Brewed in a plant as clean as the cleanest home kitchen—always open to your inspection—58,971 visitors last year.

## HOME FOR CHILDREN

NEW INSTITUTION, COSTING \$25,000 TO BE BUILT AT ST. ANTHONY PARK AT ONCE

IS TO BE A MODEL OF FIRE-PROOF ARCHITECTURE

Minnesota Children's Home Society Files Plans to Utilize Immediately the Generosity of Capt. John Martin and W. H. Elsinger—New Home Will Be Ready by Winter.

Plans were filed yesterday with the city building inspector by the Minnesota Children's Home society for their new infants' home to be located in St. Anthony Park. The building, which will be of brick, two stories and a half high, will cost \$25,000. The new structure will take the place of the present frame building which is located some blocks distant.

Through the activity of Building Inspector Erlbe and City Engineer Rundlett and the willingness of the society directors to do as advised, the new building at the place of fireproofing art. When the plans were first submitted this feature was to a large degree lacking and they were accordingly rejected. The plans have since been remodeled, and now the department will have the satisfaction of knowing that at least one institution in St. Paul which comes under the asylum or hospital class, is absolutely fireproof.

**Generous Gifts Utilized.**

The new home, which is due to the generosity of Capt. John Martin, who gave the society \$25,000, and W. H. Elsinger, who donated the site upon which it will be built, will be known as the John Martin Children's home. The \$25,000 which Mr. Martin gave was originally intended to both build and furnish the new building, but the remodeling of the plans would not permit the latter, and the society has since succeeded in securing additional subscriptions for the furnishing.

## EDITORS OF STATE PLAN THEIR ANNUAL OUTING

Arrange for Eight Days' Trip in Great Lake Country.

The executive committee of the State Editorial association, having in charge the coming excursion, met yesterday and definitely determined the itinerary of the trip to begin Tuesday, Aug. 12, and occupy eight days, terminating on the evening of Tuesday, Aug. 19. The party will go from this city to Duluth via the Eastern Minnesota road, and at that point embark upon the Northern Navigation company's steamer Huron for Sault Ste. Marie. After inspecting the government locks at the Sault, the party will proceed to Mackinac Island, and when points of interest there have been seen will proceed to Sarnia, returning from there to the Sault, where the entire day of Aug. 16 will be spent. The members of the party, as the guests of the Chamber of Commerce of Sault Ste. Marie, will be shown through the extensive manufacturing of the Clergue Manufacturing company. The day and night of Aug. 18 will be spent at Duluth, and the party will return home on the 19th, arriving that evening at this city.

## HERBERT J. KING, HURT IN RUNAWAY MONDAY, IS DEAD

Well Known Traveling Man Succumbs to Injuries.

Herbert J. King, a traveling man employed by Farwell, Ozmun, Kirk & Co., died at 4 o'clock yesterday morning at his home, 684 1/2 Selby avenue, from injuries received in a runaway Monday. Mr. King was driving a team of horses Monday and was thrown against a water main trough at Bates and Hastings avenues. His injuries were not considered serious, but internal complications developed. Mr. King had been in the employ of Farwell, Ozmun, Kirk & Co. for several years. A widow and a child two years old survive him. He was a member of the United Commercial Travelers.

## Articles of Incorporation.

Articles of incorporation were filed at the office of the secretary of state yesterday by the following companies: Palms Land company, Duluth, capital stock, \$100,000; officers, Charles H. Taylor, Duluth, president; Thomas F. McCallister, Duluth, vice president; Edward B. Sutton, Duluth, secretary and treasurer. Gift Edge Mining company, Faribault, Rice county; incorporators, H. H. Crockett, Tapoli, and E. K. Clements. D. D. Phelps, Thomas C. Gardner and H. N. Jackson, of Faribault; capital stock, \$120,000.

## LOCAL SOCIETIES SUBJECT TO LICENSE

City Attorney Says Home Talent Shows Must Pay Same Fee As Traveling Companies.

