### LONGS IN PANIC TO SEEK COVER

Elevator Companies Will Force Deliveries of May Wheat to Avoid Tax.

There was a panic in the wheat pit yesterday. For an hour or more there was a dizzy time with May wheat selling at 75 1/2 cents and suddenly dropping at the snap of a finger to 74 1/2 cents.

A report was circulated yesterday that the elevators intended to force delivery on May wheat contracts, and it put the little traders into a sad state of mind. The report was generally sent out and it had a disturbing effect on all markets. The small traders, fearing accidents in the meantime, many of whom were long on May, fell over each other in their haste to unload.

On May 1 the elevator companies of Minneapolis will turn over to buyers of May wheat about 4,000,000 bushels. Barring accidents in the meantime the deliveries on May contracts are likely to be the heaviest in the history of the Minneapolis market.

The elevator companies are anxious to evade payment of the tax imposed under the clause of the Fryberger tax bill, which provides that personal property purchased or acquired on the 1st day of May shall be listed by or for the persons acquiring it.

It is understood that several elevator companies will notify purchasers of May wheat today of their intention to deliver all sales of May wheat on May 1. The receiver of the wheat on that date under the law must stand the tax which has heretofore been paid by the elevator companies.

The elevator people consider the new law a good one, as it clearly defines the liability for the tax in the event of property transfer on May 1, and there is no apparent reason why it should have disturbed the market, unless among those speculators who intended to carry May wheat to the close in the hope of a squeeze. Some of this latter class may be forced into liquidation.
