

# No Camouflage in This Price

We have reduced the Titan 10-20 price \$225. You can now get the world's standard 3-plow tractor for \$1,000.

**Titan  
10-20

When you buy a TITAN the original price includes:

## Friction Clutch Pulley

A large, wide friction clutch pulley, made in five sizes, equipped with safety shield, is mounted directly on the crank-shaft of the low-speed, steady Titan engine and delivers the full power to the driven machine. The Titan 10-20 can be quickly backed into the belt because of the location of the pulley and the belt clears the front wheels and other parts of the tractor by a generous margin. It is not necessary to dig holes for the front wheels to get belt clearance. The Titan pulley was not put on as an afterthought. The designers did not overlook it in the first place. Some tractor builders committed this very serious error, due to lack of farm knowledge and experience. To remedy this error, they designed a small make-shift pulley, in one size only, attached it in an awkward place, and charge you \$35 to \$40 for it. The Titan 10-20 friction clutch pulley is furnished without extra charge.

## Throttle Governor

Some tractors are sold without governors because, perhaps, the designers did not know that one was needed. Which is the best economy—to pay an operator a salary just to sit on the tractor and adjust the fuel to the load variations when engaged in belt work or let a throttle governor do it without extra cost?—do it automatically, perfectly. The Titan throttle governor saves fuel, prevents grain losses by delivering uniform power to your thrasher and lengthens the life of both tractor and driven machines. You get this governor without extra charge.

## Drawbar

Some tractor builders put a hook and eye affair on the tail end of their tractors—and call it a drawbar! They seem to have overlooked the fact that a farm tractor not only pulls plows but also mowers, hay loaders, grain binders, harrow-threshers, etc., each requiring different hitch adjustment. Perhaps they didn't know about these other machines. Look at the Titan drawbar. Note the provisions for a wide range of adjustment both up and down and sidewise. The Titan drawbar fits every need and it is furnished without extra cost.

## Fenders

The designers of some tractors evidently did not know that the drive wheels throw dirt, dust or mud over the operator and machine unless fenders prevent it. The Titan 10-20 has such fenders. They are also a "safety first" feature. The state of Michigan has passed a law prohibiting the sale of fenderless tractors. Titan fenders are furnished without the \$40 to \$50 extra charge made by the "low-price" manufacturers.

## Platform

Some tractor designers apparently never sat in a tractor seat ten hours a day or more, jolting over rough fields, so they can't appreciate what a relief it is for the tractor operator to rest himself now and then by standing up, without loss of time. You will appreciate the Titan 10-20 platform that enables you to do this. It is a comfort feature furnished regularly with every Titan 10-20 tractor—no extra cost.

## Tools

A complete set of sixteen tools is furnished with every Titan 10-20. This handy tool-kit is provided in spite of the fact that Titan 10-20 tractors get out of order less frequently than any other tractors in the world. Some tractor concerns whose tractors really need frequent adjustment and repairs, furnish nothing but two or three wrenches. They tell you that their product is so good that it doesn't need adjustment. Do you believe this? As a matter of fact, they omit necessary tools for the same reason they omit the essential features described above—to make a low "camouflage price"! The Titan 10-20 complete tool kit is furnished without extra charge.

THERE is no "joker" in this price. We are not telling you one story in this advertisement and then leaving it for our dealers to break the sad news that the advertised price won't buy a tractor unless you pay extra for a lot of necessary features. The Titan dealer won't charge you extra for "starting and service" before he can deliver the tractor. He won't show you a machine stripped of many essential parts—belt pulley, fenders, platform, governor, drawbar, tools—and then tell you that you can have these things by paying extra for them. The Titan at this advertised price is a complete 3-plow kerosene tractor.

Then there is another thing. We are not experimenting at your expense when we sell you a Titan 10-20. There is real farm machine and tractor manufacturing experience back of it. We have been in the farm machine business for 88 years and have been supplying tractors for 14 years. Not another company in the world knows the farmer's power and machine requirements as the Harvester organization does.

Would you entrust your bank account to a man who had never had any experience in handling money? Will you risk your farm profits in a tractor built by designers whose knowledge of farming is limited to books and a drawing board? It will pay you to think about these things when you buy your tractor.

## Starting and Instruction Service

Another "joker" of some tractor concerns is to charge you a large "starting and service" fee—extra. This is another way of getting a low price for advertising purposes. But you can't get the tractor without paying this charge. They make it compulsory. The International dealer gives you this service without asking you to pay extra for it when you buy a Titan 10-20. Free tractor schools inaugurated by us, also benefit Titan purchasers in all parts of the country.

## A RAILROAD BANDIT TELLS HIS OWN STORY

Once a notorious bandit, an outlaw, and a fugitive from justice, now a prosperous lawyer and citizen of high standing, who two years ago made the race for governor of Oklahoma on the democratic ticket, Al Jennings has just completed the most wonderful story that has been written in America for years. It is entitled "O Henry and Al Jennings."

O. Henry, America's greatest short story writer, and Al Jennings, lawyer and eminent citizen, who thirty some years ago were fugitives from justice in Honduras, Central America and who later were pals in the Ohio state penitentiary, together lived a story of the ages.

O. Henry is dead, but Al Jennings lives, and he tells the story of their two lives. It is a classic in literature as well as a powerful dramatization of the careers and reformation of two men who will live in history as two of America's greatest citizens.

This true story, the most expensive feature ever carried by any Quincy newspaper, will begin in The Quincy Journal Monday, July 28th. Send your subscription in today. Get in on the first issue in order that you may not miss a single copy.

The story will continue for something like three months. See or write our agent,

S. T. Pollard, Monroe City, Mo. Or send direct to the office. Three months for \$1.25.

## Poultry Pointers

Be sure that the male at the head of the flock is pure bred.

The Mediterranean or egg breeds are: Leghorn, Minorca, Ancona, Spanish, and Blue Andalusian.

The American or general-purpose breeds are: Plymouth Rock, Wyandotte, Rhode Island Red, Java, Dominique, and Buckeye.

The Asiatic breeds are: Brahma, Cochin, and Langshan.

The English breeds are: Sussex, Cornish, Dorking, Orpington, and Redcap.

For general farm use the American breeds are probably the best.

Pure-bred poultry means uniformity of products. Uniformity of products means increased profits, if products are properly marketed.

Given the same care and feed, purebred fowls make a greater profit than mongrels.

Every poultry keeper who is interested in breeding better poultry should have a copy of the American Standard of Perfection.
