Published Every Weekday Afternoon.
Entered as second-class matter.

SAURDAY, AUGUST 15, 1903.

The average daily circulation of the Barre Daily Times for the week ending Saturday was

2,716

copies, the largest paid circulation of any daily paper in this section.

The American Newspaper Directory is an annual directory of newspapers and their circulations. To secure a statement therein the publisher must furnish a signed detailed statement of a year's issues. Printer's Ink, a weekly journal issued by the directory publishers, in its issue of August 5, contains the following:

"In the latest issue of the American Newspaper Directory the circulations of the two daily papers of Barre, Vermont, are rated as follows:

Telegram, 5,727.
Times, 2,716.
No one doubts the accuracy of the Times rating but it has recently been made apparent that the Telegram rating is fraudulent."

The world is safe once more. The heavy weight pugilists had their innings at San Francisco last night.

The town of Bellows Falls is to put five new steel cages in its jail in the town hall. How the ammunition of the anti-license people does accumulate! But up to date not one has taken advantage of this fact.

The fact that plain, slimy, dirty mud has been found to have unexpected heating attributes does not make it any more valuable on the main thoroughfares of a city. At least Barre does not consider itself any richer therefor.

C. A. Prouty, the well-known Newport lawyer, considers that the chances for young men, and particularly for young lawyers is as good as, and probably better than those offered in the West or in the large cities. In the course of his address to the Vermont Bar Association at Newport recently Mr. Prouty laid particular emphasis on the chances in Vermont, and his conclusions, as expressed in the following, are of interest: "In the last six years my duties have taken me into every state and territory in the union, and I have gone in a way which has familiarized me to a great extent with commercial and social conditions. Meeting hundreds of lawyers from all parts of the country I have inevitably contrasted their condition with ours; have almost of necessity inquired whether I ought not myself to have begun otherwise or elsewhere. As a result of this observation and reflection there has grown up within me an abiding conviction that were I obliged to do it over again and could exercise a conscious volition I would be born beside the placid waters of this beautiful lake, I would study law and I would practice my profession in Vermont."

The agitation for caucus reform which has been started so early is evidence that the people will not be denied. Vermont will have a caucus law and it is pretty certain that the next legislature will not adjourn until a satisfactory measure is enacted. Such agitation is timely until something definite and tangible shall have been accomplished. The hurried attempt of a year ago was the result of a call which on the part of the majority of the people of the state was of sudden origin. There had not been a general and persistent call until just previous to the assembling of the legislature, and if the truth be known, it is probable that the legislators themselves were not sufficiently versed in caucus laws and regulations as to intelligently discuss a measure, and much less to adopt one. Had the legislature, in its closing hours passed a caucus law it is likely that the measure would have been faulty in many respects. And on the whole it is a matter for congratulation that the attempt failed. Now, however, there is plenty of time to consider such measures as are in use and to formulate one suited for Vermont. Failure at the next session will not be received by the people of the state.

SPORTING NOTES.

Hugh Duffy of Milwaukee has a great player in Cockman, his third baseman.

H. L. Herbert, chairman of the Polo association, is now in Europe attending horse shows.

Claude, the great western Derby hunter, has won \$50,000 this season for his owner, Michael Daly.

Jesse Tannehill is pitching fine ball and batting way over 300. Too bad the rest of Griffith's New York Americans can't imitate him.

Ed Hanlon says that Jones of his Brooklyn team is the "fastest man on his feet in the National league and willing to run a match with any ball player for 100 yards."

Boralma, 2:07, was recently exhibited at the Camden (Me.) track. He was driven by Grant Paige, but was not stepped a mile, only being driven at a stiff jog through the stretch.

James E. Sullivan of New York, who was recently appointed director of sport for the coming St. Louis exposition, held the same position at the Pan-American exposition. He is the leading American authority on athletics.

THE ROYAL BOX.

The new king of Serbia is a man of excellent physique. He is a good but not an expert fencer.

The Infanta Eulalia of Spain has accepted the honorary presidency of the Universal Alliance of Women For Peace.

King Charles I. of Roumania, who recently celebrated the thirty-seventh anniversary of his coronation, is described as "one of the wisest and most beloved monarchs of the time."

A correspondent of the North China Daily News who recently had occasion to see the emperor and the empress dowager of China describes him as looking lean, melancholy and thin, while she, with her square face, elongated eyes, double chin and rosy color, looked like an energetic, vivacious woman.

