CHICAGO, Oct. 12 .- Scarcity of offerfines and a fair outside demand for wheat gave an upward turn to the markets today. December wheat closed a shade higher; December corn %c down; December oats a shade lower and provisions 10c to 1712c higher.

At the outset the wheat pit felt the de-pressing influence of d sappointing cables. The advance here yesterday had met with no response and December opened 1/10 to 1/10% c lower at 69% c to 69% 065% c. offerings were liberal at the start, but the actual selling was only on a small scale and of a nature that indicated a desire upon the part of buyers to depress the market with a view to buying again. Commission houses began to buy and a report of a good demand from the Southtraders also were buyers, but toward the end of the short session profit-taking

ood bu. Australian shipments for the week were only \$0,000 bu, against 384,000 bu last year.

Corn lost the last part of the bullish influence of the official crop report, which advanced prices yesterday and on indifferent cables December opened 1/604c lower. Trade was dull at the start and offerings were rather liberal, which tended toward a further decline, until arrested by the quick bulge in wheat. Corn began to improve at once, and December soon sold at 574c. On the small reactions there was buying for the outside account and on the hard spots professionals sold. There seemed to be considerable short interest to cover, but the feeling prevailed that the rise in prices was not natural, and December sagged rapidly at the end, closing weak at %c lower at 554c. Receipts were 250 cars.

A range of 4/c in December oats indicated the dull and narrow nature of the market. Trading was somewhat small, with a trifling response to the action of other grains. December closed a shade down at 354c. Receipts, 178 cars.

Provisions were higher from the start, not so much from any particular demand, as from the cessation of various outside liquidation that has been depressing prices for over a week. Hogs were scarce and January pork opened 5c higher at \$15.10 to \$15.15, selling to \$15.30, and closed 10c higher at \$15.225c. January lard closed 10c higher at \$15.25c. January lard closed 10c higher at \$15.25c. January lard closed 10c higher at \$15.25c. January lard

#### MINNEAPOLIS.

MINNEAPOLIS.

MINNEAPOLIS, Oct. 12.—Wheat was very firm today, and midway in the session was up ½c from the opening, touching 67%,067%c for December. Towards the close free selling developed and the market sagged again, December closing at 67%,067%c, and May wheat at 70%.C. Some show of weakness came out at the start, on the indifferent foreign markets, good receipts here and a large increase in local stocks. This was soon lost, however, and sentiment turned, a good many shorts deciding to take in their lines over Sunday. On corn the foreign markets failed to show any response to our attempt at a higher range, and there was no inspiration in wheat from the coarse grains.

Minneapolis received 540 cars, against 416 last year, and Duluth 164, against 70. Local stocks increased 1,329,350 bu.for the week, making the present total 8,028,877 bu.

Cash wheat went at firm prices early

Cash wheat went at firm prices early, but was easier towards the close. The bulk of the good wheat was cleaned up, but some dragging was noted again in the very poor lots. No. 1 northern spot or to arrive found ready sale; No. 2 northern sold at 65% 666% c, a good part at the latter figure. No. 3 wheat brought 53% 664% c. Rejected and no grade ranged from 58% c to 62c.

Following was the range of prices today:

ADVANCES, REGISTERED, IN FRI-DAY'S BULGE ARE PRACTICAL-LY ALL WIPED OUT

A PER OF HEAVY REALIZING MOVEMENT

Support From Brokers Representing the Biggest Interest in the Street Fails to Cheek the Decline.

Call money, New York 1127 a 3734

NEW YORK, Oct. 12.—The cause of the relapse of prices in today's stock market was not altogether clear, but the same was true of the sudden advance of yesterday, and the day betore. Distrust of that movement and incredulity as to the rumors that were set affoat to account for it, because of some intrinsic grounds of improbability seemed to be the reason for today's reaction. The same brokers commonly supposed to act for the Standard, Morgan, Harriman and Gould interests were active in buying and bidding up stocks today as they were yesterday, St. Paul especially being lifted again and again by main force in the neighborhood of 167, but the last price was 1644%, only a shade above the lowest.

The course of that stock formed an application. Consignments and correspondence solicited. Market reports furnished on application. We do a strictly commission business. No live stock bought or sold on our own account.

Chicago, Ind. & Louis. 100 4444 4134 4144 was 164%, only a shade above the lowest. The course of that stock formed an epitome of the whole market. The central and southern transcontinental stocks were nearest to it in point of activity, but the advance showed a tendency to spread beyond yesterday's narrower limits until the enormous featibles forced prices back. Prices generally show losses on the day running from 1 to 1% in the leaders, and from that up to 3% in St. Paul and the local traction stocks, which were notably weak throughout. which were notably weak throughout. The decreased loan item of the banks failed to show the full effect of the repayment during the week of some \$15,000,000 of New York city revenue warrants and the supposition was therefore made that foreign bankers continue their borrowing in the local market to repay foreign borrowings. The disturbance in the Paris money market points to the likeli-hood of a continuance of this process. The market closed weak at the lowest

