attention. Liberal advances made on
consignments. References: Union Stock
Yards or any Commercial Agency.

CONDITIONS IN WALL
STREET ARE MORE
NORMAL

Market Is Regaining Its Ac-
customed Confidence, and
Firmness Is Noticeable—
Some Uneasiness Caused
by the Gold Exports—Crop
Outlook Good.

Special to The Globe.
NEW YORK, May 17.—There is a
striking change of feeling on the Stock
Exchange. Twelve months ago we
were near the crest of a wave of wild
speculation. Six months ago we were
on the verge of despair, and in fear of
a crisis or panic. Now we are settling
down to more normal conditions;
dependence has ceased and confidence
should soon command to regain its
accustomed sway. The reasons for this
are easy to discover. A really im-
proved monetary conditions and
brilliant wheat crop prospects being
the principal causes. The speculative
leaders, however, apparently realize
that the market requires further rest,
and therefore remain inactive at present.
The present supply of securities,
including the improved situation of
the market can stand under existing
conditions. Nevertheless, as just stated,
there has been a moderately favorable
change of feeling in Wall street, which
is justified by new conditions, and
which, if allowed to develop on
natural lines, without artificial inter-
ference, should lead to im-
provement in values.

Gold Exports Cause Alarm.
Some uneasiness was shown at gold
exports, which are usual at this season,
and have not yet been sufficiently
large to cause alarm. The European
markets are generally well supplied
with funds, and as the financial situa-
tion in England, France and Ger-
many is improving rather than other-
wise, there seems to be no occasion to
expect large gold exports. The enormous
applications for the Transvaal loan, making
allowance for over-subscriptions, show a sur-
prising abundance of funds abroad, and
giving investment. Money is known to
be very plentiful in Paris, and the
strain in Germany has been greatly
relieved by the improved financial
situation. The most likely cause of
gold exports is the falling off in mer-
chandise exports, which in April left
a trade balance of only \$2,800,000,
against \$33,000,000 in April, 1902,
and \$44,000,000 in 1901. This continued
shrinking trade balance is one of the
most unfavorable signs of the times,
and cannot be overlooked. For the
ten months of the fiscal year the ex-
cess of exports was the smallest in
several years, being only \$33,000,000,
against \$435,000,000 in 1901 and \$544-
000,000 in 1900. This shifting of the
balances is entirely due to heavy im-
portations. Our exports are almost
up to record figures, while imports
have far surpassed all previous levels
in consequence of the great trade ac-
tivity at home and our temporary
inability to supply the demand for
some manufactured articles.

Big Wheat Crop.
In the crop situation there is little
change. The season is very backward
for cotton, corn and other crops, which
can hardly be considered favorable;
but it is early, and there is plenty of
time in which to recover. The wheat
crop is practically certain and this
is a factor of much importance,
especially to railroads in the wheat
belt, some of which are fully as
undecurrent of strength in the stock
market in consequence.

The money market is easy, as usual
this season, while the gold market
is at a minimum. The steady expan-
sion in loans during the last few
weeks is hardly a welcome feature,
and the bank reserve is less than
for the past few years at this time,
the supply of funds has been some-
what augmented by the sale of
bonds, and the withdrawal of trust com-
panies from the clearing house agree-
ment will prevent the locking up of
\$30,000,000 to \$40,000,000 for reserve
account, if all the companies take the
same course as it is rumored they will.
It will be necessary to find about \$15-
000,000 was required on June 1 which
will not now be withdrawn.

Speculation Is Dormant.
Speculation is dormant. Active
fluctuations are mostly confined to spe-
cialties, and the market is generally
settled. It is likely to be a
trader's market, making good stocks
a purchase on the sharp decline and
equally good sales on the rallies. In
present appearances we are likely to
have just such a market for some
time to come, until money or crop
prospects warrant a change in opera-
tions. The market, however, is sub-
ject to the control of the big operators,
and should their plans or deals call
for more active trading, the market
when least expected. Fortunately,
there is less reason to apprehend tight
money this fall than there was on Jan. 1.

The attitude of the public toward in-
vestments is likely to become more
cautious. The strong powers are at last
now brought more into use, and pur-
chases hereafter will be of an entirely
different character from the recklessly
indiscriminate ventures of 1901 and
the early part of 1902. Such an ex-
ercise of judgment will do more even
than the Sherman law to check un-
wise combinations, and in it lies the
hope for an improved market for
standard, unaffiliated securities. That
there is money awaiting safe invest-
ment in considerable amounts is at-
tested by the oversubscription ten
times of the latest New York city loan
of \$5,000,000.

Chicago Produce.
CHICAGO, May 16.—Butter steady;
creameries, 160c; dairies, 160c; eggs
easier; at market, common to good,
14c; cheese, new, 14c; twine, 14c;
