A BLUE PAPER PERIOD.

Which Came of a School for Writing Short Stories.

A few years ago such a flood of manuscripts, all written upon a certain sort of blue paper, descended upon the Eastern magazines and periodicals that the hapless editors of these magazines simply sat back in their chairs in amazement. They were not quite sure whether it was the diabolical design of rival magazines, or whether some genius had chosen this method of revenge. The flood of blue paper manuscripts seemed to increase as the days passed. A few of the large magazines received more than their share, but there was not a periodical in the country which did not receive its blue paper as far as it could be seen. And the stories which were written thereon—good, bad and indifferent—came in a steady stream for six months. Then suddenly the stream began to dry up and gradually smaller till finally only a trickle of blue paper found its way into the editorial sanctuaries. The editors mopped their foreheads and heaved sighs of relief. After a while the reason for the sudden output came out.

In a Western city a one-time editor, a clever and brilliant writer of short fiction, had conceived the idea of forming a class to instruct "near" writers in the art of producing salable short stories. He was successful in forming a large and enthusiastic class and instruction was promptly given in things too numerous to mention, but among them was the knowledge of where and how to buy a maximum of price. The paper was blue at 20 cents per 500 sheets. The stationer who possessed the stock was speedily sold out and the pages were covered according to instructions and sent rolling eastward. Soon the demand for long envelopes in the East was almost greater than the manufacturers could cope with. However, every available copy was exhausted and the returning white flood was enough to make the hearts of even the doughtiest would-be writer quail. Some few were recognized and incidentally dollars, but they hastened to discard the blue paper as an undesirable hallmark of earlier and more callow days.—San Francisco Call.

British Chain Cable.
A Birmingham correspondent writes that the total length of chain cable tested during the year at the public proving houses in the United Kingdom was 431,382 fathoms, or an increase on last year of 17,000 fathoms, and the number of anchors tested was 9,194, or an increase of more than 500. The diameter of the largest stud-link chain cables tested (which were for the Lusitania and Mauritania) was three and three-quarters inches. The weight of each link of these cables was 125 pounds, and of each complete cable 124 tons. The heaviest anchor tested during the year weighed over 20 tons and was for use on board the last-named vessel.—London Times.

Here's Good Advice.
O. S. Woolver, one of the best known merchants of Le Royville, N. Y., says: "If you ever are troubled with piles, apply Bucklen's Arnica Salve. It cures me of them for good 20 years ago." Cures every sore, wound, burn or abrasion. 25c at the Red Cross pharmacy.

A Well Advertised Poultry Food.
A satisfied customer is the best advertisement any business house can have. Such expressions as are given in the following letter from Ashtel Puffer of Jericho, Vt., are indicative of the kind of advertising "Page's Perfected Poultry Food" receives. It also accounts in a large degree for the enormous sales of this staple article. Here is the letter: "I wish to keep the agency for 'Page's Perfected Poultry Food' another year. I call your Poultry Food the best I ever used, and the neighbors all speak very highly of it.

Any one sending his address on a postal card to C. S. Page, Hyde Park, Vt., and mentioning this paper, will receive by mail, free, postpaid, a sample package of 'Page's Perfected Poultry Food.'"

THE LOSS OF WHITE PINE.
How The Trees Have Been Wasted All Over The Country.
The position which the United States has held as a lumber-producing nation has, perhaps, been due more to white pine than to any other wood. The timber of this valuable tree, which has played a most important part in the material development of the nation is fast disappearing, and now it is as costly as the finest American hardwoods. Rev. Edward Everett Hale, the chaplain of the Senate, who has always taken an interest in forestry, deplors the passing of white pine as our foremost wood, and calls for a national day of fasting to be observed on the day when "the masts of every vessel that sailed the seven seas were made from New England grown pine; while today very little white pine is cut in New England big enough to furnish a good-sized spar." He tells also, to illustrate the increasing cost of the wood, that he ordered a set of bookshelves on which the cabinet-maker made a price and then asked whether they should be mahogany or white pine.

The white pine production has shifted from New England to the Lake states, and Michigan was the leading lumber-producing state 20 years ago. In 1870 to 1890, with a supremacy based on white pine. In these two decades the cut was 160 billions of board feet, valued not less than \$3,000,000,000 or nearly half as much again as the value derived from all the gold fields of California from their discovery in the late '40s until the present. The rich forests of Michigan were once thought inexhaustible and lumbering continued in a most reckless manner for years. Suddenly the people awoke to the fact that the thoughtless destruction of the trees had thrown 6,000,000 of acres on the delinquent tax list. These white pine barrens point to the terrible penalty of wasting the forest resources which should have been the heritage of all future generations.

