Speaking of goats, could the imported variety be described as a butterfly?

Well, if the worst happens the goat can go into vanderbilt and get \$200 a week.

Some female colleges have adopted the football game, but they don't play in company.

It is said that a prima donna's voice calmed a storm at sea. Probably the storm gave up in despair.

College girls at Cleveland were discovered playing poker. This may have been the class in applied society.

A Chicago professor advises young men to make friends. This is certainly better than to make enemies.

Admiral Train might have avoided all trouble if he had claimed that he mistook that Chinese lady for a deer.

For several reasons the disappearance of Poldonostoff's name from the public prints will be a welcome relief.

It is estimated that \$20,000,000 is spent annually for silk hosiery by women who fear that they may figure in a wreck.

When "heart words" can be bought for a cent a column, who will be so unfeeling as to refuse to indulge in a few throbs?

There are reports of revolution in Astrakhan, and the curly coats will be high in price this winter, as they are every winter.

At Baltimore a city official protested against having his salary raised. He evidently believes it is worth good money to be advertised.

An Eastern man has had five bullets cut out of him and is still able to take nourishment. If he lives long enough he will be a human sieve.

Sir Thomas Lipton is going after that cup again. He realizes that advertising is a waste of money unless you stick to it persistently.

The comment is made that King Alfonso is taking a long time to pick out a wife, but all married folks will agree that that is the wisest way.

So Lady Hartopp is to marry Earl Cowley, who was the correspondent in her divorce suit. Having had the game, she insists on the candle.

There is really an uncomfortable condition in the relations between Germany and Great Britain. Each nation is trying to govern its tongue.

An "entertaining conversationalist," child, is a person who says a lot of things that agree with what you think, but which you cannot remember.

Sir Henry Irving changed the name to which he was born to one more to his liking, but he would have made any name illustrious.—Boston Transcript.

The wise farmer will cut plenty of cord wood this winter. Then he will have plenty of dry cord wood to sell next winter if there is a coal strike in the spring.

Perhaps the man who declares that most voices sound snappy and disagreeable over the telephone has been asking his acquaintances to make him a small loan of \$10.

The president of San Domingo has ordered printed 5,000 copies of Wagner's "Simple Life" for distribution among the people. It may encourage the natives to wear a shirt.

Julian Hawthorne is authority for the statement: "Very little that is really worth remembering is said or thought after midnight." And Mr. Hawthorne is a married man, at that.

Reports from Sofia say that "a lady hand" is operating in the Caucasus. She is foolish for operating where money is so scarce when she might come over here and have a booth at a charity fair.

A little boy gave as his reason why there are no men angels, "You don't see any of them in pictures wearing pants." That ends the discussion—paint an angel with pants—and be arrested for lunacy.

President Loubet politely went to the bull fight in Madrid, but came away after the first bull had been killed. If it had been a baseball game, now, he would have staid right through till the end of the eleventh inning.

Down in Massachusetts a woman has been taking up a collection among her friends for the purpose of raising money enough to secure a divorce. If the man in the case doesn't feel cheap we may be safe in concluding that the lady deserves freedom.

POLICE HELP JEWS

ST. PETERSBURG WORKINGMEN TO AID THE HELPLESS.

MANY FLEE FROM CITY

Workingmen May Renew the Strikes and Will Demand An Eight Hour Day—Will Run the Country.

ST. PETERSBURG.—Nothwithstanding the alarming reports that have circulated to the effect that plans have been made for a St. Bartholomew massacre of the Jews of this city. The police and troops have the situation well in hand and apparently will be able to prevent outbreaks similar to those that have occurred in Odessa.

While ample protection has been promised Hebrews they are panic stricken and are taking no chances by failing to take precautions to save their lives.

Gen. Dedulin, the prefect of police, has given orders for the arrest of any person found posting anti-Jews placards or attempting to incite the populace to a massacre of the Jews. Every sign shows that the police and troops will be able to stamp out any disorders at the very inception.

The Jews have made preparations to defend themselves in case they are attacked. The workingmen of the city have also taken steps to prevent the threatened massacre of Jews. At a recent meeting the workingmen resolved to take upon themselves if need be, the protection of the classes against whom the massacres are to be directed. They have organized themselves into detachments to guard the various sections of the city in the event any outbreak.

To Demand Eight-Hour Day.

At same meetings of workingmen that resolved to protect the Jews decided to fight for the granting of their demand for an eight hour working day, notwithstanding the fact that their employers have decided that they will close down their factories and business houses if the demand is made.

PRINCE LOUIS IS VERY MUCH MISTAKEN

NEW YORK.—The statement of Prince Louis of Battenberg that New York is vulnerable to naval attack was pronounced absurd by the naval officers at the Brooklyn navy yard.

