Cream! Cream! Cream!
Take it to Wheat and try his test. 37tf.

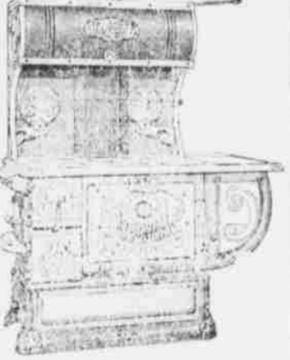

EVERYBODY IS FERTILIZING

This is the year everybody is Fertilizing and we all know that is the proper thing to do, or not sow wheat; for chinch bugs are thick and the season is late and the ground not in the best condition. This is the year to put her on thick. We believe **Pure Bone Meal and Potash—Swift's**—the better kind to use, but any kind is good if you put it on thick enough. We would not think of using less than 100 pounds to the acre and 150 is better. If you are renting and only want one year's crop **Swift's Special Grain Grower** is good and **Ox Grain Grower** with 4 per cent Potash give excellent results. Try it once. Plenty on hand of all kinds ready to load, but don't forget to put her on thick.
Your Humble Servants;

Webb Brothers
