ANOTHER NEW TRAIN

GREAT NORTHERN IMPROVES ITS SERVICE ON THE DAKOTA DIVISION

BIG RUSH OF BUSINESS MAKES MOVE NECESSARY

Great Increase in Population of North Dakota Gives the Road Much Additional Traffic—New Passenger to Run Daily Between Grand Forks and Hannah, N. D.

Owing to the great increase in passenger business in North Dakota the Great Northern found it necessary to put on additional train service in order to accommodate their patrons.

The new train will leave Grand Forks at 8:35 o'clock in the morning, arriving at Larimore at 9:35, running through to Hannah, N. D., arriving there at 1:15 p. m.

This is the second additional passenger train that the Great Northern has placed in service on its Dakota division this year, on account of the wonderful growth and development of North Dakota, and at the present time they are operating eight passenger trains a day, four in each direction, over various parts of the North Dakota main line.

The Great Northern new night train between St. Paul, Minneapolis and Sioux City makes its first run tonight. This train also is necessary on account of the increased passenger travel in southwestern Minnesota, Northern Iowa and South Dakota, and will prove a valuable feeder to the Twin Cities.

WILL BUILD FOUR FAST SHIPS.

Sir Thomas Shaughnessy Discusses New Combine.

MONTREAL, July 26.—Discussing the Canadian Pacific railway tender for the fast Atlantic steamship service to be subsidized by the British and Canadian governments to the extent of \$1,500,000 per annum, Sir Thomas Shaughnessy, the president of the company, stated that the plans contemplated the construction of four twenty-knot passenger steamers, and ten or eleven 10,000-ton cargo boats with a speed of fifteen knots.

LONDON, July 26.—The Westminster Gazette this afternoon, discussing the new Canadian Pacific railway service, which will be placed on a regular basis, will unquestionably be carried out, says the paper.

While the new vessels now proposed will be running within two years, the ultimate scheme involves establishing a line and thoroughly modern port, whose location is yet undetermined, eliminating the St. Lawrence passage and shortening the voyage materially.

Southern Roads Consolidate. Seaboard Air Line Buys the South & Western Railway.

BALTIMORE, Md., July 26.—It is announced here that the Seaboard Air Line is to be made with the Southern Railway. The latter is a new company under which two or more roads will be consolidated.

AND YOU

QUEER ANTICS IN OATS

THEY SLUMP OVER SIXTEEN CENTS AND RALLY TWELVE CENTS

But, as usual, the Trading is Not at All Heavy—Numerous Rumors about Patents at the Bottom of the Market—Wheat, Corn and Provisions All Lower.

CHICAGO, July 26.—Wild and jagged fluctuations in new July oats held speculators on edge all day. The market spread in twenty minutes the cornered option slumped 16c and in as many more recovered to 12c. The price was held by a rumor that the Fatten deal in July options had been settled, and from the almost immediate contradiction of the same story.

Blackboard figures of the day's work in the oats market were sensational, yet the actual business in the pit was nothing unusual. Excitement naturally ran high and the center of attraction to the board following. At the start there was some weakness in both July and September, but this was quickly corrected by increased receipts, fair weather, or at least weather fairer than the general conditions of the crop.

It took only 25,000 bu. to knock July down 16c and in fluctuations of 2c and 3c it came to a close at 12c. The slump came as a surprise to all the pit crowd. Some had it that James Patten had settled his contracts of about 1,500,000 bu. with the shorts at something near 10c. Others said that cash houses had big consignments due here next week and were selling at a profit.

It is conceded that the big shorts did not settle anything in the open market. The loss has been nearly all in the shorts covered. Mr. Patten said he had made no settlements. Natural consequence of the rumor was a good break in prices once the July deal was out of the way.

Wheat ruled weak. Light contract trading higher cables and raised in Nebraska harvest had a temporary bracing effect. Large receipts in the bushels and a weak market closing out a good long line of July start caused a big drop in that option.
