English Farm Machinery. England makes but a third of the machinery used by its farmers.

Philip Stubbs, the famous Puritanical writer, 1593, states:

"Shirts, twenty and even forty shillings, and some as much as five pounds apiece, and what is horrible to hear, some even ten pounds apiece."

Today, for \$1.00, we can give you a more satisfactory shirt than Phil ever saw.

season. The owner is now erecting a barn and coachman's house on the premises. It is expected that Mr. Lincoln will begin building his new residence near that village early in the spring.

The state board of railroad commissioners desire more room in its headquarters at the state house at Montpelier and Sergeant-at-Arms Brock is to remove the partition between the offices of the state geologist and the railroad commission, throwing the two together.

JINGLES AND JESTS.

Ugly Thins. "My husband never speaks a cross word to me." "How long have you been separated?"—Cincinnati Commercial Tribune.

Henpeck Speaks. Friends, here's a truth that is as clear As it is deep: How can a fellow's wife be "dear" While "talk is cheap?"—Philadelphia Ledger.

Not That Kind. Church—Her grandfather was a skipper, and he settled in Canada. Gotham—Indeed! How much did he get away with?—Yonkers Statesman.

Too Much Repetition. "With hash and stew and potato," "Crisp butter Number One," "This long roast beef ever Is being overdone."—Philadelphia Press.

A Poor Artist. "No, Willie; I couldn't advise you to enter art. Why, me paint costs me 90 cents a bucket and sometimes the picture don't bring more'n 10 cents!"—Chicago American.

In the Autumn. There is something in the autumn sets my gypsy blood astir. When the partridge and the plover's sporty wings are all awhirl; With the purple and the scarlet and the yellow of the leaves, While the fertile fields are freighted with the pumpkins and the sheaves.

When, within the witching woodlands, turtle doves are sadly calling, And the leaves of red and russet from the trees are sadly falling, Touched with fervent farewell kisses by the autumn's am'rous mouth, And the swallows have departed to the summer of the south!

When the grass has left the meadow and the green has left the hill, And the only feathered songster is the plaintive whippoorwill; When the apples in the orchard and the sumac's leaves are red, And the quails are loudly piping in the stubble where they feed!

Oh, the brilliant autumn season, the most brilliant of the year, When the gorgeous groves are gleaming and the leaves begin to sear; When the maple boughs are crimson and the hickory's leaves are gold, And the days are sultry summer and the nights are wintry cold.

When the river is blue as steel and the sky is clear as glass, And the mist is on the mountain and the hoarfrost on the grass; When the harvest is all garnered and the farmer's work is done, And the hillside are resounding with the pointer and the gun!

—David J. Evans in Washington Post.

Finger Nails. Lemon acts on the finger nails with a wonderful effect. It seems to polish them, at the same time softening the skin around them marvelously and removing any traces of ink, fruit or stain. Brushing is said to roughen the nails, and the brush should be used only when necessary.

The Grain Weight. By an English law passed in 1299 it was provided that a silver penny, called a sterling, should equal in weight thirty-two wheat grains, well dried and taken from the center of the ear. This is the origin of our grain weight.

Ladies' sample suits at Abbott's at sample prices.

Rexall Compound Syrup Hypophosphites. This is an invaluable medicine and tonic for all wasting diseases. It supplies physical strength, stimulates the appetite and tones up the entire nervous system. Price, 85c. Red Cross Pharmacy.

Equal Distribution of Space! Now Listen to This!

A perfect Shoe should contain not a single particle of space more than necessary, otherwise the Shoe becomes large and ungainly. The Dorothy Dodd Shoe leaves more space for the foot than any other Shoe we know of, yet the Shoe itself is absolutely smaller than the ordinary Shoe. That is because it equally distributes space.
