## Arkansas Lands.

Arkansas, the state of opportunities. Don't you want to own a piece of land that will make a good farm and pay handsome returns on the investment? You can get land in Southern Arkansas, where water is good, healthy locality, free from our cold Northern winters, at \$5.00 for cut-over land, and \$20 for cheaply improved farms. Make two kinds of crops on same land in one year.

## How Much Do You Know

About Our Flour? It may interest you to know where the Flour we are selling is made. Our PEOCOCK Brand is made by the Shellabarger Mill & Elevator Co., who have a large mill in the East and one at Salina, Kansas, where our's comes from. The other day one of our friends who buys this flour of us was telling about the large mills where it is made and stated the fact--owing to the largeness of the mills they are able to buy the best wheat, therefore make as good Flour as any and better than some.

## We are bringing the Southwest to you!

There isn't a farmer in this whole section who hasn't heard of the big farm opportunities for him in the Southwest where lands are cheaper, richer, and where the growing seasons are longer and climate milder, insuring greater returns to the acre.

But many of you just couldn't spare the time, thus far, to make the trip; yet you are eager to know more about the Southwest.

For your special benefit the St. Louis, Southwestern Railway (Cotton Belt Route) has gathered the most complete exhibit of the Southwest's crops—products from Missouri, Arkansas, Northwest Louisiana and Texas—put them on a special car and is bringing them to your home town—to show you. We will also give you free books on the Southwest.

This exhibit and these books are the next best thing to an actual trip Southwest—and they are all free to you. Don't be the one farmer who failed to go. This exhibit will be at
