COMMISSION DEFIED

ARE THE "IRON" ROADS "INTERSTATE" WITHIN THE MEANING OF THE LAW?

HUGO IS NOT A CANDIDATE

Northwest Presbyterians in Session at Bible Conference and Sunday School Institute.

Special to The Globe.

DULUTH, Minn., Nov. 15.—The report that the Iron Range and Duluth, Missabe & Northern railroads have definitely refused to file rates on ore shipments to Two Harbors, as ordered by the Interstate Commerce commission, is premature, according to a local official of the company.

The announcement by Mayor Hugo that he would not be a candidate for reelection has had the effect of stimulating interest in municipal politics, and all kinds of speculations are made as to candidates for the Republican nomination.

The only announced candidate is Capt. D. E. Stevens, a tug owner, but it is doubtful if he is strong enough to capture the vote upon the character of the aspirants.

It is possible that Watson S. Moore, a young grain commission dealer, may be brought forward with a few weeks to make the fight. He is a Republican, but was elected as an independent business men's candidate for alderman last year over both Republican and Democratic nominees. He has considerable opposition from partisan Republicans should he seek that nomination. Notwithstanding this, however, he will be an important factor in the contest, as he has decided to enter the lists. Former Mayor Henry Truesdell still appears to be in the lead as the Democratic choice.

Prominent Presbyterians from various parts of Minnesota, North Dakota, Wisconsin and Iowa are in the city today in attendance at the fourth annual Bible conference and Sabbath school institute of the Duluth Presbytery.

The session opened this (Friday) afternoon at the First church, with Rev. F. R. Sulzer, of Minneapolis, presiding, and will continue until Sunday night.

The program is a long and interesting one, including addresses, song services and discussions. Among the well known divines present from outside the city are: Dr. George W. H. Wood, of Chicago; Rev. S. B. Ferguson, of Marion, Iowa; Rev. Dr. Wallace and Prof. Johnson, of Macalester college, St. Paul; Rev. T. M. Finley, Spencer, Wis.

THE HEAVENS FALL

Watchers at Northfield Are Rewarded by Brilliant Display.

NORTHFIELD, Minn., Nov. 15.—The shower of Leonid meteors which has been so eagerly watched for by astronomers for the past two years, arrived on schedule this morning at about 12 o'clock. The shower was very satisfactory to observers, although not equalling that which occurred thirty-three years ago. The display, however, was very brilliant and lasted from midnight until daybreak.

Dr. Wilson, who has in charge the photographic work of Goodsell observatory, exposed several good photographs of the bright meteors. One of the most brilliant shot across the sky which approached the minus second magnitude. It lighted up the heavens and left behind it a trail which lasted for fully three minutes. At 4:37 a. m. a Leonid passed across the heavens fully as brilliant as the one mentioned above, leaving a trail which remained six minutes. At 5:32 another equally as brilliant appeared, leaving a trail which remained visible for fully twenty-two minutes.

The radiant of the shower was in Leo Major, the greater number of meteors shooting toward the northeast. Many fell from the radiant, however, some being fully 90 degrees from Leo. As a whole, the shower was very satisfactory to the observers. Doctors Payne and Wilson feel that the meteoric predictions made and the labor which they and their assistants expended.

The meteoric platted will be carefully compared and compiled, and will doubtless be given to the public in the form of a scientific work, at an early date.

A LEAK IN THE RIVER.

The Missouri Thought to Be Flowing Into Underground Passages.

BISMARCK, N. D., Nov. 15.—River men and civil engineers who have watched the course of the Missouri river for some time, and who are endeavoring to account for the present extremely low stage of water in the river, are inclined to the opinion that some subterranean waste of the waters that formerly were drained by the Missouri river is gradually lessening the volume of water in the river. What was once a mighty stream is gradually dwindling, until at the present time the river is so low that it has much the appearance in places of a sluggish creek, with only a narrow stream of water between its banks. The present low stage of water in the river is almost unprecedented at this season of the year.

It has been suggested that the opening of artesian wells through the Dakotas and the great combined flow of these wells, is the cause of the lessened volume of water in the river.