If an opinion given yesterday by Second Assistant Corporation Attorney Otis is observed in its entirety, local societies, churches and social organizations which have been in the habit of swelling their exchequers through the medium of an entertainment or an amusement enterprise will find their receipts in the future materially curtailed.

The opinion which Mr. Otis gave followed the appearance yesterday of License Inspector Jessup, who had in charge the proprietor of the "black mard grass," a colored aggregation now holding forth at the Lexington hall park. Mr. Jessup demanded that the enterprise pay a license, but the proprietor demurred on the ground that it was a local affair and participated in entirely by home talent. An examination of the ordinance relating to shows and amusements and exhibitions of all kinds at which an entrance fee is charged showed that there was no exemption whatever of Mr. Otis' advice the proprietor was promptly notified to pay the license required, \$30 a week, or submit to the suppression of his enterprise.

Literally interpreted, the ordinance demands of all kinds of exhibitions, whether theatrical or otherwise, a license fee. No exemption is made, whether by home or foreign talent, and in Attorney Otis' opinion, if the city desires to do so, it may exact from all the license fee specified, which is \$30 for the first week and \$25 for every week thereafter. In the case of opera houses, however, and halls devoted exclusively to public exhibitions, the council has the power to name a tax to be paid annually.

The ordinance under which this fee is demanded was passed in the 89s, and has never been amended. It was undoubtedly intended to enable the authorities to cope with traveling or outside enterprises, and has so been interpreted by the license department. There is little probability of its being inflicted on local organizations, but there is nothing to stop it if the license department desires to do so.

## ST. PAUL TO HAVE BIG FLOWER EXHIBITION

Arrangements Made for Chrysanthemum and Orchid Show in November.

The Ladies' Auxiliary for the Promotion of Home Industries held a special meeting yesterday morning in the Chamber of Commerce and made arrangements for a chrysanthemum and orchid show in the city hall during the first week in November. Premiums aggregating \$200 will be given for the best displays.

For the best collection, single stems, any color, of chrysanthemums, the first prize will be \$25; the second prize, \$10. For pot chrysanthemums there will be prizes of \$15, \$10 and \$5. For the best collection of cut chrysanthemums \$10 will be given, and for the best designs of cut chrysanthemums there will be a first prize of \$25 and a second of \$15.

For the best collection of orchids there will be but one prize of \$20. Two prizes of \$15 will be given for the best collection of Craton and other foliage plants, and for the best collection of not less than twelve cut roses a prize of \$20 will be given. Exhibitors will have the privilege of selling their flowers if they wish, the flowers to be delivered the day after the exhibition.

## INDIANS' TIMBER IS TO BE SOLD AT ONCE

Interior Department to Carry Out Morris Bill Provisions—12,000 Acres Involved.

The Morris bill for the relief of the Chippewa Indians of Minnesota is being put into effect now, according to advice received by the state authorities from Washington. The interior department has sent out notices asking for bids for the pine land on sections 16 and 36 of each section in the Red Lake reservation, and in each of the four townships on the eastern side of the White Earth reservation, which, according to the provisions of the bill, will be opened for settlement.

Although much of the most valuable timber has been cut off the old Red Lake reservation, a large amount is still left, and it is estimated by the land department that the pine now scheduled for sale will approximate about 20,000,000. The area included in all these sections, in both reservations, will amount to about 12,000 acres.

This land had already been estimated by government appraisers, who decided that the land should be placed in agricultural and which as timber land. All that has been necessary for some time was for the timber to be advertised in offering only two sections. The matter was in shape for immediate action by the interior department, and it is understood that this pine land was acted on first, in the matter of carrying out the provisions of the bill, because the object could be quickest and easiest accomplished.

Many lumbermen have been interested in the disposition of this land, and for some time they have been anxiously awaiting an opportunity to secure some of it. Now that bids have been asked, it is thought that a large number will submit propositions. The sale, however, cannot take place for six months yet, as the land must be placed according to the Morris bill after the date of the first advertisement.

The action of the interior department in offering only two sections of each township, however, and those two not adjoining, will be a disappointment to speculators who have figured on buying several sections in one lot. Timber men express the opinion that it was done to prevent any one man taking up too much of the choice timber.

