Mortimer & Campbell, Barre, Vt.

Dear Sirs: You ask how many square feet a gallon will cover. Depends on condition of building.

There is a great deal of lying on this point. The stock claim of lying paints is 300 square feet, two coats: It's a lie, as a rule.

Devco covers 200 to 300, our agents think. We think 300 too low and 500 too high; though doubtless, they both occur.

How much do the other paints cover is equally doubtful; we guess 100 to 400.

The truth is found in "another comparison. Devco is all paint, true paint, strong paint and full measure; the others in general are, at the best, diluted, adulterated and short-measure. They cover according to body and measure. You can't paint with clay lime chalk sand barytes water or air—no body in them. Go by Devco.

Yours truly, F. W. Devco & Co., New York.

P. S.—Reynolds & Son sell our paint.