An idea of the increasing scarcity of white pine timber is given by the New York P. O. B. quotations, on a basis of carload lots, of the best grade now \$27 to \$114 a thousand board feet and "selects" or next lower grade cost \$79.50 to \$99.50. Men who are not yet middle-aged remember the time when these grades could be purchased at \$15 to \$25 a thousand feet. The present quotations on quartered white oak, which are \$72 to \$80, offer another forcible comparison which indicates the condition of the market for white pine. The best stands of this timber now in the country are in scattered sections in Minnesota, New England and parts of Idaho. The species in Idaho is some times called silver pine. Some of the country's best white pine is found on the Indian reservations in Minnesota and Wisconsin and scattered stands are found in the state of Wyoming, Montana, Colorado and one or two other states. At the present rate of cutting the tree will soon be practically a thing of the past. The small stands in the national reserves are in considerable, but they will be managed with the greatest conservatism by the government through the forest service, and through this method and practice of reforestation it may be hoped that the fine old tree will furnish timber for other generations.

Nearly a Million Transferred.
New York, Dec. 3.—Nearly a million dollars was transferred to interior points for banks by the sub-treasury yesterday. St. Louis got \$641,000; Boston, \$260,000; Philadelphia, \$75,000; and Chicago, \$10,000.

ABOUT THE STAIE.

Items of Interest Gleaned from Our Exchanges.

W. L. Gilson has been appointed postmaster at Londonderry. Mr. Gilson is the father of the Hon. E. W. Gilson, of Brattleboro judge of the municipal court in that place.

The Rock Hill school, Westminster, has been closed on account of scarlet fever, but it is now thought the disease is under control. Thus far it has been confined to two families and both are still under quarantine.

The hide market is said to be exceedingly dull in Hyde Park, the price now being four cents a pound. This is a reduction of one-half in about a month. A year ago the price was ten cents. Hides are plenty but there is no demand.

Mr. and Mrs. Charles E. Lockwood narrowly escaped asphyxiation at their home in Brattleboro Thursday night when the coal gas from the parlor stove filled that room and the adjoining bed room in which they were sleeping. The services of a nurse and a physician were required before relief was gained.

Miss Florence Dickinson of Williamsville, is suffering from arsenic poison. About a week ago she washed a shirt waist set embroidered in green and before removing her hands from the basin of water which she was using for the purpose, noticed a prickling sensation in her hands and arms and later discovered a scratch on her hand. A few hours later a rash appeared and a physician who was consulted decided she had been poisoned by the arsenic preparation in the green dye. Her condition is now improving.

Vermonters in The West.
R. J. Blazo, writing in the Burlington Free Press from Topeka, Kansas, names nine Vermonters who are members of the first Kansas state legislature. He writes:

"In looking over a copy of Wilder's Annals of Kansas recently, I noted the following list of Green Mountain state, all Republicans, who were members of the first Kansas state legislature:
In the Senate:
J. C. Burnett, lawyer, Republican, age 55.
H. W. Farnsworth, miller, Republican, age 44.
In the House:
D. E. Ballard, farmer, Republican, age 34.
A. J. Chipman, merchant, Republican, age 25.
G. A. Colten, lawyer, Republican, age 31.
F. E. Carliss, farmer, Republican, age 53.
C. B. Keith, merchant, Republican, age 29.
A. Q. Munsey, farmer, Republican, age 37.
N. V. Barr, lawyer, Republican, age 45.

Harr served as sergeant-at-arms. I am an old Vermont; have been in Kansas nearly 40 years and thought that this information might interest many of your readers."

PUMPING OUT THE SEA.

Still Another Dutch Conquest of Salt Water.

Little Holland, with its 5,000,000 people living safely behind their wave-washed dikes, is about to make a new conquest of character; far from it. Already Dutch engineers have begun the tremendous task which will result in turning the Zuzyer Zee into 1,400 square miles of dry land. Where of old the great Dutch sea fleets gathered, where now four thousand fishermen sink their nets, there will rise happy villages, broad pastures, poplar-lined roads and sleepy canals—new farms and homes for 400,000 Dutchmen.

The task to be undertaken is a tremendous one. It will cost nearly \$70,000,000. "In return the government expects to secure annual rentals of more than \$5,000,000 from those who occupy and till the hard won ground."
As long ago as 1849 Holland cast her eyes upon the Zuzyer Zee, and a plan was considered for shutting off the whole of the Zee, but at that time it was considered by engineers that the thing was impossible. It was even asserted that the pumping dry of Haarlem Lake was beyond accomplishment, but in 1850 this was done and many thousands of acres of rich land were thrown open for settlement.

In all practical respects, it is the plan of 1849 that is now to be carried out. A great dam or embankment will be built across the north end of the sea from Wieringen, in North Holland, to Flaam, in Friesland, having sluices into which the North Sea, thus creating a great lake, which will be cut up into sections, and one section reclaimed at a time, work having already been started on the first.

The Zuzyer Zee is, in reality, a deep gulf, forming the mouth of the Zuzyer river, which empties into the North Sea. Instead of simply diking the rivers within their narrow channels, to allow them to flow into a central reservoir, or lake, situated at a point approximating what is now the middle of the Zuzyer Zee. The estimated cost of the whole project is \$75,825,000. Of the land reclaimed it is calculated that 750 square miles will be fit for cultivation, and the nation should derive an income of at least \$5,000,000 a year in rents from this area, as diked lands on the average of the Zuzyer Zee are worth from \$10 to \$20 an acre a year.