Stillwater News

The selection of a site for the new public library seems to be quite a matter of contention between members of the committee appointed to select a site and certain members of the city council. The committee favor purchasing a site independent of any other property owned by the city, while one or two members of the council favor building the library on a part of the city hall lot. They argue that this is the most desirable site for a library to the city. A meeting will be held again next Monday night, when the question of a site will probably be determined.

Mr. Haynes, of New York, Says That Is What Roosevelt Wants.

CHICAGO, Nov. 15.—D. O. Haynes, of New York, who was in Chicago tonight, said in an interview that the published reports of his remarks last Wednesday evening in St. Paul, and his views on the Roosevelt revision of the tariff legislation, were incorrect. "Of course, I did not say that the president gave the positive assurance that he would make no reference to revision of the tariff in his coming message," said Mr. Haynes. "I called upon the president some four weeks ago to ask him to make some reference in his message, if possible, to a recommendation for a permanent tariff commission. The president stated that he could not include this subject in his message without discussing it with leading members of congress, and because of the political situation he was standing under a mass of iron restraints, and he was not in sympathy with any movement tending to put the revision of the tariff on a more scientific basis, and I expressed my views on the subject in my address before the Home Market club in Boston last April."

INFLUENCE CUT OUT

APPOINTMENTS TO BRIGADIER GENERALSHIP NOT GOING TO SOCIAL PETS

WASHINGTON, Nov. 15.—It was announced at the war department today that the names of the officers to fill the vacancies in the grade of brigadier general will not be announced until congress meets, as it is not deemed desirable to make interim appointments. In addition to this statement, and in view of the great amount of business brought to the department, it has been deemed proper to make the following official declaration: "The secretary of war and president have had informal discussions on army matters on several occasions, and it is understood that the president has expressed himself most positively on the use of political and social influence by officers for the purpose of obtaining change of stations, leave of absence, promotions of orders, etc. Of course, it is understood that officers often deem it necessary to have attention called to their cases, and men as well as officers, but the president has not hesitated to inform senators and others who have applied to him that his office will improve his chances by sending his friends to annoy the president in his behalf. On the contrary, the effect which will be produced will probably be directly opposite to that which the candidate hopes for."

The public endorsement of scores of St. Paul residents has rendered invaluable service to the community. Read what this citizen says: "Mr. J. L. I learned about Doan's Kidney Pills and procured them at F. M. Parker's drug store, 364 Wabasha street, opposite the postoffice. GATHMAN'S GUN FAILED

DIFFERENCE OF OPINION BETWEEN INVENTOR AND OFFICERS.

NEW YORK, Nov. 15.—The test of the Gathman gun and shell took place this afternoon at the army proving ground on Sandy Hook, and resulted in a failure. The shell did no material damage to the target. The failure of the inventor's theory is ascribed by him to an imperfect detonation of the fuse in the interior of the shell. The army officers, however, claim that they have found convincing proof to the contrary, and say that everything in connection with the test was as perfect as it was possible to make it, in accordance with the inventor's ideas. The board has decided to grant a second trial, to which the inventor is entitled, tomorrow morning. The shell for tomorrow's test will be overhauled in the presence of Mr. Gathman for the purpose of guarding against imperfections.

He thinks he lives, but he's a dead one.

No person is really alive whose liver is dead. During the winter most people spend nearly all their time in warm, stuffy houses or offices or workshops. Many don't get as much exercise as they ought, and everybody knows that people gain weight in winter. As a rule it is not sound weight, but means a lot of fatty fat and useless, rotting matter staying in the body where it ought to be driven out. But the liver is over-burdened, deadened—stops work. There you are, with a dead liver, and right now is the time for resurrection. Wake up the dead! Get all the flit out of your system, and get ready for the winter. Buy a bottle of Cascarella's, clear body, brain free from bile. Force is dangerous and destructive unless used in a gentle, persuasive way, and the right plan is to give new strength to the muscular walls of the bowels, and stir up the liver to new life and work with CASCARELL'S, the great system cleaner, disinfectant and bowel tonic.
