

### P. N. CORSETS

Some of the good features of the P. N. Practical Side Corsets. The extra side pieces make the breaking down of the Corset impossible. These side pieces can be removed from the pockets where they are set and reversed from time to time, insuring permanent shapeliness to the Corsets and adding to the lease of service. The cork steel protector used in all P. N. Corsets will keep the front steel from breaking and rusting. We recommend that you try a pair of P. N. Corsets. Prices: 50c, \$1.00, \$1.25 and \$1.50.

### CHELSEA.

Amos B. Wright is in Washington, where he went last week to visit friends.

Mrs. Perry of Bradford is in town, the guest of her uncle, John Corlies, at the Orange County hotel.

Fred E. Allen returned Saturday evening from a week's visit to friends in Barre City and Montpelier.

Rural Mail Carrier John Corlies was unable to cover his route on Monday, but made an attempt, however.

Albert G. Thurber of Corinth was in town on business on Monday, as was Frank C. Pitts of Vershire.

Walter Hoyt of Stratford was in town Sunday and Monday, the guest of H. N. Mattison at the Orange County hotel.

Mrs. Arthur Camp, who has been visiting her daughter, Mrs. Lewis N. Lucas, has returned to her home in Worcester.

Vinton A. Corwin, who came last week for a short visit to his old home here, returned Monday afternoon to Boston.

County Examiner John M. Comstock left Monday afternoon for Bradford, where he will hold teachers' examinations today and Wednesday.

Mrs. Frank Chandler and children of Tisbury were here the first of the week to visit the former's mother, Mrs. Nellie Alexander, at William M. Mattoon's.

Fred C. Waldo has recently bought of H. W. Dutton of Royalton a registered Holstein Friesian bull, "Statesman Lincoln Aggie No. 43482," one year old, for \$50.

Donald Comstock, who has been a guest of his parents, Prof. and Mrs. John M. Comstock, for a few days, returned to his studies at Dartmouth college on Monday afternoon.

Ben E. Sargent, who has been working in the bobbin shop, finished his labor there Saturday, and went on Monday to Manchester, N. H., where he expects to find employment.

The winter term of both the high school and the grammar school closed on Friday and Miss Olive Hanks, teacher of the grammar school, has gone to her home in South Randolph.

Mrs. Eunice Holt, who has been critically ill for several days, seems to be gradually failing, and her recovery seems doubtful. She is being cared for by Mrs. Emily Perkins and Miss Smith.

Fred L. Pray, who has been laid aside from work for two weeks with the grippe, has so far recovered as to return to duty, and Eugene H. Kennedy's blacksmith shop is again open for business.

Harry F. Bryant, after having been confined to the house for nearly two weeks with grippe and asthma, has so far recovered his health as to be able to resume his work of driving the South Royalton stage again on Monday morning.

Charles A. Luce of Lebanon, N. H., came Saturday evening, having been notified that the tenant on his farm, E. C. Holmes, was confined in jail. Mr. Luce will remain in town until some temporary arrangements are made with someone to care for his farm and stock.

On Saturday evening the messenger of death entered the home of the late Rufus Brown for the third time within six weeks, when Mrs. Brown passed away at the age of 82 years. About six weeks ago her son, Willie Brown, died after a lingering illness of several weeks, and about two weeks ago her husband, Rufus Brown, was taken from her, and although feeble at the time of her husband's death, she lost all courage and failed rapidly until the end came Saturday evening. Her maiden name was Olivia K. Waldo, and she is survived by two daughters, Miss Emma, who resides at home, and Mrs. C. D. Persons of Barre. The funeral will be held from her late residence on Tuesday and the remains will be placed in the tomb in Highland cemetery beside the remains of her husband and son.

Vinegar on Meats.

Vinegar is seldom used on meats, and yet it might be very wisely, for it has the properties of softening and even dissolving the muscular fiber. Take, for instance, meat that is very tough. Lay it in a deep dish, cover it with diluted vinegar, allow it to stand overnight, and the next morning it will be found as tender as possible.

St. Anthony.

St. Anthony is claimed to have lived to the ripe old age of 105 years on a daily diet of twelve ounces of bread and water.

Rome's Marble Houses.

Most of the so-called marble houses of the Rome of Augustus were not such in reality. The plasterer's art had then reached a high state of perfection and gave to stucco the appearance of the finest marble.

A Royal Almoner.

A royal almoner was an ecclesiastic attached to the ministerial courts who took from the royal table and gave to the poor the first dish that was brought from the kitchen. By common usage it was always a dish of plain meat, with no seasoning. Sometimes special dishes of odds and ends, the leavings of former repasts, were prepared to be brought in first.

Air and Sound.

A tuning fork does not sound in a vacuum because there is no air to convey the vibrations to our ears.

Oldest Thing in the World.

Mexican botanists believe they have discovered the oldest thing in the world in a cypress of Chapultepec, the trunk of which is 118 feet in circumference and the age of which is calculated as 6,200 years.

G. C. I. A. Meeting.

### FLOWER AND TREE.

Only young and healthy plants should be grown by beginners.

New Zealand has an ivy which, unlike ours, does not climb, but grows in tree form. Its name is the panax.

The gloss of a rubber plant is greatly increased by the use of a teaspoonful of sweet oil about its roots once a month.

The holly is found in almost every country. The largest holly trees are those of North America. The flex opaca has been known to grow to a height of eighty feet.

### Antidote to Poison.

It is a great thing to thoroughly understand what simple antidote to take if one is so unlucky as to swallow poison of any kind through mistake. Sweet oil is to be found in nearly every drug store, and half a pint of it, taken immediately, is an effective antidote to almost all poisons. Anybody with a strong constitution should take a larger quantity of this simple remedy.

### Saccharine.

Though saccharine, a product of coal tar, is 220 times sweeter than sugar, there is practically no nourishment in it.

### Steel.

At a mild red heat good steel can be drawn out under the hammer to a fine point, at a bright red heat it will crumble under the hammer, and at a white heat it will fall to pieces.

### Snakes.

Of all the creatures to be seen at zoological gardens snakes are probably the most easy to ship from one country to another. Snakes take very little room and throughout a long voyage give not the least trouble. They do not require to be fed nor do they require looking after in any other way.

## ROYAL Baking Powder

ABSOLUTELY PURE

Healthful cream of tartar, derived solely from grapes, refined to absolute purity, is the active principle of every pound of Royal Baking Powder.

Hence it is that Royal Baking Powder renders the food remarkable both for its fine flavor and healthfulness.

No alum, no phosphate—which are the principal elements of the so-called cheap baking powders and which are derived from bones, rock and sulphuric acid.

## WHY OUR CREAM BREAD HAS REAL VALUE

Probably every housewife knows how Bread is made in a small way, but we are often asked how Bread is made in large quantities, how we can always have it the same, if we don't have bad luck at any time, etc.

Making Bread is our bakers' business. Instead of making a small batch once or twice a week, under varying conditions, we are making it all the time, under scientific principles—even temperature, up-to-date machinery, a large, clean, airy bakery, good workmen and the best of materials.

The cut shows the mixer in which the dough is mixed, and this is the only way to get a perfect mixture and is much more sanitary than the old way of mixing in a box by hand. When the dough is mixed the lever to the left is pulled and the dough dumped into a trough and left to rise. It is then put on a large hardwood table and moulded and put in pans. After baking it is wrapped in wax paper, with real value in every loaf and is always the same.
