not more than 10 per cent.

On risks affecting private houses no change has been made, and the schedule previously in force applies provided for the differences existing in the absolute risk to fire to which they were exposed.

OHAGE'S LATEST IDEA

WILL PROMOTE HIS PUBLIC TOILET BUILDINGS SCHEME.

Public toilet buildings is the latest scheme to be taken up by Health Commissioner Ohage, but so far his requests for aid from the city council and the park and school boards, whose co-operation he desires, have fallen on deaf ears.

In the business section of the city he desires to erect three buildings, each fully equipped with toilet facilities, and the council has asked to set aside \$1,500 for their construction. From the park board and the school board he asks permission for the use of the grounds under their charge for sites where they might be located, but up to date the request has not been given.

The impression," said Mr. Ohage yesterday, "is that the city will not give a polite refusal by placing his communication on file. The council now has his request for money under consideration."

"The impression," said Mr. Ohage yesterday, "is that the city will not give a polite refusal by placing his communication on file. The council now has his request for money under consideration."

ACCIDENT WINS STRIKE

WORKMEN ON GREAT WESTERN BRIDGE WILL RETURN TO WORK.

A difficulty with the foreman and some dispute as to the scale of wages were responsible for the strike of the union structural iron workers employed on the repairs to the Chicago Great Western bridge last Tuesday. The men were out until yesterday afternoon, when an accident won them the point for which they were striking.

Owing to the substitution of inexperienced workmen, an iron beam weighing five tons was allowed to drop into the river, and the men were at once sent for. They agreed to return for 25 cents per hour and the discharge of a non-union workman, and these concessions were at once granted. The strikers will therefore be seen at work this morning.

LEHIGH FISHING CLUB.

One Gigantic Pike Captured as a Result of Great Effort.

One of the jolliest fishing parties of the season set out for the Lehigh river in most of the afternoon. The party consisted of approved fashion in a speedy little yacht.

It consisted of Messrs. A. A. Montebianchi, C. S. Johnson, A. A. Clark, Albert Ferris and Charles Hanson. The variety, quality and quantity of bait carried along was simply stunning and enough to gain possession of the critics in the "Father of Waters," but for once it failed. After

Slit Headquarters of the Northwest. GLOBE—3-9-1901

There is no sound more welcome to a merchant's ear than the buzz of business. It proves to him that he is proving worthy of public trust. The buzz of business keeps up in this great enlargement and alteration sale. A few Friday pointers:

Ticket Office, 400 Robert St. (HOTEL) Tel. NORTHWESTERN, MAIN 96. (BY AR) Tel. MISSISSIPPI VALLEY, 96.

IT WAS BEFORE THE DAY OF SAPOLIO. THEY USED TO SAY "WOMAN'S WORK IS NEVER DONE."

Two miles had been traversed the yacht hove-to and the party, armed with the most reductive smiles possible, cast their lines into the watery expanse. Presently, with a shout of triumph that could be distinctly heard at the Indian mounds, Mr. Montbrant landed a walleye of no mean caliber. Each member then took a mental snapshot of the hole from whence emanated the pike and tried to cajole or wheedle others of the fishy tribe to come forth, but none came.

Later in the day the pike was served with due pomp and ceremony, all homage being paid him and his hefty captor.
