As usual, Edwin D. Hadley had something in the moving picture line last night at the opera house that was well worth the price of admission, and deserved a much larger audience than it got. Those who did attend came away well pleased with the evening's entertainment. Perhaps the best picture of all was one showing myriads of South African ants at work in an ant hill. The pictures were greatly magnified, so that the movements of the ants were plainly visible. The death fight between a big spider and the ants was intensely interesting. The sound effects back of the curtain to make the pictures seem more realistic were well carried out. Mr. Hadley gave instructive descriptions of the pictures as they were shown.
