

SUMMER GIRLS PROTEST

DEMAND THAT THE WEATHERMAN PROVIDE JUNE TEMPERATURE

Position Is Logically Taken That Summer Girl's Mission Is Unavailing Without Appropriate Atmosphere—Blue Lips and Red Noses Do Not Meet Requirements at This Season.

Really, Mr. Weatherman, we think it time to protest. We are summer girls and we demand our day. Have you mislaid your spectacles and taken down the wrong volume in the weather book series? Or are you contemplating a reorganization of the seasons? In either case, Mr. Weatherman, we enter our protest.

CHICKEN IN JELLY. SANDWICHES.

The menu which pleases grown-up people is not always suitable for childish digestions. One mother prepared for her little daughter's birthday luncheon, given to a few school friends, some very attractive dishes that satisfied their healthy young appetites. Instead of chicken salad, which older people might expect, and would enjoy, the chicken was moulded in small forms in jelly.

For chicken in jelly steam a fowl two or three hours, according to its age, and when tender chop some of both dark and light meat. This stock is added to stiffen it. Lettuce sandwiches were served with the jellied chicken.

mer girl without summer, please? One precious month—the very nicest month of all—has sped, but you are deliberately allowing summer to spoon with spring.

SOCIAL.

Miss Josephine Bowlin, of Summit avenue, gave a luncheon yesterday afternoon in honor of her guest, Miss Alma Seeps, of Pittsburg, Pa. Covers were laid for ten. Miss Bowlin will also give an informal dancing party tomorrow evening for Miss Seeps.

Miss Marie Toomey entertained the members of her bridal party last evening at dinner.

Mrs. Frank B. Doran and Mrs. John Dale will give a reception this afternoon to introduce their daughters, Miss Inez Dale and Miss Sisle Doran, at Mrs. Doran's home on East Congress street.

The marriage of Miss Beatrice Munns, daughter of Mr. and Mrs. C. A. Munns, of Minneapolis, and Charles W. Holmes, son of Rev. and Mrs. Charles Holmes, of St. Paul, took place last night at 10 o'clock at Holy Trinity church in Minneapolis. Bishop Edsall, assisted by Rev. S. B. Purves and Rev. Charles Holmes, performed the ceremony.

The marriage of Dr. Edward C. Boxell and Miss Mary Elizabeth Hess, daughter of Mr. and Mrs. S. L. Hess, of Carroll street, took place Wednesday at Atlanta, Ga. Dr. and Mrs. Boxell will return to St. Paul to reside in about a fortnight.

Mrs. A. W. Monroe, of Columbia street, gave a luncheon Wednesday. Covers were laid for twelve. The center piece was of American Beauty roses. Mrs. W. T. Mabor and Miss Mollie Cavanaugh assisted the hostess.

CLUBS AND CHARITIES.

The Ladies' Aid society of the Clinton Avenue M. E. church will meet this

afternoon at the home of Mrs. Gran, on East Isabel street.

An entertainment was given last night in Woodruff hall in Merriam park in which 100 children took part. The programme included a Mother Goose entertainment and a number of songs and drills. Mrs. D. R. Elder had charge of the programme and drilled the participants.

The women of St. Joseph's Catholic church will give a lawn social this evening on the Mitchell and Hodgson grounds on Selby avenue and Mackubin streets.

The parishioners of the First Christian church will give a social this evening at the home of Mrs. Leslie Gadd, of St. Louis street.

The Ladies' Guild of Epiphany Mission gave a silver tea yesterday afternoon at the home of Mrs. Babbidge, of Fry street.

Mrs. Oliver Crosby and Mrs. D. B. Newcomb gave a silver tea yesterday

with the parted hair and away with the stiff front. The pompadour is the thing and the hair should be dressed low. If built on the top there should not be the standing puff over the forehead. Hairer should the head be symmetrical as possible.

A woman consulted her hairdresser to get the new round coiffure. "It will be necessary, madame," said he, "to cut off your hair. It must be over three fingers in length. The front I will roll back on a pompadour. The back I will wave and bring up; and on top, where front and back meet, I will place a bow.

"For the street, I will keep the hair in place with combs; in the house a perky little bow will do, or, if you prefer, I can use the large flat bow on the top of the head.

"The finishing is all a question of taste, but the most important thing is the cutting of the hair. One can do nothing with the hair if it is long.

To build the coiffure in an ideal way it is necessary to wave it from the very roots. The front is then carried back and the back is loosely rolled and turned up. A very few hairs are left over the forehead. "Unless the hair is well shampooed to make it very fluffy this style is too trying. But with a little hair cream in place. This is called the Berhardt type, and to make it very Bernhardtian the hair must be pulled down to the eyes in a low forehead fringe."

Equal parts of aluminum and salt, or even salt alone, placed on a piece of cotton wool and inserted in the hollow of an aching tooth will often give relief when other means have failed.

