WASHINGTON, D. C., April 29.—The weather bureau's weekly summary of crop conditions is as follows: Much needed and generally abundant rainfall during the early part of the season, upper Mississippi and lower Ohio valleys, but droughty conditions have continued in the upper Ohio valley, middle Atlantic states and over the southern Rocky mountain slope. Rain is now very generally needed over the greater part of the Southern states, more particularly in the eastern and western districts. Spring Wheat Nearly In.

Oats have made a favorable growth in the Southern states and are generally up in Missouri and Illinois. Poor stands are reported in the northern part of the central valleys. Grass conditions backward, but considerable improvement is reported from portions of the central valleys.

It is said that seeding in Polk county is not much later this year than usual.

More Rains in North Dakota.

GRAND FORKS, N. D., April 29.—The greater portion of the Red river valley was visited yesterday afternoon with a soaking rain. The rain which fell in the eastern half of the state, it rained heavily at the boundary and between there and Winnipeg, stopping all seeding operations.

Rain, Hail, Lightning.

MAYVILLE, N. D., April 29.—The weather is again very discouraging to the farmers.
