WATERBURY.

Trying to Interest Farmers in Concentrated Milk Plant.

Landlord Davis gave a social dance in the Waterbury Inn Saturday evening, which was attended by about forty couples, more than half of whom were from Montpelier.

Following the evening dinner, the dining-room was cleared for the dance, which continued until the departure of the midnight train. There was card-playing for those who did not care to dance. The evening was very enjoyable for all.

George Miller of Boston has been in town trying to interest the farmers of the vicinity in a concentrated milk plant. All he asks of them is that they will furnish a stipulated amount of milk each week. Then, under an agreement for a term of years, he will erect a plant to cost \$15,000, and operate it in the village, shipping the product to Boston.

This product will differ both from condensed and sterilized milk. The impurities will be removed, and enough water taken out to reduce the milk three-fourths, but it is intended for immediate use, instead of long preservation in cans, as condensed milk.

Badly Used Up. Abraham Brown of Winterton, N. Y., had a very remarkable experience; he says: "Doctors got badly mixed up over me; one said heart disease; two called it kidney trouble; the fourth blood poison; but none of them helped me; so my wife advised trying Electric Bitters, which are restoring me to perfect health. One bottle did me more good than all the five doctors prescribed." Guaranteed to cure blood poison, weakness and all stomach, liver and kidney complaints, by the Red Cross Pharmacy, 50.

AMUSEMENT NOTES

The Crop of Song Writers.

John W. Vogel, owner of Vogel's minstrels, that comes to the opera house Tuesday, in conversation referred to the increased cost of minstrel organizations and of the elegance of mounting that is now demanded by theatre goers. "Take my first part," he said, "and

...and was spent before the hangings were up. It is all rich, heavy sets, and large enough to fit any stage.

But just then a special delivery boy from the post office brought in a package and before Mr. Vogel opened it, he said, "This is music," and he remarked, "It so disgustedly that one was led to infer that it was not the first time he had received such a consignment. "It is remarkable," he added as he ripped open the roll, "how many musicians there are in the country, and how each one writes the best song that has ever been put on paper. I venture to say that I receive three or four a week and from all parts of the country. A man writes a song, his friends tell him it is great, and he spends a hundred dollars in having it printed and then he sends a copy to theatrical managers and especially to minstrel companies. Some of them are so poor they are really good and others are not poor enough to be good and not good enough to be poor. Titles! Why, some of the titles are so unconsciously funny that they would make hits if they could be put on sale. Now, here is one from—well, no matter, but a glance at the cover is enough to condemn it."

"No, I seldom, if ever, get a song that is worth singing in this way. The good song writers are known and their productions are handled by regular houses and it is there we usually go to get our stock. Sometimes it happens that a singer will get an idea of a song and have some musician put it into shape and the man sings it himself. This does not happen often, however."

CHANGES TO BENEFIT BATSMEN.

Pulliam Says No Time at Bat Should Be Credited When Play Brings in Run.

Harry Pulliam, president of the National league, thinks it an injustice to a batter who brings in a run from third base on a single to get an idea of "a song and have some musician put it into shape and the man sings it himself. This does not happen often, however."

charge him with a time at bat. This play often wins games fully as much as a base hit and Pulliam says he will advocate a change in the rule whereby a batter sending out such a fly or a grounder so difficult to handle that the pitcher cannot be made at the plate shall be exempt from a time at bat. "There are some players," he says, "who always are sure to hit the ball when men are on bases, and frequently win games by so doing; yet they get no credit for what they have accomplished. Pulliam thinks there should be a change in the scoring system which would give credit to the batter driving in runs. So do a good many others. The idea is not new, the suggestion having gone further and advocated credit to batters to advance runners on the bases—from first to second and from second to third as well as from third home. Reform in the pitching rule is another change advocated by Pulliam. He is opposed to allowing the pitcher's box to be raised above the level of the diamond. "The pitcher's box at the Polo grounds is on a level with the rest of the diamond," he says, "and I maintain that you get a correct line on the ability of a pitcher on this ground, but not on any of the others."

THE ISLE OF PALMS.

Where Sir Peter Parker's Troop Landed During the Revolution.

