

CROPS ARE PLANTED-SPROUTED

Northern Pacific's Weekly Report Says Northwestern Vegetation Was Never More Promising-All Grains Are Sown and Wheat and Barley Are Above Ground-Hay Cutting Has Begun.

The Northern Pacific's crop report for last week is certainly a most optimistic one. From all points in the Northwest reports have been received telling of the splendid condition of growing grain. At a few places there was too much rain during the week just closed, and the cold spell did a little to retard growth.

However, according to the report, crops were never in a better condition at this time of year, and already in many localities farmers are taking of a bumper crop.

With the exception of a small percentage of corn, all grain has been planted. Wheat and barley are from four to six inches above ground, and corn is already beginning to sprout. Potato planting is progressing, and a considerable amount of millet has been sown. Hay cutting has commenced in some sections, and pasture and meadow lands never looked better.

The report in detail says: The weather during the past week has been rather cool and dry. Crops in general have not made quite as much progress as during the previous week, but the ground is standing very thick, and at present are in fine appearance. Warm dry weather will continue the week, but the ground is standing very thick, and at present are in fine appearance.

Staples to be sown. Seeding and planting are completed, except the ground in good condition. No moisture is needed for some time. Wheat and oats are from four to five inches above ground. Flax is almost as high and looks first rate. Hay cutting has commenced in some sections, and pasture and meadow lands never looked better.

Little Falls and Dakota Branch—The past week has been very dry, and the ground is standing very thick, and at present are in fine appearance. Warm dry weather will continue the week, but the ground is standing very thick, and at present are in fine appearance.