Scaled bids only will be accepted, and they must be accompanied with a check calling for 20 per cent of the whole sum. It will be sold by board measure, at not less than \$4 a thousand feet for Norway pine, and not less than \$5 a thousand for white pine.

**State Receives Money.**

The cash on hand in the state treasury has been materially increased within the past two days by the payment of the Ramsey county settlement of taxes, amounting to \$146,000, and the Hennepin county settlement, which was received yesterday and which amounts to \$165,000.

## BOY BURIED IN SAND

JOSEPH KOVARIK SMOTHERED TO DEATH UNDER AVA-LANCHE OF DIRT

CAUGHT IN HEAVY SLIDE WHILE LOADING A WAGON

Loam Strata at Top of Sand Pit Breaks Loose and Overwhelms Him—Was Within Two Feet of Safety—Only One Foot Under Surface—His Companion Escapes.

Joseph Kovarik, eight years old, was smothered beneath an avalanche of dirt in a sand pit at Palace, Jefferson and Pleasant avenues, about 5:30 yesterday afternoon. When the rescuers dug him out it was found that he was but one foot beneath the surface of the sand, but his legs were much deeper and he could not crawl out.

Young Kovarik went to the sand pit in company with Joseph Casper, twelve years old, who lives at 425 Clifton street. Casper's father is engaged in hauling sand from the bank, and having other business yesterday afternoon, sent his son with the team to fill the wagon. Young Kovarik, who lives at James and Clifton, asked distance from the Casper home to be allowed to go along for the sake of a ride.

The two boys arrived at the sand pit, in company with two teamsters. The teamsters asked the boys to allow them to load their wagons first, telling them that they would let the boys alone.

**Loam Strata Breaks Loose.**

Casper began shoveling sand into the wagon, and Kovarik asked to be allowed to use a shovel. The loam strata is about forty feet high and runs up at an angle of forty-five degrees within four feet of the top, where it strikes a strata of heavy loam. The loam has a perpendicular face and was top-heavy. The boys had not worked a minute when Casper noticed the loam tottering and he called to young Kovarik to run. The boy did not understand until he felt the dirt under his feet moving and he then started down the hill. In his excitement he stumbled and the sand and dirt poured over him.

Young Casper ran shrieking to the neighboring houses and John Mauritz, 1833 Randolph street; John Codger, 1938 James street, and Mrs. B. Nutz, 1903 Randolph street, hurried to the rescue with picks and shovels. The first shovel of dirt Casper removed exposed the boy's head. Casper was buried up to his waist in sand, but he kept on his feet and dug himself out.

In a few minutes there was nearly 400 persons on the scene. The boy's mother was frantic. When the body of her son was cleared she made several attempts to carry it home, but she was forcibly restrained until the arrival of coroner Miller. Coroner Miller decided that the death was purely accidental and there will be no inquest.

## ST. PAUL POLICEMEN FORM ASSOCIATION

Every Man on Force Joins New Protective Order—Chief O'Connor Elected President.

The Policemen's Benevolent Protective association of this city held a day afternoon at meeting in the Arion hall. The meeting was attended by as many of the day detail of the police as could be present, and all signed their names to the list. The plan of perfecting an association of an insurance character has been under way for some time, and at the last meeting the police commission permission was given to the officers to form one. The meeting yesterday was held for the purpose of adopting the constitution, by-laws and for the election of officers. There was but one change made in the by-laws, which related to the bonding of the treasurer. In the original draft the treasurer was required to give a personal bond, but this was changed, permitting him to be bonded by an indemnity company. Otherwise there were no changes.

## Chief O'Connor Honored.

The following officers of the association were elected: John J. O'Connor, president; Frank Horn, vice president; J. N. Mounts, secretary; R. A. Wright, treasurer.

The board of trustees is composed of members of the force chosen from the different stations. They are: W. H. Byrnes, central station; Adolph Guerrero, Edson station; Edw. Saxon, Ducas station; Michael Moran, Margaret station; John Miner, Prior.