At present some of the thousands of fishermen pursue their hazy calling upon the waters of the Zee, and the gross income they derive from the fishery is approximately \$1,000,000 a year. In addition to the loss of their occupation these fishermen will also be compelled to abandon their boats and other equipment, as not suitable for the rougher waters of the North Sea, and it will be necessary for the government to compensate these men, thus adding another considerable item to the expense account.

That portion of the work to be immediately undertaken is the building of the great dike which is to stretch from the coast of North Holland to the island of Wieringen, and the drying and recovery of that portion of the Zuzyer Zee known under the name of the "Wieringen Meer," forming the northwestern of the four polders, or sections of the original plan.

This polder will be about 45,000 acres in area, which the heralds indicate that fully 40,000 acres will be fertile soil.

As the dike between Wieringen and the coast of Friesland is not to be built at present, the eastern dike of the polder will be directly on the Zuzyer Zee and will have to withstand the heaviest storm flood tides, which in this part rise to about ten feet above the average water level. It being necessary, therefore, to build the dike five metres above the average low water level.
By means of low inner dikes the polder will be divided into four parts, from each of which the water will be pumped out separately. For this work large steam pumps of 1,900 horse power each will be erected.

Thus it will come to pass that in another generation men will plough and build their cottages where the anchors of their fathers' boats used to drag, and little Holland will have won another battle in her endless warfare with the sea.—Technical World Magazine.

BERLIN TO HAVE SUBWAY
AT COST OF \$15,000,000
Also Five New Surface Lines to Meet Traffic Demands.

Berlin, Dec. 4.—The traffic commission of the municipality of Berlin has decided to build an underground railroad running northwest and southeast through the heart of the city, from Charlottenburg to Rixdorf. The cost of the new line is estimated at \$15,000,000. Berlin is also to have five new surface lines to meet the traffic demands of the population.

A Reserve.
"Why in the world are you carrying two umbrellas?" somebody asked the forgetful man, and he looked amazed at the question.
"I should think you'd guess that easily, knowing me so well," he said. "I'm carrying two so that if I forget and leave one anywhere I shall still have the other."—Youth's Companion.

COMMISSIONERS' NOTICE.
ESTATE OF CARRIE E. CLARK.
The undersigned, having been appointed by the Hon. Probate Court for the District of Washington, commissioner to receive, examine and adjust all claims and demands of all persons against the estate of Carrie E. Clark, late of the City of Barre, in said District, do hereby give notice that we will meet for the purpose aforesaid, at the office of O. H. Reed, in the City of Barre, in said District, on the 14th day of December and 15th day of January, 1908, at 10 o'clock P. M. until 4 o'clock P. M., each of said days, and that six months from the 15th day of November, A. D. 1907, is the time limited by said Court for creditors to present their claims to us for examination and adjustment.

Dated at City of Barre this 27th day of November, A. D. 1907.
JOHN BRISA,
JAMES H. FRUSA,
W. C. CRICKENBAK, H. H. REED, J. Commis-
sioners. CHARLES B. TOWNSEND, 1, Notary.
Nov 27, Dec 4-11

Public Notice.
Notices hereby given that the copartnership heretofore existing between John Brisa of Northfield and John B. Frusa, late of Barre and Charles Frusa of the City of Barre, under the name of the Frusa Brothers, is hereby dissolved by mutual consent. The business will be conducted at Barre by the said John Brisa and Charles Frusa under the firm name of Frusa Brothers, and they will pay all debts and collect all bills due the firm.

Dated at City of Barre this 29th day of November A. D. 1907.
JOHN BRISA,
JAMES H. FRUSA,
W. C. CRICKENBAK,
CAESARE BRUSA.

Dissolution of Partnership.
The partnership heretofore existing between W. C. Crickenbak and J. A. Cumming, doing business under the firm name of Cumming & Crickenbak, is this day dissolved by mutual consent. J. A. Cumming buys the interest of W. C. Crickenbak and will continue to do the business. J. A. Cumming will pay all bills and collect all debts of the old firm from and after this date.
Dated at Westminster, in the Town of Barre, Vt. this 2nd day of December, A. D. 1907.
W. C. CRICKENBAK,
J. A. CUMMING.

HAIR TELLS CHARACTER.

Color of Hair Said to Indicate a Person's Temperament.

Many people believe that blonde, or light hair denotes affection and dark hair constancy. A person without hair is not devoid of character; far from it. The disposition of the average bald-headed man is to show such solicitude for the welfare of others, that he neglects himself. A germ causes baldness. Prof. Malouraud, of Paris, France, has discovered a rabbit with a trait of genius causing it to become totally bald in five weeks' time. To rid the scalp of these dangerous germs it is necessary to apply Newbark's Hair-Preventer.

"Destroy" the cause—you remove the effect."
Sold by leading druggists. Send for free sample to The Herpelde Co., Detroit, Mich.
Two sizes—50 cents and \$1.50.
E. A. Brown, Special Agent.

FOUR LINES FOR 25 CENTS
Two Times will publish Wants, Lost and Found, For Sale, To Let, etc.—short advertisements for the first insertion and five cents for each subsequent insertion.