Rising from the waters of the blue Atlantic along the low and sandy shores of South Carolina not far from Charleston, and forming one of the chain of sea islands for which that region is peculiar, there remained unnoticed, until within the last few years, a certain island whose beach is unrivalled on the South Atlantic coast, and whose history may be of interest to the many people who visit it during the summer season.

Its formation is similar to that of the rest of these islands that abound along the coast; that is, they consist of sand and other materials washed up by the sea, and may be regarded as encroachments of the land upon the water. It has a luxuriant growth of pines, palmetto and oaks, but of no great altitude on account of the ocean breezes to which they are constantly subjected. It differs from Sullivan's island in not being a mere sand bank cast up by the waves at the mouth of the harbor, its undulations being of a more fixed and permanent nature, and not a succession of sand drifts and dunes at the mercy of winds and waves, much more resembling the neighboring main, from which it is separated by a stretch of curving creeks and marshes. The beach, continuous with the island, is fully twelve miles long, affording a driveway unequalled by the best roadway in the world. This island, formerly known as Long Island, first came into notice as having been the scene of the landing of the British troops during the American Revolution, at the time of the expedition against Charleston, in 1776, by Sir Peter Parker. The deep inlet at the southern end separating it from Sullivan's island is the especial point of interest, as it is impossible to make use of the face of the hostile batteries, in order to attack Fort Moultrie from the land side, while the best attempted to run the gauntlet of the fort itself. How famous this attack on Charleston was re-echoed by the complete defeat of the British, and how the vanquished squadron sailed away to New York is an old-told tale.

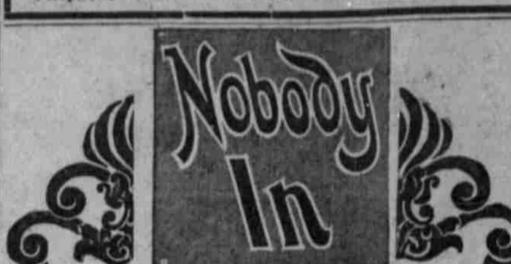

For more than a century after this military visitation this island lay quietly on the bosom of the restless sea, undisturbed save by occasional storms and the friendly visits of hunters in search of game and adventure. It has in times past been used by farmers for raising products more or less, as some portions of the soil are somewhat fertile, and toward the center is a swamp or lagoon which gives to the eye from an elevation a picturesque contrast to the surrounding scene. It is, however, in the last decade that it has come prominently into public notice as a pleasure resort, for which it is indebted to the advent of the trolley. During the summer months crowds throng the spacious pavilion erected there to enjoy the music of the United States army post band and to indulge in the luxury of salt water bathing. The broad beach presents an animated spectacle at that time with its moving panorama of bicycles and vehicles of all sorts. Fronting the ocean and in full view of the end of the jetty there are vessels almost always in sight, passing in and out and adding to the variety of the scene. In addition to the attractions of the pavilion a fine hotel affords ample accommodations for the guests, that frequent it in yearly increasing numbers, not only from the city but from the interior of the state and from the neighboring states as well. The trip from the city is one of peculiar and varied interest.

Emerging from the ferryboat the rustic village of Mount Pleasant with its cozy homes and shady lanes is quickly traversed and the long bridge is soon reached, which is the third that has been erected at this point—the first in the Revolutionary and the second in the Civil war. The trolley then threads gardens blooming with oleander and other flowers amid the white sands of Sullivan's island, grades an angle of historic Fort Moultrie, near whose portal lies the grave of Okeola, the Indian patriot and warrior, while apparently within a stone's throw lies the other historic fort, Sumter, surrounded by its moat of boundless blue water. Approaching the eastern end of the island, the odor of the myrtle groves, from whose wax exuded that makes the perfume of the island, is very perceptible. The changed aspect on entering the Isle of Palms is very striking; one observes little peaks of sand surrounded by palmettoes and is soon whirling through a variety of foliage, which becomes more dense till, on nearing the terminus of the pavilion, a grove of live oak sheds its perpetual shade down a sandy slope to a nearby creek on the rear of the island. This has this now favorite resort—in obscurity an integral part of the social life of the city and state, monopolizing as it does so large a part of the pavilion, and seeking people of different and distant parts of the country.—Charleston News and Courier.