The meeting yesterday was presided over by Lieut. Frank Horn, and he was given instructions to appoint an entertainment committee, which is to arrange an entertainment of some character, the funds from which are to be turned into the treasury of the new association. The officers of the association have the assurance of every member of the department that he will join.

## Disputants Taxed.

Mrs. Raden, colored, and Louis Sorenson, who used water pitchers to settle a dispute, were each assessed \$5 in the police court yesterday morning on a disorderly conduct charge. Sorenson's head was in bandages.

2,000 Tol Stations, 30,000 Subscribers.

## COOK ON STEAMER "LORA" IS DROWNED

Hannah Tangen Falls Overboard While Drawing Water, and Never Comes Up.

Hannah Tangen, twenty years old, employed as cook on the steamer Lora, fell overboard yesterday morning near the old Broadway pier and was drowned. The young woman was hauling water from the river, and when she did so was obliged to lean over the edge of the lower rear deck. The weight of the bucket of water caused her to lose her balance, and she fell into the river.

Although there were nearly a half dozen persons on the boat at the time, the accident occurred. Engineer Willoughby, who was in the engine room, heard the girl shriek as she fell. He stopped his engines and rushed up to the deck, but could see nothing. He waited on the deck for several minutes in hopes that the woman would come to the surface of the river, but she never appeared. A boat was lowered and the search was continued until evening without success.

The accident occurred at 9:20, as the boat was on its way from Stillwater to the dock at Central street wharf, where an excursion party was to be taken aboard.

The young woman was a Swede and had been employed as a cook on the boat for a month. She came to this country from Sweden about a year ago, and little is known concerning her antecedents.

## CITY TO CONTRACT MERRY-GO-ROUND SHOWS

Ordinance Drafted to Prevent Use of Vacant Lots in Thickly Populated Districts.

The right of lot owners throughout the city to rent their premises to traveling merry-go-rounds and small tent aggregations is to be curtailed. So much complaint has been received lately by the city authorities regarding these amusement affairs that the legal department is now preparing an ordinance to be given to the council at the next meeting of the board of aldermen by Ald. Elder.

Under the city law now in existence the only thing required of these amusement enterprises is the securing of a license. The ordinance is a secondary consideration. Under the terms of the new law which has been drafted, the city will be required to rent its property for amusement purposes will have to obtain a permit from the council, stating the character of the amusement to be given, the length of time it will prevail, a license will also be required, but that will have to be taken out by the owner of the show.

The legal department claims that under the police regulations it has the right to exercise this authority and demand a license. Because these amusement enterprises make and draw complaints are continual from all over the city. The principal desire is to isolate the show from the thickly populated parts of the city.

## UP-TO-DATE KITCHEN AT THE PUBLIC BATHS

Dr. Ohage Plans New Improvement for Accommodation of Picnic Parties.

For the accommodation of the many picnic parties that use Harriet island, Health Commissioner Ohage is preparing to arrange a kitchen which will be equipped with a stove, sink, and refrigerator, and will be used for cooking and serving purposes. Many of the picnic crowds now build a fire in the open air, and the installation of a kitchen is for the purpose of relieving the danger of a bad fire from flying sparks. The kitchen will be free to all who want to use it.

Dr. Ohage announces that when the picnic season meets he will ask that \$30,000 be placed in the budget for the baths. Of the amount \$15,000 is to be used in completing the improvement of the baths last year. These include the dredging of the slough to the south of the island, the construction of a harbor for small boats, the increasing of the reservation of Vermilion trees, and the erection of another pavilion. The remainder of the money will be used for maintenance.

## EDITORS START ON ANNUAL EXCURSION

Northern Minnesota Association Has Pleasant Journey Planned in Lake Country.

