#### Woman in Civic Work.

To its women in a greater degree than to its men, does the city look for leadership in movements, for not only its aesthetic development, but as well in many lines of its material advancement. Perhaps the men are too busy with their own affairs to note the many needs of the city, but the women, "whose work is never done," we are told, come forward to supply that civic alertness missing in the sterner sex. Fortunate indeed was Oregon, Mo., when a few weeks ago the "Women's Union" club, said to be the very first ladies' club organized in Missouri, banded together into a city council to aid in local civic work and to influence public opinion for needed legislation. Realizing the season of outdoor activity along civic lines was near at hand, the "Women's Union" set aside \$100 to be used at the discretion of the Civic committee, which is composed of Miss Mary Zook, chairman; Mrs. J. T. Thatcher, Mrs. Geo. Murray, Mrs. T. C. Dungan, Mrs. J. C. Whitmer, Mrs. A. VanBuskirk, Mrs. C. J. Kooch. The Union voted \$30 of the \$100 to be given for prizes—the best-kept lawn to receive the largest prize. The work for which the other prizes will be given will be published later.

member of the Union was solicited for two trees, and Mr. and Mrs. George Murray responded to the city-beautifying movement most generously. They donated 40 trees, and shrubs and vines enough for the Court Yard. Miss Mary Zook and Mrs. Thatcher started out early on the morning of the 14th with an expert tree planter, they superintending the placing of the trees. From campaigns for tidiness of streets and yards, their endeavors have included civic instructions in the school, each class planting a tree in the school-yard with appropriate "Arbor-Day" exercises. The coming season promises to be a banner one for the ladies of Oregon, for this Clean Up and city-beautifying movement the men have practically shifted to their shoulders. Women's Work in the community deals with those things which make life more worth living. It seeks to provide comforts, health, recreation and the means for happiness. It develops education and elevates the city and thus elevates society. Women as home-makers, make home happier and brighter, an influence felt beyond the family circle; as city makers they make the city brighter and happier, as well, with its influence upon the general human and social welfare. The hope can only be expressed, that the women will have more co-operation from the men in their civic work.