REVIEW OF THE WEEK There has been some upward action in the stock market during the week, folthe stock market during the week, following the prolonging period of depression. The pressure of liquidation was distinctly relaxed during the early days of the week, but there was manifest hesitation about their was manifest hesitation about their upthe movement for the advance and even the uncovered bears were not apparently in great haste to cover their short contracts. For several days the market wavered before a pronounced advance drove the hears to cover. The opposing arguments of the speculative element now represent the belief on the one hand that the depression in the stock market has been during the contracts. Specialistic element and remember that belief on the one hand flint the depression
is the stock market has beging repeated by the stock market has beging respect to the stock market has beging respect to the stock market has beging respect to the stock market has beging as the stock market has begin as the stock market has beging as the stock market has beging as the stock market has beging as the stock market has been stoc moving, and this may involve a considerable further demand for currency from the South, with the possibility of a resulting pressure on the exchange market that may bring gold. Nothing in the recent past has so clearly demonstrated the extent to which capital was embarked in the enterprises of the boom period of this year as the recent course of the foreign exchange market. The employ ments of hundreds of millions of dollars by capitalists and syndicates in the furtherance of community of sincrest projects among the railroads and the formation of the United States Steel corporation was well known thathe public, and there were self-congratualistics on the unruffled composure of the money market in the face of the demands put upon it. It, the summer events indicate that not only our own money market, but those of pretty much the whole world besides were drawn upon to provide the credits for the gigantic undertakings of American syndicates. These foreign borrowings have apparently involved the sale of bankers' exchange bills of distant maturities, which were left uncovered, relying upon autumn outward movement of merchandise to replemble the supply of exchange and enable them to cover. The belated movement of cotion, the decrease of corporation was the proportion and copper, have kept down the supply of exchange and enable them to cover. The belated movement of cotion, the decrease of corporation was the supply of exchange and enable them to cover. The belated movement of cotion, the decrease of corporation and the falling off in manufactured products, especially, iron and copper, have kept down the supply of exchange and enable them to cover. The belated movement of cotion, the decrease of corporation was the supply of exchange and enable them to cover. The belated movement of cotion, the decrease of corporation with the supply of exchange and enable them to cover. The belated movement of cotion, the decrease of corporation with the supply of exchange and enable them to cover. The belated movement of cotion, the

merchandise to replenish the supply of exchange and enable them to cover. The belated movement of cotion, the decrease of corn export and the falling off in manufactured products, especially iron and copper, have kept down the supply of exchange and have made this repayment of foreign loans especially effective in sustaining the exchange market and keeping it away from the gold import point. Moreover, the repayment of these foreign loans has been followed to a large extent by reborrowing in this market, so that the loan account of the New York banks has been maintained, in spite of the extensive liquidation in the stockholders. These are symptoms of extensive lock-up of capital not to be ignored, and they bring forward the problem of how far the year's great financial projects will warrant the sangulne expectations of them during the speculative excitement of last year. The panic in May caused by the Northern Pacific corner and the assassination of President McKinley upset the calculations of their promoters and their original prosperous efforts to distribute the crop of securities which were issued to reimburse the syndicates for their original prosperous efforts to distribution. With the additional outlay made necessary by meas affective processing the plane processing the plane

We give special attention to out-of-town investment and speculative accounts. Our privite wires and our connections with all of the principal exchanges enable us to give prompt and accurate service. Correspondence invited.

BANK STATEMENT.

NEW YORK, Oct. 12—The statement of the associated banks for the week ending today shows: Loans 87,900,700, decrease 2,657,500; deposits \$942,688,900, decrease \$864,200; circulation \$30,983,900, increase \$864,200; circulation \$30,983,900, increase \$365,700; legal tenders \$70,603,500, decrease, \$440,200; specie \$102,600,300, increase \$2,147,300; reserve \$253,155,400, increase \$1,707,100; reserve required \$225,672,225, decrease \$216,605; surplus \$17,483,175, increase \$1,923,150. The Financier says: The statement was again made on rising averages for cash, as has been the case in recent weeks. The subtreasury paid \$409,000 on Friday for Yukon gold, and there were other payments for this office, which materially added to the banks' cash at the end of the week. More Yukon gold is now in process of transfer hither from the Pacific coast. This will be received early in the current week, and there are about \$600,000 of maturing bonds which have been accepted by che secretary of the treasury, which bonds will arrive by the incoming steamers. It would seem probable, therefore, that the banks will begin the new week with a supply of cash considerably greater than that shown by the statement. The payments of municipal taxes last week were about \$25,000,000, and this amount of tax warrants was at once liquidated. The fact that the loan item did not fully reflect this large liquidation would seem to show that the greater part of the money realized through payment of the warrants was immediately reloaned. This would indicate a disposition on the part of the banks to expand loans, which they would seem to be justified in doing, considering the comparatively large surplus reserve now being carried. It is noteworthy that the scale of operations of the subtreasury last week resulted in a loss to the banks of \$2,075,700. These excess receipts over disbursements doubtless will increase, tending ultimately to an important decline of bank reserves. It is unlikely, however, for the reasons above noted, that this absorp