The members of the Northern Minnesota Editorial association begin their annual excursion today. The editors, to the number of forty or fifty, together with their wives and daughters, will leave Duluth for the different towns this afternoon and evening. They will leave Friday morning at 7 o'clock for the Iron range, where they will visit the big iron mines at Virginia and Tower during the day. They will also cross over to the government Indian school at the reservation of Vermilion trees, and return to Tower for the night. They will also spend part of Saturday on the range, returning during the day on Sunday. They will spend in drives about Duluth, visits to the parks and excursions on the lake. One of the steamiest companies, it is understood, is considering the idea of giving the editor a complimentary trip to the bay, where the large docks and other harbor industries may be visited to advantage, and as a way to impress them of the commercial and other importance of Duluth.

At 7 o'clock Sunday evening the party will leave for the copper country, where Calumet, Houghton and other important points in that territory will be visited. The steamer Ironopolis has been secured for the trip. The Northern Minnesota newspaper men and their wives will have all of Monday and part of Tuesday to be spent in Duluth, and will then depart for the industry of the Lake Superior region, and will return at 10 o'clock Tuesday morning. They plan to arrive in Duluth on Wednesday, and will be accompanied by the editor and his family, and the annual outing of the Northern Minnesota editors will be brought to an end. They will then proceed by rail to their different homes.

This association, the officers say, is steadily growing in membership, and the attendance at this year's outing is anticipated to be the largest any yet. Secretary Nelson, who is state librarian, will leave today for Duluth to complete arrangements for the reception of members of the association when they shall arrive later in the day.

The officers of this association are: President, N. H. Ingersoll, of the Dispatch, Brainerd; vice president, Mrs. E. W. Lee, Post, Rush City; secretary, E. A. Nelson, News, Hallock; treasurer, John M. Hyster, Herald, Lake Park. The executive committee is composed of A. C. Bernard, Cass Lake; E. C. Kiley, Grand Rapids; A. W. Shanks, Long Prairie.

## SUMMER SCHOOL ENDED

SUCCESSFUL SESSION IN ST. PAUL IS CLOSED

Prof. J. C. Monaghan Delivers Last Lecture Urging Needs of Commercial Education, Not As Substitute for, but As Supplemental to, Classical Education—Possibilities of America.

With a lecture by Prof. J. C. Monaghan on the subject of "Commercial Education," the course of the Columbian summer school was completed last evening.

Before the lecture E. W. Foote, chairman of the local executive committee, briefly addressed those present, expressing the satisfaction of the people of St. Paul in the large attendance from outside the city, and the hope that the next gathering of the school would be at this city.

Prof. Monaghan's address of last evening, like those which he had delivered on the two evenings preceding, was broadly instructive.

He deprecated what he termed the stupid prejudice in this country and in England against the Latin races, who, he said, were beyond what to be effected and gone to pieces beyond what to be effected in matters of national improvement. In refutation of that charge he read extensively from the essays of Macaulay to show the greatness of Italy as an industrial and commercial power in the fourteenth century. That greatness, he said, would still have remained had it not been for the lack of coal in that country, and he declared that the present supremacy of England among the nations of Europe was due to her great resources in coal and iron.

"If you had coal in Minnesota," he said, "you would dominate the Union, for you have the iron and the other natural resources to make you the greatest of all the states, but your one must be taken to other places to be manufactured."

**Commercial Education Needed.**

He did not wish, on behalf of the commercial education, to make war upon the classical education, which he declared in a most convincing manner. He would give every boy and girl in this country a classical education if possible; but the vast majority of children who could not get such advantages, and for those he advocated the commercial education. "We must give the child a practical education," he said, "or they will breed socialism or anarchy."

In a general way he commended the commercial educational systems of Germany and France. In those countries he said there was a mixture of severity in the schools which should not be adopted in this country, but eliminating those features the system employed in those countries was worthy of emulation.

Prof. Monaghan quoted Bismarck as having said: "The nation with the best education in the world would like to amend so that it would be the nation with the best schools."

The nation with the schools and the resources has the future. America, he said, has vast resources, should certainly have an education which will give her the best of the future, and what she now wanted was the schools.

## Indorses Scientific Method.

He briefly outlined the commercial and industrial education as practiced in Germany, calling attention to the fact that drawing was, as he expressed it, at the top, bottom, both sides and in the middle of all education in Germany. He strongly advocated the scientific method whereby the biologist was taught all about the anatomy of the horse's hoof, and the farmer was taught thoroughly how the grains and all of the other products are grown from the seed.

