Royal Baking Powder Absolutely Pure

DISTINCTIVELY A CREAM OF TARTAR BAKING POWDER. Royal does not contain an atom of phosphoric acid (which is the product of bones digested in sulphuric acid) or of alum (which is one-third sulphuric acid) substances adopted for other baking powders because of their cheapness.

"UNIVERSAL" COFFEE PERCOLATOR

Makes better coffee because it does not require boiling water. All other percolators, destroys the flavor and brings out the unwholesome properties of the coffee bean. In less than one minute after heat is applied the automatic valve at the base of the tube forces the water—lukewarm, not boiling—up the tube on to the coffee in the filter cup, percolating through into the pot beneath.

It is by this method of constantly forcing the water through the coffee, while it gradually increases in temperature, that only the wholesome and nourishing elements of the coffee bean are extracted.

By the time the boiling point is reached the coffee is ready to serve—rich in strength and aroma for they have not been lost in steam—free from bitterness, for it has not been boiled.

Made of pure aluminum, four sizes, \$3.50 up. "Elite" enamel ware, colors, light blue and sage green, \$2.50 up.
