TEXAS FRUIT LANDS

PRODUCE EARLY CROPS WHICH BRING FANCY PRICES.

In Texas they begin shipping berries in April, tomatoes in May, Peaches in June, bringing fancy prices up North.

The growing season is much longer than in the North—a chance to make two and three crops, reducing the expense of "getting through" the winter.

Fruit and truck lands along the Cotton Belt Route are very cheap as yet—\$10 to \$15 an acre unimproved. When put to orchard or truck they can be made to yield \$100 to \$200 per acre and more.

Besides it's an ideal climate—no long, cold winters. Write for booklet on fruit and truck growing. E. W. LABEATME, G. P. & T. A., Cotton Belt Route, St. Louis, Mo.