ABOUT THE STATE.

Items of Interest Gleaned From Our Exchanges.

Floyd Bixby, son of George K. Bixby of Chelsea, while cutting a stick let the knife slip in some way, making a deep incision in his leg. The wound was three inches long and across the leg above the knee and required three stitches to close the gap. Dr. Godfrey dressed the wound.

Col. H. J. Kimball of Randolph, has arranged for the erection of a granite monument on the old family lot in Southview cemetery as a memorial to his father and mother and five brothers who are buried there. Harry Bertoll of Montpelier was in Randolph Friday to build the foundation.

Last summer while haying Fred Burnham of East Calais, lost his pocket book containing several dollars in bills and silver. While in the field raking hay recently, he raked up the purse where it had lain all this time. The bills were ready to drop to pieces but could be readily identified.

The Bethel tannery is doing a good business and is now employing about sixty hands. Its product meets with favor. One of the most experienced buyers in the market recently stated that the finest splits ever seen on the market came from the tannery of E. C. Fisher & Co. at Bethel. As a result of his observation, he has placed a large order with that firm and it has decided to take the order.

The funeral of the late Frederick McCarty, the young man who was suffocated in a cell at the Lafayette lockup at Winoski Monday afternoon, was held from St. Stephen's church Thursday morning at 9 o'clock and was largely attended by friends and relatives of the deceased. Requiem mass was celebrated by the Rev. J. Hand, and the interment was in St. Joseph's cemetery, Burlington. Iroquois Camp, No. 8,940 M. W. A., of which the deceased was a member, attended in a body.

Moore Page of Westville, one of the oldest residents of the town, and well versed in the customs made necessary in the early day of the town, has yearly pursued the work of hiving bees. He has been very successful, but probably no more so than last week Friday and Saturday. Last Friday he went to the farm of G. W. Merritt in Topsham, and in company with Mr. Merritt they started a swarm and in about an hour and a half located it in a tree on Mr. Merritt's farm. They cut the tree down and took out 75 pounds of as nice wild honey as ever was captured.

DAMES AND DAUGHTERS.

The resident physician at the Royal Free hospital, London, is Miss K. Chamberlain, niece of the British colonial secretary.

Dr. Edith B. Blackwell is spending the summer with her mother, Rev. Antoinette Brown Blackwell, at Chilmark, Martha's Vineyard, Mass.

Mrs. Orniston Chant of England, who is interested in the social purity movement, is at Chautauque, N. Y., where she will spend the summer.

A young woman at a Chicago hotel registered her name on the hotel book in red ink the other day. Her name was Mrs. Henry Blood of New York.

Mrs. Elizabeth Custer, widow of the general who was killed in the massacre of Little Big Horn, is in Washington trying to secure a pension and government employment.

Mrs. Elizabeth T. Rogers, who died at Pasadena, Cal., a few days ago, made a bequest of \$500 as a Santa Claus fund for the Unity Sunday school of Hartford, Conn.

Miss Grace A. Stayt of Chicago and Miss Myrtle Sherer of Galva, Ill., have been respectively chosen dean of women and director of athletics for women at Knox college, Galesburg, Ill.

The widow of brave Bill Anthony, whose ebullience the night that the battle ship Maine was blown up in Havana harbor made him famous, has been given a clerkship in the permanent census bureau, with a salary of \$300 a year.

Dr. Mary Foulton, to whose efforts is credited the establishment of the first medical college for women in China, which was opened recently, is now visiting her old home in Richmond, Ind. She went to the orient nineteen years ago as a medical missionary.

SARTO AT VENICE.

Pope's Influence There Arose From Contact With the People.

Thousands of Venetian workmen while rejoicing in the triumph of Giuseppe Sarto in the conclave at Rome deeply regret that his genial presence and helpful ministry will be known in Venice no more, says the Chicago News. The great cathedral where Sarto presided is frequented by his shepherdless flock. The people assemble beneath the quincunx domes and kneel with bowed heads, anon lifting up their eyes to the pulpit whence their archbishop was wont to launch many stirring appeals to the conscience of Venice.

This scene is a forcible reminder of the character, methods and power of the new pope. He believed first of all in close human contact with his people and then in the efficacy of magnificent church decoration and striking ceremonial for the promotion of an elevated state of soul. He thoroughly enjoyed the splendor of the cathedral of St. Mark and witnessed with satisfaction how its spaciousness and beauty affected the worshippers. He was wont to organize special services involving dramatic elements.

