**MOTH BALL OR MERCY?**

One hundred thousand war-orphan in the Bible Lands need your spare clothes. We can hardly realize here in America what a few of the old clothes that are hanging in our closets will mean in Armenia. There people actually die for want of clothing enough to keep them warm. Last year America sent 1000 tons of clothing to the Bible lands. These destitute people are absolutely dependent upon America for clothing to protect them. Next October the first snow will fall and winter (it gets as cold as 25 degrees below zero) six months long, will crunch down on their nakedness. They'll shiver, sicken and die by the thousands. All but those who have warm clothing from America.

Housecleaning time is at hand and in nearly every home throughout western Missouri dozens of warm garments will be packed in moth-balls, garments that will never be used again, donated to the moths. Which is it, moth balls or mercy?

Won't you pack up your spare clothing and send same to the Near East Relief warehouse, in care U. S. Army Base, Brooklyn, New York.

"The Bigger the Heart the Bigger will be the Bundle."

**DAIRY DEVELOPMENT.**

The record of the purebred jersey herd at the University of Missouri shows the importance of selecting a good male to head the herd. Sultana's Virginia Lad was at the head of the jersey herd at University of Missouri about three years and he increased its efficiency over 60 per cent. Only three of his first daughters gave a less amount of milk than their dams did at the same age and every one of them gave a very material increase in butter fat, and when we can realize that the Missouri University had a very exceptional herd then we can begin to appreciate this wonderful animal.

Some of the descendants of this wonderful animal are in southwest and all those wishing to improve their dairy herds would do well to inquire of the university as to the descendants of this animal for sale.