When Prof. Monaghan had completed his lecture, Father Danahy, president of the association, made a few closing remarks thanking the people of St. Paul for their interest in the school and commending the lecturers for their able effort. Thanks were extended to Gov. Van Sant, to the St. Paul press and others for courtesies shown.

## Governor Issues Requisition.

Gov. Van Sant has issued a requisition upon the governor of New Hampshire for a warrant charging the robbery of Frank Rogers, soon to be released from the prison of that state at Concord. Rogers is wanted here for breaking a parole from the state reformatory while under sentence of grand larceny in the iron degree. The specific charge against him was that he had stolen a quantity of clothing from the reformatory at Stearns county, and his violation of the parole conditions was in leaving the state.

## Pleads Not Guilty.

John McCarthy pleaded not guilty to a petty larceny charge in the police court yesterday morning, and his case was continued until Friday. McCarthy was arraigned on a warrant charging the robbery of a quantity of brass from a Northern Pacific freight car.

## Willie Must Be Good.

Willie O'Brien, who was arrested for stealing a dynamo from the West Publishing company, was yesterday sentenced to a state training school sentence. On his promise to be good he was placed under the charge of the probation officer until next November.

The Citizens State Bank of Balaton, Lyon county, whose capital is \$15,000, and a bank of the former school master, with capital of \$10,000, were yesterday chartered by the state examiner's department.

Deposits made on or before Aug. 3 will be entitled to 5 months' interest. Jan. 1 on the State Savings Bank, Germania Life Bldg., 4th and Minn. Sts.

## CROWDS COMING TO ST. PAUL NEXT MONTH

Great Interest Is Being Taken in the Trans-Mississippi Congress.

The board of directors of the trans-Mississippi commercial congress will begin to secure the city for the convention in St. Paul.

Answers are being received daily in reply to the calls recently issued, and a large, enthusiastic attendance is assured.

Among the cities which are going hot after the convention for next year, New Orleans is setting a lively pace. The New Orleans Progressive union has inaugurated a systematic campaign to secure the coveted honor.

Speaking of the trans-Mississippi commercial congress, Mr. Sidney Story, vice president for Louisiana of the association, says:

It is the duty of every commercial body in this city and state to send as large and representative a body to attend the session as possible. No city or state in the great trans-Mississippi country is more vitally interested in the work of this association. This is the thirteenth session of the congress, and the various promises to be the largest and most influential because of the great problems which for many years it has been discussing and having finally, through the recognition from the hands of the government. I mean for instance irrigation, a problem which will be equally as beneficial to us as it will be to the great West. The reclamation of the millions of acres in the West by irrigation under federal assistance, will increase the industrial delegation to St. Paul. The work which has come to look upon the Gulf ports, notably New Orleans, as its natural outlet to the world's markets, has been a great success. It is the various sessions of the trans-Mississippi congress, I would urge our exchanges not to overlook this opportunity of sending a large and influential delegation to St. Paul. The members of this congress are drawn from a section of the republic reaching from the Mississippi river to the Pacific coast, and from the boundaries of the Gulf of Mexico. The delegates are recruited from the most influential and prominent citizens of the community, and the beneficial result of getting in touch with this element of the great West, with whom we are seeking to develop closer commercial relations, are too paramount to be mentioned.

"The question of deep water and improvements to our rivers and harbors, the improvement of our consular service, the restoration of the American merchant marine, the isthmian canal project and other like subjects are the problems that will receive the attention of the St. Paul meeting."

There will be a meeting of the trans-Mississippi congress has always urged the deep water appropriations by congress for the mouth of the Mississippi river. This association maintains a delegation in Washington during the session of the national legislature at its own expense to urge the passage of every legislation that is necessary for the well being and development of the great trans-Mississippi country.

