Bradstreet's Report and Euro-
pean Crop Conditions Prove
to Be Bull Cards

Wheat moved up a few notches yester-
day in spite of heavy receipts and good
selling, but reaction sharply on Bradstreet's
crop report and the pessimistic views of
European exports. Stocks were sharply
lower on general reaction and manipulative
and some public liquidation.

What the Brokers Say

M. Doran & Co.'s stock letter says:
The steady advance in wheat
after a week of reaction, was due to
the fact that the market was not
sufficiently liquidated. The news on the
European side, however, was not
favorable, and the market was not
sufficiently liquidated. The whole
action of the market seemed to be an
expression of the prevailing sentiment
rather than a response to any change
in the situation. The feature counted
upon to lower values was the
quadrupling of the total receipts of
large elevators, the total approximating
1,000,000 bushels. Southwestern arrivals
quadrupled the corresponding day last
week, and nearly doubled last year. Local
receipts were 154 cars, 148 of which were
new. The demand for wheat was up sharply
and values were up with the options. There
was a brisk demand for soft winter wheat.
One interest alone was for 100,000 bushels
at the same time buying the old July.
Southwestern cash markets were firm.
Liverpool cash market was steady, but
closing lower, but the sentiment expressed
was bullish on prospective supply and demand.
London and Paris were steady, but
while Berlin and Budapest closed lower,
the market seemed to be an expression
of the prevailing sentiment rather than a
response to any change in the situation.

Private advices from the Northwest
suggested a rust in a number of sections,
and the government weekly bulletin dis-
counted the same from Iowa and South
Dakota and states the general progress to
be fairly good. The government weekly
bulletin states that the crop in the
Missouri and Mississippi valleys.
The weather map shows showers in the
Northwest and a cold front moving
indicated for tomorrow in spring wheat belt
and showers in the Missouri and Missis-
sippi valleys.