On St. Mark's day, before 6 o'clock in the morning, the cathedral was always filled with an eager multitude. Large gondolas brought boat loads of workmen from the different parishes in the city to the landing steps on the Grand canal. Each parish formed a procession, with the parish priest at its head in his black cassock singing the litany. One procession followed another into the church and up to the chancel steps, where each in turn broke ranks. The impouring of these processions continued until St. Mark's was packed almost entirely with workmen and their spiritual leaders.

Then Cardinal Sarto, gorgeously arrayed, mounted the pulpit and preached a sermon. His natural eloquence made doubly effective the inculcation of lofty ideals of private morality, patriotism and civic duty. His sermons were always punctuated with applause. Nobody could overlook the close sympathy between the preacher and the people. It is thought in Venice that such a leader will breathe a new spirit into the papacy which will revive the most remote disciples of the Catholic faith.

NEW KIND OF MONEY.

Novel Paper Will Make Bank Notes Flexible as Silk.

Treasury officials are much interested in experiments now in progress with a new kind of paper to be used in national currency, says the Washington correspondent of the Philadelphia Press. Mr. E. H. Fowler, chief draftsman of the coast and geodetic survey, and D. N. Hoover, chief printer of the bureau of engraving and printing, have invented a chemical treatment for paper that is said to render it soft and velvety and to make it absolutely nonshrinkable. If adopted the process will alter the character of paper money, and instead of the stiff, crisp, crackling bank note paper currency will be soft to the touch. It is claimed that sixty days' less time will be required to manufacture bank notes under this process than under the present method, a very important consideration when a supply of bank notes is required in a hurry.

Under the present process of printing paper money the paper has to be thoroughly soaked in water. While in that condition one side of the bill is printed. The sheet is then placed in a steam room and kept under a high temperature for thirty days. It is again soaked and the reverse side of the bill printed. Another thirty days' drying process is then required. Where a third impression on a bill is necessary, and that is required when printing is done in two colors, this wetting and drying process must be repeated and another month consumed in its production. The new process does away with the soaking of the paper in water. There is no shrinkage of the paper either, and that is regarded as a valuable improvement. There are a few details regarding the methods of applying the new preparation to paper yet to be worked out, but the treasury officials believe that it can be applied successfully, and it will not be expensive.

Antiquity of Embroidery.

Embroidery has a great antiquity and an authentic record extending back to the Phrygians, but the Sidonians excelled in the art, and it is mentioned in 1491 B. C. The first embroidery machine is said to have been invented by John Duncan of Glasgow in 1804.

THE WRITERS.

Sir A. Conan Doyle's first accepted story was written by him at the age of nineteen and brought him 3 guineas.
George Brandes has joined Bjornson in his efforts to bring about a better understanding between Norway and Sweden.

Frederic Masson, who has just been elected a member of the French academy, is famed as one of the greatest living authorities on Napoleon.

Charles Dumas, who has been honored by the Society of Men of Letters of Paris with the Sully-Prudhomme prize, which is equivalent to being made poet laureate of France, is a young man just out of his teens.

Memorial to a Squaw.

The women of Oregon have formed an association for the purpose of erecting a statue of Sacajewea at the Lewis and Clark Centennial exhibition, says the New York Evening Journal. Sacajewea was an Indian woman of the Shoshone tribe who was of great service to the explorers Lewis and Clark. She smoothed their way with her own tribe and with the Flatheads and Nez Percés and procured ponies for them at a time when they would have been forced to abandon the expedition but for her assistance. She acted as their guide, and it was said of her that she had the instinct of a homing pigeon in threading the wilderness. The proposed memorial will cost \$3,000.

Shad Pike a New Fish.

An important and successful experiment with fish has just been made by the United States fish commission, says a special dispatch from Milford, N. J., to the Philadelphia Press. By impregnating shad eggs with the milt of wall eyed pike another variety of fish to be known as shad pike has been produced. The fish are said to be delicious eating.

Slam to Use the Guillotine.

A guillotine has been ordered by the Siamese government from Paris, says the Chicago Inter Ocean. Hitherto the method of beheading a criminal in Siam has been with a blow from a sword while he simply kneels with his head bent.
