

LA RESISTA CORSETS!

JUST A WORD.

In order to justify popular approval a Corset must have four points of excellence—artistic designing, high grade material, skilled workmanship and hygienic construction.

The beauty of La Resista Corsets is apparent to all; we vouch for the quality of the material and workmanship; hygienically they are far in advance of any other make on the market.

In La Resista Corsets the old unsatisfactory boning is dispensed with and spirabone steel used exclusively. Spirabone steels are flat woven spiral steels. They take up no more room than whalebones yet have ten times the strength and durability. Whalebones only bend in two directions—spirabone bends in every direction, yet is sufficiently rigid to give an erect carriage and a graceful form. Spirabone is used in La Resista Corsets not as a substitute for whalebone, but as something infinitely superior.

The strongest recommendation for spirabone construction is the fact that those who once wear La Resista or Loomers' D. H. C. Corsets are never satisfied with any other make. They are so stylish and comfortable, they leave nothing to be desired.

La Resista Corsets from - \$2.50 to \$4.00 a Pair
Loomers' D. H. C. Corsets, 1.00 to 1.50 a Pair
(Only agents in Barre)