The eyelashes can be improved by touching them with castor oil. Brush the eyebrows with a camel's hair brush so as to keep them pretty and in place. Tea mixed with a few drops of alcohol will darken them.

Silver-back hair brushes must not be run into water, as such treatment destroys them. To clean them rub the bristles well in four or five drops of alcohol to remove all the hair. Afterward rub the back well with a leather to polish it.

Large ripe cucumbers, cut in slices, applied to the face of opinion as to the healthfulness of cucumbers, its devotees declare it has no end and so the cucumber goes on endlessly. The belief that cucumber is a disinfectant has long been popular here. As long ago as 1838, Dr. Paul Tassinari, of Pisa, subjected the germ of various deadly diseases, such as cholera, typhoid, and typhus, to the action of dense clouds of impregnated tobacco smoke during periods of 100 to 150 hours, and he found that the germs died in most cases, and especially when large cigars have been employed as generators of the smoke.

It is recorded that during the great plague which was told to smoke in the school rooms. The local authorities borrowed from the custom of the buriers of the dead, and in the charge of the school children, they were ordered to read in "A Brief Abstract of the Virtues of the American Tobacco Plant," published in 1834 at St. Louis, Mo. The school children used tobacco as a deodorizer. "Little thinking that what they used for momentary relief would produce a constant plague. When the plague was happily stayed, the victims of tobacco began to die. The school children, who had been smoking, were found to be the most numerous of the victims who died. It is, therefore, a means, not an end. M. Le Roux, who recently visited the chambers of the sick, attended the funerals of cart loads of the victims, and he found that the infection was not well off, is such a change of ideas will develop courage in men to take wives without money and willingness in young women to forego ease and luxury.

Then sailed away across the sea. To captivate the heart of a girl, he has, by the nature of folklore. The medical man attached to Bordeaux state that the tobacco plant is a veritable blessing to a damp and foggy town. "The plant and ammoniac, shortly before the outbreak of cholera, were used in the preparation of medicinal cordials, and it is interesting to note that the plant which preserves the name and fame of his order.

Chartreuse is named after the original Carthusian monastery founded during the eleventh century in a wild and romantic valley forming a portion of the French department of Isere. The liqueur is distilled from various herbs, which are supposed to possess peculiar aromatic and stimulating qualities.

Curacao received trade description from one of the Dutch West Indies, where are grown the oranges from which the liqueur is made. The orange peel, after being carefully dried, is macerated with water and alcohol, and the mixture is then distilled. When taken from the still it is sweetened with sugar, and a little more of the palatable little liqueur is frequently added. These who have made the experiment state that a pleasant imitation of curacao can be prepared from the fresh peel of bitter oranges and white rum.

Maraschino is distilled from cherries bruised, both wild and cultivated kinds of fruit being used.

Kirschwasser is gradually making for itself a name here as a choice liqueur. It is obtained by a distillation from cherry stones. The cherries are gathered when quite ripe and, having been deprived of the stalks, are thrown into a wooden vessel, but so carefully that stones are not broken. In this condition they are left to ferment, as soon as fermentation has begun the materials are stirred two or three times each day. Subsequently the stones of the cherries are broken, the kernels taken out, bruised and thrown in with the fruit.

Kummel derives its name from the German name of the herb cummin, with which it is flavored, though caraway seeds are also used for the same purpose. Aniseed cordial is not a distilled liqueur, but is prepared by flavoring and sweet fennel seed with aniseed, coriander and sweet fennel seed.

Clove cordial is made from spirit flavoured with cloves which have been brewed.

THE MAKER.

God and I in space alone, And nobody else in view. "And where are the people, oh, God?" I said. "The earth, below and the sky overhead, And the dead whom once I knew?"

"That was a dream," God smiled and said: "A dream that seemed to be true. There was no earth, and no sky overhead; There was only Myself—in you."

"Why do I feel no fear?" I asked, "Meeting you here this way. For I have sinned, I know full well, And is this heaven, and is there hell? And is this judgment day?"

"Nay, those were but dreams," the great God said; "Dreams that have ceased to be. There are no such things as fear and sin; There is no you—you never have been;—There is nothing at all but Me!"

TOBACCO AND ITS USES. Many Are the Traditions Connected With Weed's Hygienic Qualities.

Probably as long as the world lasts there will be different opinions as to the healthfulness of tobacco, its devotees declare it has no end and so the cucumber goes on endlessly. The belief that cucumber is a disinfectant has long been popular here. As long ago as 1838, Dr. Paul Tassinari, of Pisa, subjected the germ of various deadly diseases, such as cholera, typhoid, and typhus, to the action of dense clouds of impregnated tobacco smoke during periods of 100 to 150 hours, and he found that the germs died in most cases, and especially when large cigars have been employed as generators of the smoke.

