Your honor, Judge Scott.
The appetite is a-growing.
Although defeated, the Rev. Crapsey is still "scrappy."

Now that the city judge question is settled, Barre has one or two more problems to face.

The profits on liquor selling by the non-licenses are being materially cut down in these parts by fines and costs.

Down in Cambridge, in the Bay state, they are just getting back the wind which Yale knocked out three days ago.

If the jackies aboard the battleship Vermont are not pleased with our \$3,600 silver service, they will be queer jackies, indeed.

It would be surprising to learn that the calendar year of any Vermont board or commission contained more than 366 days, including holidays and Sundays.

When men and women of the same height have been compared it has been found that the tongue of the woman is the smaller. But the product thereof—what of the comparative size?

If this means anything, it means that the "debrutalizing" rules of the game are less fatal than formerly. These rules have had their most complete exploiting in the colleges and the least in the high schools. When they have been given a good trying out in the high schools we may look for a further decrease in the fatal accidents.

Rhode Island is the next one of the New England states to take up the discussion of abolishing the railroad pass, although the breadth of the discussion now includes only the members of the state legislature, in which a strange condition of affairs is revealed. It is said that the members of the legislature have been receiving free transportation from the railroad and that they have been charging up their mileage to the state just the same as usual. So they have been drawing two salaries, so to speak, the direct salary received from the state for their services, and an indirect salary from the railroad corporation, which hopes thereby to secure co-operation and active support when matters of concern to the railroad come up in the law-making body. If such conditions as this exist, there is no wonder that Rhode Island has been termed a boss-ridden state, for it appears that her most vital part is more or less subservient to the will of the railroad corporation. The legislators have sold themselves out for a song. Were condi-
