POINTS FOR ALASKA

Senate Committee's Recommendations Are Announced.

Globe Special Washington Service, 1417 G Street. WASHINGTON, D. C., Jan. 5.—An authorized statement of the chief recommendations which Senators Nelson, Burnham, Dillingham and Patterson, who visited Alaska last summer as a subcommittee, will make to congress is reduced to this: First—No territorial form of government, on account of difficulty of communication and sparseness of population. Second—A delegate in congress to be appointed by the president of the United States. Third—The construction of wagon roads, the cost of which is to be defrayed from the revenues of the territory, especially a road 450 miles long from Valdez to Eagle. Fourth—A thorough revision of the mining laws by a committee or commission to be appointed for that purpose. Fifth—The creation of an additional judicial district in Northwestern Alaska. Minor needs of the territory will figure in the recommendations of the senatorial committee, but these five are looked upon as highly important. Four or five bills intended to carry into effect the committee's ideas have been prepared and will soon be introduced. There will be a meeting of the entire membership of the committee on territories Friday, when the subcommittee will present its bulky report of the Alaska trip in July and August last. The members of the subcommittee expect that results in line with their recommendations will be forthcoming before the close of the present session. —Walter E. Clark.

Bitterly cold weather prevailed in the interior of Pennsylvania during the early hours of the day. In some of the mountain regions temperature as low as 36 degrees below zero was recorded. A rise from 10 to 30 degrees is reported tonight. Railroads and industrial establishments all over the state were more or less hampered by the severity of the weather.
