—Hon. John Edwards, of Maryville, is a probable candidate for Judge of the Court of Appeals. As Judge Norton in a letter recently published, virtually announces that he is in the race for the Democratic nomination for Governor, which kills Moorehouse's chances, Edwards' show is now very bright, and will perhaps get the nomination, if "Our John" don't capture the railroad commissioner plun.

—We can't understand why it is that some people will persist in patronizing every traveling peddler that comes to their doors. They purchase from them goods of an inferior quality, pay for them just about the same price, and in many cases pay a higher price, and that they would have to pay their home dealers for a first class article. The home merchant is your neighbor; he pays taxes regularly every year to support your county; he buys the goods to sell to you and employs your labor, and it is but right and proper that he should receive your patronage. The traveling peddler pays nothing for rent, light, fuel, buys nothing from you and does not employ your labor. Think this matter over a little and see if you do not come to the conclusion that it is better and more profitable in the end to patronize your home merchants.

—"Hello there!" "Where did you get that arm load of goods?" "Why, I got it at Price's Hardware." "O, ho!" "Yes, he's got two 10 Cent Counters just chock full of goods. You can get a whole arm full for a dollar. It would make your eyes bulge out to see your counters. Everything you could think of on them, and for only 10 cents."

—The fruit grower encounters great difficulties in his business. The codling moth and the curculio are obstinate enemies of the most pronounced order but when these is added the English Sparrow which feeds upon fruit buds as well as the product of the buds they will feel like giving up the business altogether. These little wretches are as near human in their appetites as they can be. They eat the grain before it is ground in the mill, in the stack, in the barn or the mill, wherever it can be found. They eat the grain after it is ground and made into bread. They eat it when it lies on the ground while sprouting and afterwards. They also eat fruit buds and devour the fruit. They eat our garden stuff, anything in fact that man wants for his own use these English vandals want too. This is too much. But what can we do? Destroy them. Cyrus Philbrick has done this for Oregon the past three seasons. Now let us have more Philbricks, a half dozen for each town in northwest Missouri and the adjacent country of Kansas and Nebraska and the English Sparrow will go fitting where pernicious fitters ought to go.

WE WILL SELL YOU DRY GOODS, DRESS GOODS, NOTIONS, GROCERIES, BOOTS & SHOES, Etc., AS LOW AS THE LOWEST.

KREEK & WATSON,

His lectures are strictly scientific; illustrated by one of the very best Cabinets of Paintings in the United States. His life size anatomical plates are unequalled. He comes highly recommended, and is every way deserving of a liberal patronage. Admission, 25 cents; children, 15 cents.
