SHAMROCK TO BE REPAIRED AT ONCE

Lipton Says Challenger Will Resume Trials in a Few Weeks.

Weymouth, Eng., April 18.—Shamrock III, challenger for the America's cup, which was dismantled in a squall yesterday, is being rapidly overhauled. The destruction of her standing gear was almost complete. Everything above deck must be renewed. The Shamrock I, is to return to save much, the object being to clear away the wreckage as quickly as possible. The raft is badly dented, but may be repaired; the boom is practically uninjured, the topsail yards are useless, and the sails are ruined.

SOUTHERNERS WILL NOT PLAY WITH NEGRO

Harvard Insists Upon Playing Colored Man on Crimion Team.

WASHINGTON, D. C., April 18.—Harvard won today's game on errors by Georgetown, 10 to 0. The game was a great one, striking out twelve men. Drift also pitched well, striking out three and allowing but four hits. Two hits were made off Clarkson, one being a scratch. The negro, Mathews, played shortstop. In consequence of the quarrelsome and unbecoming conduct of the Southern players, Manager Miller, who are Southern, withdrew from the game. There were some mild demonstrations of displeasure at the negro's appearance in the field, but he finally won the crowd by his few brilliant catches.

London Papers Express Regret.

LONDON, April 18.—All the daily papers express in editorials this morning their regret at the misfortune which pursues Sir Thomas Lipton's courageous attempts to life the America's cup.

breakages occur in the American boats.

The Standard fears that Sir Thomas Lipton's chances, at no time very good, are now less than ever.

Another paper asks why there were no life buoys aboard to throw to the seaman Collier, who was drowned.

The Field publishes an exhaustive analysis of the America's cup challenge.

Assuming that Shamrock I, is in the same trim as in 1901, the paper considers that Shamrock III, could allow Shamrock II, about fifteen to eighteen seconds per mile.

If she can carry her sail, continues the Field, the challenger is likely to prove a slippery customer.

Should she fall in the cup races, it will probably be because Herreshoff has made some great advance in the speed of his new boat on a reach.

It would not be easy to design a more weatherly boat than the challenger, and in theory it should not be impossible to design a considerably faster boat for reaching or running.

Thus, if the reliance proved to be an enlarged Sakantula or Marjory, the chances are that she will show such astonishing speed that the valuable weatherly qualities of the finer type possessed by Shamrock III, or Columbia would be greatly discounted.

Previous attempts, concludes the Field, to construct enlarged Sakantulas, however, have been attended with very little success.

Thanks to the smooth water, Shamrock III's mast was secured by evening and towed to the harbor.

One Thing:

There is one quality in a shoe that is hard to describe, for you can't define it or locate it. It is not beauty, or cut, or fit, or wear; it is style!

Some shoes have it. Most shoes haven't it. It has no relation to cost. A \$10 custom-made shoe often can't supply it, while a \$3 shoe will sometimes give it to you.

You get it in the highest degree in the "Dorothy Dodd" Shoe.

"The Style of a 'Dorothy Dodd'" has passed into a proverb.

No matter how ugly a woman's feet may be, they can be made stylish in a pair of these shoes.

Every woman can't be beautiful, but every woman with these shoes can have stylish feet. And this is a great deal!

Ready-made Clothing. The Finished Product.

How It's Made. How It Looks.

Could you expect any different result when you consider all the circumstances of its manufacture. Cut out by block patterns—50 to 75 garments at a time, from no particular figure, then thrown together in a sweat shop or a factory as represented in the above cut taken from life; and afterwards shipped in packing cases from the East, packed as tight as sardines in a box, which wrecks what little shape they might have had.

Contrast this with the attention paid to every individual garment made to your order, and you will readily see where the difference comes in; and the difference in the price is not nearly so great as the difference in the garments themselves, besides every time you leave an order here you help to perpetuate the prosperous conditions which now exist.

Our Garments Are Made By St. Paul Workmen.

Our Prices Are Not Prohibitory. Every well-paid mechanic, clerk or artisan can afford to pay \$20 to \$30 for a Suit or Overcoat, or \$5 to \$8 for a pair of Trousers. Please compare our offerings before placing your order, we'll guarantee you perfect satisfaction.