## Good Roads Conference.

There will be an important joint meeting of the board of managers of the state fair, the county commissioners of Hennepin and Ramsey counties, and the board of directors of the government officials, who are promoting the good roads proposition in the Northwest, at the fair grounds Friday morning. The meeting will be open. Every arrangement will be made for the good roads convention and demonstrations which will be held during the week. This association inaugurates the most important good roads campaign ever attempted in the West.

## Spell of Wet Weather.

Light thunder showers and a humid atmosphere are predicted for today. Indications generally point to a continued wet spell, with sweltering heat at intervals.

While the mercury receded somewhat last night, the heat was oppressive, with scarcely any breeze. At noon yesterday the mercury stood at 87, and later in the afternoon declined to 83. There was a cool breeze all day yesterday, however, which rendered the heat less oppressive.

## Concert at Como.

Tonight at Como the Minnesota state band will play the following programme: March—"Pan-American"; "Bright Overture"; "The Partners"; "Boselli Cornet Duet—'The Partners'"; "Cramer's 'The Partners'"; "The Partners"; "Grand Selection—'Lucia'"; "Donizetti Waltz—'Southern Rose'"; "Strauss' 'The Merry Wives of Windsor'"; "Edwards' 'The Merry Wives of Windsor'"; "Smith Galop—'The Merry Wives of Windsor'"; "Nicolai."

## CASTORIA.

The Kind You Have Always Bought

Signature of **W. J. Dyer & Bro.**

Sent to Training School.

Marlin Nelson, the boy who was arrested in Minneapolis while trying to sell a bicycle, yesterday pleaded guilty in the police court to a charge of petty larceny. He was given a state training school sentence.

## THIS IS NO TRAIN IN SERVICE ON ANY RAILWAY IN THE WORLD THAT EQUALS IN EQUIPMENT THE PIONEER LIMITED TRAINS IN DAILY SERVICE BETWEEN THE TWIN CITIES AND CHICAGO ON "THE MILWAUKEE ROAD."

The Railway Company owns and operates the sleeping and dining cars on all its trains, and gives to its patrons an excellence of service not obtainable elsewhere. The buffet cars, compartment cars, standard sleeping cars and dining cars of "The Pioneer" are the handsomest ever built.

This signature is on every box of the genuine **Laxative Bromo-Quinine Tablets**, the remedy that cures a cold in one day.

## BIG CAR SHOP INDUSTRY

MINN. JOTA RANKS TENTH AMONG STATES NOW

Increase in Value of products of 141 Per Cent in Ten Years—Industry Now Worth Nearly Six and a Half Million Dollars Annually—Report of Statistician.

According to the report of the chief statistician of manufactures, just issued, Minnesota now ranks tenth among the states of the Union in the railroad car construction and repair industry in 1900 the state ranked sixteenth. While many of the states have decreased in this department of industry, Minnesota has increased wonderfully, and in the past ten years has more than doubled the number of establishments, the value of products and capital invested.

There are but seven states in the country which show an increase of from \$5,000,000 to \$50,000,000 in the manufacture of products for the ten years, and of these seven Minnesota ranks fourth.

In 1890 there were eighteen car shops in Minnesota, while in 1900 the number was thirty-nine. A gain of 117 per cent. In 1890, the total capital represented by the industry in the state was \$2,926,180, while in 1900 it was \$4,935,505, a gain of 65 per cent. The value of the products was \$2,628,174, while in 1900 it was \$6,319,876, an increase of 139 per cent. Only one state ranked ahead of Minnesota in this industry at the present time are Pennsylvania, New York, Ohio, Texas, Missouri, Kansas and California, while Wisconsin, Iowa, Michigan, Massachusetts, New Jersey are far behind this state.

In 1890 there were 1,951 wage earners employed in the establishments of the state, and in 1900 there were 4,700. The wages paid in 1890 were \$1,219,325, and in 1900, \$2,599,387.

In 1890 there were 118 cars built, at a cost of \$70,387. There were 2,971 locomotives repaired, valued at \$1,823,422. There were also 152,941 cars repaired, valued at \$2,157,271.

In 1899 the value of the products of these establishments was \$5,294,207, and in 1900, \$6,319,876, a gain in one year of \$1,025,669 in value of products.
