If anyone deserves a raise in pay it is the operators in a telephone exchange. The workers before the board in the local offices are to be congratulated on their increase.

It is not surprising that the city council has decided to wait a week before purchasing a lot for a central fire station, especially when such costly lots are being considered.

There is no regular policeman on duty in the village of Northfield now, and the News reports that liquor selling is being carried on to a certain extent. In view of the situation the latter state of affairs is not to be wondered at.

ROADS BUILT UNDER COMPETENT SUPERVISION.

The results of good road building by a state and under the supervision of a competent engineer have been seen in New Hampshire. Recently a gathering of automobilists was held in the mountain region of that state and automobilists went there from all parts of New England and New York. Accustomed to good roads in their own states these men were loud in their praise of the dirt roads of New Hampshire, some declaring that the highways were as good as those in the Massachusetts highway system which is notably excellent. And these New Hampshire roads which are good for the automobilists are good for any kind of travel. These roads were mainly built at state expense and within the past two years have been kept in good repair under a skilled engineer who is a state officer and who is working with state funds. It is largely due to this fact that the roads were so satisfactory to the automobilists. The Concord Monitor says that the praise is "a splendid endorsement of the policy which was adopted by the last legislature in highway matters and which, if continued and made to apply in every section, will soon result in giving us a complete network of good serviceable dirt roads all over the state, inexpensively built and cheaply maintained, and yet alluring enough to bring here a hundred automobile travelers where one comes now."

Similar to this New Hampshire method, regarding state supervision of money expended by the state in building roads, is the scheme proposed by those interested in good roads in Vermont. The results would be equally satisfactory in Vermont as in New Hampshire.

ABOUT THE STATE.

Albert Gordon of Alburg, aged eleven years, who underwent an operation at the St. Albans hospital for the amputation of his left leg half way between the knee and the thigh, as the result of being run over by the cars at Alburg Monday morning, died yesterday morning at 5 o'clock. The body will be taken to Alburg.

At a special meeting of the Island Pond Business Men's Association, called for the purpose of discussing the advisability of the town owning its own water system, a committee of three was appointed by the president to formulate some plan of action, which after a recess reported it had obtained legal advice, and would recommend that the association do all in its power to have the town own a water system. A committee of three was thereupon appointed to circulate a petition asking the selectmen to call a special town meeting.
