

Independent of All Trusts

Most shoes are made of *trust* leather tanned from *trust* hides. Everybody knows that adulteration and high prices are the usual results of trust methods.

ENDICOTT-JOHNSON CO. is the first and only shoe house in the World to buy raw material in the open market—tan leather and make shoes independent of all trusts.

This is the largest and most complete organization in the World for the production and distribution of good shoes, on the lowest possible basis of cost. The leather in *Endicott-Johnson Co.'s* shoes is the best because it is the only leather made from a shoemaker's standpoint of quality.

In addition these shoes are placed directly into our store, cutting out all middlemen's profits.

See that your next pair of shoes bears the name *Endicott-Johnson Co.*

WHAT THE WORLD'S BIGGEST USERS SAY ABOUT CREAM SEPARATORS

LINCOLN, NEBRASKA, November 11, 1908.

When we first began in the creamery business we operated several hundred skimming stations and had in use a large number of the various makes of power separators. Owing to the all-around superiority of the De Laval Separators we found it necessary to replace all other makes with the De Laval and this proved one of the best investments that we ever made.

During the years 1901 and 1902 the hand separators came into very general use and our thousands of patrons naturally looked to us for advice as to the most efficient and most durable separator for them to buy. Realizing the necessity of preventing, if possible, the sale of the so-called "just as good" and "cheap" separators we secured the agency of the De Laval. With the wonderful record back of the De Laval machine, together with the positive proof we could show by actual demonstration, we were able in a few years to sell from twenty-five to thirty thousand of the De Laval Hand Cream Separators, and we are pleased to say that they have given universal satisfaction and are still in use, while most of the so-called "cheap" separators that a few of our patrons were foolish enough to buy have found their final resting place in the scrap pile.

At the present time we are not agents for any hand cream separator, but for the future good of our own business as well as the dairy industry, we are naturally anxious to see every dairyman who buys a hand separator buy the machine that will prove the best investment in the long run, and wide experience has taught us that when it comes to efficiency, durability and hard knocks the De Laval Hand Cream Separator easily stands in a class by itself.

Salute the Colonel.

Hereafter it will be Colonel Edward L. Hart, representative from Buchanan county. He is really and truly a colonel, too.

Tuesday Hart called at the executive's office and while there talked with Lieutenant Governor Gemelich, and asked him in a joking way to make some appointments.

"All right," replied the lieutenant governor. "I'll make an appointment right now. Governor Hadley has left the state and took with him all the colonels. I have to be governor here for a whole week without a staff. I want just one colonel and am going to appoint you for a term of seven days."

So that is how it happens he is now Col. Hart.

News of Mr. Hart's military recognition became circulated about the capital. Monday when Mr. Hart addressed the speaker, Mr. Speer responded: "The gentleman from Buchanan, Col. Hart."

When the Buchanan statesman comes up to Holt to "Home Coming Day," it must be understood that he is to be greeted as "Col. Hart," "Ed." don't go any more.