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his personal supervision since its infancy. All Counterfeits, Imitations, and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS Bears the Signature of The Kind You Have Always Bought In Use For Over 30 Years.

THE CENTAUR COMPANY, 27 N. MURRAY STREET, NEW YORK CITY.

ed. Color is imparted by the addition of a small quantity of saffron. Peppermint, a common form of liqueur, usually consists of ordinary sweetened water, flavored with the essential oil of peppermint, which is previously rubbed up with refined sugar.—Chicago Chronicle.

Staked Him and Lost. It is told of ex-Gov. Hogg, of Texas, that he had a favorite waiter in a Washington hotel, and always gave the black a dollar after eating. He missed Sam from behind him one evening at dinner, which was served by a strange negro. As Hogg pushed back his chair, inquired the chef for the man, and reached into his pocket for a coin, he asked the waiter: "Where's Sam?"

"Sam's done los' yo', sah." "Lost me?" said Hogg, bewildered. "Yes, sah. He's done los' yo' money, and pokah las' night. Sez was a-losin', and finally went broke. Den he says to me he 'us' bet yo' against two-dollahs' worth of chips, sah; an' Sam—well, Sam 'us' done los' yo', Mistah Hogg."—Philadelphia Times.

Peaceable Spirit Wins. "How did Crimmon Gulch come to favor Pink-eye Perkins for senator?" asked the

physician. "He doesn't represent the aggressive spirit of this section of country." "No," answered Bronco Bob, "but we didn't want Crimmon Gulch to get a bad reputation before the world. We wanted to keep it peaceable and proper, and Crimmon was about the only man we could trust not to get mad an' shoot if his truth an' victory was assailed in words of one an' two syllables."—Washington Star.

Wyoming Too Unanimous. During the session of the senate on Saturday night the only Republicans present after 9-30 were Senators Clark and Warren, Wyoming, and Senator Gallinger, of New Hampshire, who was in the chair.

Senator Clark looked at Warren and then walked over and said: "Warren, the state of Wyoming is altogether too unanimous. I am going home."—New York World.

Mixed, but True. Dennis—"Tis an' early bur-d get's thur-rin, Mistah Casey." Casey—"Tis thot. If ye wa-ant to keep ye-arse let wath'er these days, ye can-let th' grass grow an' our feet, Mistah Dennis."—Detroit Free Press.

Honest Strategy Friday night simply blazed forth heat, but Cleve and a crowd of young folks danced as merrily as though Jack Frost were in the air.

Harding noted a wondrous sparkle in Cleve's eyes as she and Roy swung around the room and looked sadly disgruntled as he joined Mrs. Karl.

"This is our dance," he said listlessly. "Go change your collar," was the answer, "and put some talcum on our necks. Then we will sit under the tree—sit, not walk."

When he returned, he asked curiously: "Where did you learn so much wad-m'?" "I was married ten years, and said, carelessly, she gazed at him contentedly as he tilted back against a chair, and silently smoked a cigar. The bright moonlight fell upon him, tall, broad, handsome, he yet looked age.

"You saved my life," he said, laughingly, as he entered the room. "As he came for their next waltz she shook her head and laughed. "Come," said he, "We'll risk one turn."

In the weeks that followed he found himself in a tumult of thought that made him abstracted and erratic. The day before they were to leave the entire party went for a row down the bay.

Mrs. Karl smiling and picturesque, good-bye. A couple of hours later Mrs. Karl saw Harding jump from a rickety buggy and come crawling toward her. "Where are the others?" she cried, frightened.

"At Roger's Point, dancing," he answered, seating himself. "Well," she asked as he did not explain, "but brought you back to me on your. Her eyes still questioned. "For the last week I couldn't find a minute to talk to you, Lorene, and today I got desperate. Only in the past month have I found you are the dearest woman in the world. Now I intend to make you love me."

"But if you cannot?" she said in a low tone. "Must" impetuously. "I must jog along with you dear, or else—no, there can be no else!" "It's all done," she murmured. "I've loved you for eleven years, and today I love you more than ever before."

A laugh, a daring something in her eyes, made him suddenly understand. "You platter," he cried, "you platter." "Yes," she whispered, joining in his happy laugh. "I did!"

Confirmation of Assessment for Warden Sitewalks, Estimate No. 7, Season of 1901.

Office of the Board of Public Works, City of St. Paul, Minn., June 25, 1902. The assessment of benefits, costs and expenses arising from constructing, relaying and repairing warden sidewalks, Estimate No. 7, under contract of James Forrestal Co., during the season of 1901, as provided by law, in the City of St. Paul, Minnesota, having been completed by the Board of Public Works, in and for said city, said Board will meet at their office in said city, at 2 p. m., on the seventh day of July, A. D. 1902, to hear objections (if any) to said assessment at which time and place, unless sufficient cause is shown to the contrary, said assessment will be confirmed by said Board.
