SHORT STORIES.

When a heavy fall of snow occurs in Valdes, Alaska, the fire department is called out to clear the sidewalks.

During the 118 years in which we have had a national house of representatives it has never had a speaker who was born in New York city.

Up to 1906 Pennsylvania produced more natural gas than she could make use of, but now it is necessary to draw upon the supply of West Virginia.

Officers superintending and men employed in the construction of the new battleship at the New York navy yard have been strictly forbidden to give out any information about the work.

Since its establishment the department of agriculture has cost the United States more than \$200,000,000. It has given employment at different times to 58,000 experts and professors and issued 17,675 publications.

Probably the longest if not the largest barn in Massachusetts is in one of the tobacco fields in Westfield. This barn, which has been added to from time to time, as the business of the owners prospered, is now 500 feet long.

Fly Catches.

Pitcher Willett of the Detroit Americans is making good Manager Jennings' claim for him.

"Pittsburg's perennial pennant pursuing Pirates" is the way a New York scribe designates Barney Dreyfuss' National league representatives.

While no one pretends to want Bugs Raymond, there are just about three National league clubs that would give their eyeteeth to win him away from St. Louis.

Konetchy of the St. Louis Nationals is a much better first baseman than he was last year. If he shows the same ratio of advancement next year he will be a full fledged star.

Pitcher Eddie Summers of the Detroit Americans is the hardest loser in the game. The other day Cleveland took a fall out of his delivery, and Detroit bit the dust. After the game Summers retired to the dressing room and shed really and truly salt water tears.

Church Work.

The national board of church extension of the Christiana church is trying to raise \$1,000,000 by the end of next year.

Farm and Garden

ENTERPRISE PAYS.

Progressive Methods—Good Staples Are the Secrets of Success. The progressive farmer is the one who scores at the markets. Good methods in raising crops, the selecting of staples for which the demand is greater than the supply, these are the considerations that count for success.

One farmer in New York experimented with a spraying apparatus in raising potatoes and results justified the expense because the increased gain of sixty-seven bushels an acre gave a cash profit of \$37.15 an acre, or \$40.20 on the field. The spraying cost only \$3.05 an acre for labor, materials, etc.

The experiment was tried on fifteen acres of potatoes, which were sprayed four times to prevent injuries by blight and insects. Three rows 650 feet long and 2 1/2 feet apart were left unsprayed for a check. Bordeaux was applied at the rate of sixty gallons an acre at each spraying. The soil is sandy loam, and the variety of potato Carman No. 3. During the season plant lice and flea beetles were abundant in all parts of the field, but there was no early blight. Owing to the great press of work it was impossible to make a fifth spraying and also give the field attacked proper attention in
