WAITING FOR NOVEMBER 8

THREE SUBSTANTIAL REASONS WHY CLEVELAND CANNOT BE ELECTED TO THE PRESIDENCY.

Who's Your Friend?

A great effort is being made in the Democratic papers to prove that Cleveland is a good friend of the soldiers, and that his administration did much in the way of granting pensions. A few figures that are official will be of interest to every Union soldier and sailor.

Vote for a New Missouri.

Every man who wants to see Missouri succeed should vote the Republican ticket.

It represents the progressive men of the state, the men who make a commonwealth prosperous.

It represents the protest against the policy which has kept immigration from Missouri, retarded the development of the mines, held back the farmers and the merchants, and made the state generally a laggard, in spite of the immense natural resources which should have placed it in advance of all others.

It represents the protest against the control of the officers by a narrow ring of a few families to the exclusion of a great body of even the Democratic party.

It represents the idea that it is a good thing to let the people know what is represented in their important degrees to the growth and welfare of a state.

It represents the men who live in today, who realize that the war was fought many years ago, and that this is one nation, and the greatest nation on the globe.

It represents purity of manhood, independence of thought, and the American home as the center of American influence.

It is the ticket of the whole people, and not of any clique or ring, and that directly pertains to the prosperity and happiness of the people of all parties.

The State of Trade.

There are a few quotations from Dunn's Trade Review for the past week that are a conclusive reply to whole volumes of Democratic lying about the effects of the McKinley bill. We extract several particularly significant sentences:

All home trade is of enormous volume. Prices are low, but merchants are pressing for more business at the same rates.

All domestic industries are crowded with orders, and works as a rule are fully employed, many being pushed to overtime by the urgent demands resulting from an unprecedented distribution of goods.

The textile manufacturers continue the extraordinary activity fully described in recent reports. The iron industry feels the impulse of increasing demand; the market is stronger.

These are the conditions of trade which the Democrats find unsatisfactory and which they propose to remedy by throwing down the tariff barriers and letting in vast quantities of foreign goods to supply the extraordinary demands now met by our home industries. A more senseless proposition was never put before the American people. Why should we make a change in industrial policy when prosperity is at its height?

An Insult to the Nation.

Since the Republican party came into power the country has had a currency whose notes were worth as much in Oregon as in Maine, as much in Vermont as in Texas. Not a dollar was ever lost to their holders, and their value was never destroyed by the failure of a bank whose name they bore. It is a national currency, and it is as good as gold in every part of the world. The Democratic party proposes to destroy this currency and establish in its place a state bank currency of rags—a thing of shreds and patches. The proposition is an insult to the commercial intelligence and the business integrity of the country.

This increase during the fiscal year '92 of the values of farm produce exported were increased over those of 1890 as follows: Bacon, \$19,000,000; beef, \$12,000,000; live cattle, \$16,000,000; cereals, \$150,000,000. The decided increase in most products is due largely to the removal of the prohibition of France and Germany upon the importation of American hog products.

For the office of collector county, of our people should study well the qualifications of all candidates and select the one best suited for the duties. Milton C. Brumbaugh as a man eminently well suited for the office. He is honest, straight forward, prompt and just in all his dealings, and can give the necessary bond without the least trouble.

The country has more currency now per capita than it ever had in the past, and it is all worth its face in gold. It more than keeps pace with the growth of population. More good currency ever issued is not needed. The Democrats, though, want to give us a currency that never can be good.

If the people of Holt county want a man for prosecuting attorney who will be perfectly honest and fearless in the discharge of his every duty. If they want a thoroughly competent person to fill this all important office, then they should unhesitatingly cast their ballots for George W. Murphy for prosecuting attorney.

The deposits in the savings banks of free trade (Great Britain amount to \$180,000,000. The deposits in savings banks of protected United States amount to \$1,023,703,723. How is this for material ruin?—Kansas City, Kas., Gazette.

Thompson, a former citizen of our town, but now a resident of Covington, Charles was lately on a business trip to Omaha, and after several weeks' confinement in the hospital of that place returned sufficiently well to return home on the 21st inst. He was taken ill a few days since, and died and was brought here by his employers for burial as above stated.

One night last week, we had the privilege to listen to a temperance exhortation given by Isaac Shaw of Harmony, candidate for county representative on the Prohibition ticket, but if he is electing, we had better make a clean professional business of it, instead of being a temperance as he does. As far as we are concerned, the Hon. N. F. Murray will get our votes for county representative.

Everybody should turn out and go to Mound City to the Republican rally and hear Walter Davis, Farmer Wade and Geo. Crowther, November 5.

Several of the neighbors joined together and built a rock road across the creek, north of the creek, and it is needed at that place very bad.

The temperance lecture at the church on last Thursday night, was well attended, but it seems as though the good Roman people of the Grove did not take any stock in the speech, as we all know some people will get cranky at times.
