--Gilbert, the seven-year old son of Milton Everet, living three miles north of this city, fell from a corn crib Friday last, October 18th, and struck a barb wire, inflicting an ugly gash on his right upper lip, completely severing it. He was brought to Dr. Proud's office, who did the necessary sewing, and the little fellow is now getting along all right.

--Upon its dedication, Bishop Burke will install the Rev. Father Harmon, as the priest in charge of the new church and the Forest City parish. He comes with the reputation of being one of the most brilliant young priests in this section of the state, and we bespeak for him a most cordial welcome, not only by the members of his parish, but by the people of Forest City and surrounding country.

--If you don't know it you can't tell it--at least you can't say so until you know about it. It's just that way sometimes with the newspaper man. And it's just the case in this case--never knew it until a few days ago. However it may be late, but we send our congratulations just the same to John McMullen and Charley Cupp and their wives, of Forest City, who are the fond parents of twins--to the former on September 24 a boy and girl; to the latter on September 17 a boy and girl.

--Joe Mitchell, residing two miles north of Forest City, met with an unfortunate and peculiar accident Wednesday morning of last week, October 16, in which his nose was broken, lower lip cut open, and upper lip also cut and bruised, and was otherwise shaken up, and the strange part of it is that he has no recollection how it happened. He had shipped some cattle the evening before, and intended going down on the three o'clock passenger the following morning, and had gotten up, saddled his horse and started for town about 2:30 a. m. He remembers being in the edge of Forest City on his way to the train, but from that time his mind was a blank, until he came to himself, sitting upon his horse, in front of Ben Plummer's place, a short distance from his own home, his horse having turned around and was nearly at home before Mr. Mitchell regained consciousness. He was absent from home about 40 minutes. The only theory that we can advance is that the horse stumbled, throwing Mr. Mitchell off with the above results and rendering him unconscious, and while in this condition he remounted his horse, and the animal started back home with him.
