NORTH POLE NOT REACHED

But Peary Planted Banner Farthest North

OF ALL THE EXPLORERS

Intrepid American Went to 86 Degrees and 6 Minutes and Was Then Compelled to Turn Back on His Course.

New York, Nov. 3.—The United States now hold the record of "farthest north" 87 degrees 6 minutes. This feat was accomplished by Commander Robert E. Peary, of the United States navy. The intrepid Arctic explorer failed to reach the North Pole as he had confidently hoped to do with his specially constructed vessel, the Roosevelt, but he penetrated nearer to the pole than the Duke of Abruzzi's expedition, which had held the Arctic record, 86 degrees 34 minutes. What Commander Peary did and his experiences during the past year in the frozen north are briefly but vividly summarized in a communication received last night by Herbert L. Bridgeman, secretary of the Peary Arctic Club. This communication follows:

Hopedale, Labrador (via) Twillingate, N. F., Nov. 2.

To Robert L. Bridgeman: Roosevelt wintered north coast Greenland, somewhat north Alet, winter quarters. Went north with sledges February via Heekla and Columbia. Delayed by open water between 84 and 85 degrees. Beyond 85 degrees, Gale disrupted ice, destroyed caches, cut off communication with supporting parties and drifted east. Reached 87 degrees 6 minutes, north latitude over ice, drifting steadily eastward. Returning at eight dogs. Drifted eastward delayed by open water reached north coast Greenland in straightened conditions. Killed musk oxen and returned along Greenland coast to ship. Two supporting parties driven on north coast Greenland. One rescued by me in starving condition. After one week's recuperation on Roosevelt sledged west, completing north coast Greenland and reached other land, near 100th meridian. Homeward voyage incessant battle with ice storms and headwinds. Roosevelt magnificent ice fighter and sea boat. No deaths or illness in expedition. (Signed) PEARY.

In an interview before he left New York, Commander Peary expressed great confidence in the success of the venture. He explained that nearly all the men accompanying him were members of former Arctic expeditions and thoroughly familiar with the work ahead of them. He continued:

"This is my ninth trip to the Arctic, and barring sickness and other contingencies, I will give the pole the hardest try it has had yet. I bring with me three strong parties in my favor: First, the Roosevelt, the most powerful Arctic boat ever built; second, my knowledge gained by 10 years in the Arctic and third, my knowledge of the Eskimau and how to handle them. I asked what I could do if I found the pole, Mr. Peary said: "It will open up three million square miles of absolutely unknown regions that have been separated from the rest of the world for countless ages." The previous record for the point nearest the pole was made by Captain Dogni, of the take of Abnazi's Russian expedition who reached 85.54 north, or within 237 statute miles of the pole. The point reached by Peary, 87.6 places him about 203 miles from the pole.

CRAZED BY DRINK. He Jumped From Boat and Was Drowned.

Merrimack, N. H., Nov. 3.—John O'Keefe, a cigar maker in the Sullivan factory in Manchester, committed suicide by drowning in the river opposite this town last evening.

He was crossing the river from the Littlefield farm, in a boat, accompanied by Albert Reed and a Mr. Lodgett. When near midstream he arose in the boat and began to act in an insane manner. He was told to sit down but instead of obeying he jumped overboard.

When he got loose from his grasp he ran to the other end of the boat and dived off dead first as though going for a swim. He came to the surface and swam away from the boat, finally sinking.

When the medical referee arrived and viewed the body, a search of the pockets revealed a cigar maker's union card bearing the name of "John O'Keefe." Another card showed that he was a member of the Aerie of Eagles at St. Albans, Vt. Letters from Toronto, Ont., signed "O'Keefe," were also found in his pockets.

"O'Keefe, who stopped at the Old City hotel had been on a spree for some days. "The body of the medical referee, who was taken to Manchester, where it will be prepared for burial.

BRANDS METHODS "TYPICAL." Father of Brattleboro Water Bill Writes Public Letter.

Brattleboro, Nov. 3.—Town Representative E. W. Gibson does not take kindly to the proposition that the bill introduced by him in the legislature, amending the village charter relative to the water system, has stirred up in Brattleboro. In a public letter to the citizens of the village sent by him from Montpelier, yesterday he says:

"A desperate campaign, shrewdly planned and skillfully directed, is being waged to defeat your expressed desire. He enumerates the steps which those opposed to the measure have taken and says:

"These are typical corporation methods where it is desired to defeat the bill as the people for selfish ends. I trust the people of Brattleboro will not be moved by appeals and schemes of those who forgetting the public good, are trying to hold up the village and make its citizens pay an exorbitant price for a water system."

There will be 100 rooms, 40 of them with baths, and each room will be supplied with hot and cold water. The building will be equipped with elevators, both for passengers and freight.