The harbor of New York, they declare, is one of the best protected in the world and could resist the assault of the combined fleets of any two nations. One of the high naval officers said:

"Prince Louis, I am sure, is not acquainted with our fortifications or he would not have made the statement when it is credited to him. From Sandy Hook we could successfully resist the biggest fleet in the world. The big 12-inch guns and 10-inch mortars could keep up such a terrific rain of fire that the enemy could not possibly approach within firing distance of the city. Further up we have Fort Hamilton and Fort Wadsworth, equipped with the latest and largest guns that are made. The approach from the sound is protected by Fort Slocom, Fort Wright, Fort Totten and Fort Schuyler. Imagine the havoc which the concentrated fire of these forts would work.

"Even if a fleet which entered the harbor as a friend suddenly became hostile, we could make short work of it with the submarine and torpedo boats which are always in readiness at the navy yard."

Brigadier General Frederick D. Grant, a commander of the headquarters of the East said:

"In the first place it would be impossible for a hostile fleet approach the points where the squadrons are at present anchored. New York is so well fortified that the fleet of an enemy could not approach within twenty miles of the city."

VIEWS A BASE BALL GAME

been filed in the court of Justice Over the Game and What Be Law.

As the boat came alongside the landing flying pennant of the British admiral, a hearty welcome awaited the prince. A landing was immediately effected and a friendly occupation of the American army followed.

The Britishers saw the academy at its best. The beautiful spot was never more beautiful, the cadet corps never drilled better, and the prince was especially interested in the hotly contested football game between the cadets and the Carlisle Indians.

The distinguished visitor and his officers returned to New York at night delighted with all they had seen.

BRITAIN AIMS HARD BLOW AT KAISER

LONDON.—The Observer will say that Britain will offer Russia the Bagdad railway and will even lend financial help for its completion. This will not only afford Russia its long desired outlet to the Persian gulf, but will assure Russia's economic predominance in Asia Minor, enabling German ascendancy in that region. Britain will not permit forifications on the Persian gulf, but will submit the agreement to the other powers for assent.

By handing over Constantinople to Russia, Britain will finally announce its approval of a Pan-Slavist confederation in the Balkans under Russian hegemony.

Britain's remuneration for these vital concessions will be the renunciation by Russia of all its ambitions designs in Afghanistan, Tibet, India and Central Asia in general.

Another week has ended notably for its speeches regarding Britain's foreign relations, wherein the striking uniform omission of any reference to Germany has again been the most significant feature.

LATE RETURNS FROM OHIO.

The Election of All Republicans Except Herrick Undoubtedly True.

COLUMBUS, O.—Late developments have cleared up the post-election situation in Ohio considerably. Suggestions, the committee states, should be expressed in the form of amendments, accompanied by the reasons therefor.

NO PADDED BILLS IN THIS CONGRESS

WASHINGTON.—When the appropriations committee of the house begins its annual grind on the appropriation bills this winter it will find something refreshing to its state of mind. The change in the situation from that of last year lies in the fact that department heads are making an honest effort to hold down their estimates and appropriations, and that, in a great many instances, these estimates are actually going to be lower than those of last year.

The departments and congress appear to have entered at last upon the right road to understand each other. Padded estimates have made trouble for both ends of the line. They encourage extravagance in the departments, multiplies the treasury and makes possible the kind of all kinds congress. A demand for actual expenses, every item of which can be explained and approximated, will go far toward clearing up the general atmosphere around appropriation bills. Further more congress will most likely meet the departmental heads half way in an endeavor to be thoroughly honest with each other.

BREWERS SEE THE PRESIDENT.

An Effort to Keep the Prohibitory Clause Out of the Statehood Bill.

Czar Gave in to Abolishment of Office of Governor General—Trepoff Guards the Emperor.

ST. PETERSBURG.—The series of consultations which Count Witte has been holding with Constitutional Democrats and even with the representatives of the conservative wing of the semestrovists, convinced him that it was useless to hold out longer if he was to continue seeking to secure the sympathy of the parties of the center. He therefore practically promised an immediate extension of the suffrage to include all classes of the population. The suffrage in the cities will be direct, and among the peasants indirect through a single set of electors.

Even upon these conditions, however, the Constitutional Democrats have finally decided definitely not to hold office in the present ministry. They take the high position that the ministry is only temporary, lasting until the national assembly or constituent assembly meets, and they refuse to accept office until it is demonstrated that they have the support of the majority.

Trepoff Is Out.

General Trepoff has been removed from the powerful position he occupied, that of governor general of St. Petersburg and assistant minister of the interior.

Count Witte has been fully aware of the intense hatred General Trepoff's retention in office was causing and recognized the necessity of Trepoff's removal and the governor general himself agreed that only his retirement would appease the popular wrath. The position of governor general of St. Petersburg ends with Trepoff's retirement, but the place of commander of the imperial guard has been assumed by the Grand Duke Nicholas.
