

ON THE FIELD OF FOOTBALL

Yale Beats West Point, 6 to 0

NORWICH FAILS TO SCORE

Goddard Loses to Dartmouth Freshmen, 16 to 0—Other Games Played on Saturday, and the Results.

West Point did not score on Yale Saturday, but it kept the latter down to one touchdown. The army always gives Yale a hard game, but it had an idea it could furnish just as hard a match as it did a year ago when it forced a tie.

Harvard slammed Springfield Training school by a score of 29 to 0. Williams surprised Dartmouth's followers by playing the latter a no-score game. But the fact is that the strength of the Williams team has not been fully appreciated. That team is certainly in fine trim and is a corking one at that. The Williams men feel that if they had played the same game against Harvard as they did Saturday, the crimson would never have gone away 10 points to the good.

Brown was outplayed by Pennsylvania, the latter securing two touchdowns. Princeton is still behind the time, according to the "Tiger" schedule, and a 10-to-4 score over Virginia "Tech" is hardly much reason for a jollification. The Virginians outplayed Princeton in the first half and were the first to score on the "Tigers." Cornell is also somewhat off, likewise Amherst. A long run saved the purple from defeat at Medford and gave it its first points of the season. Holy Cross succeeded in beating Bowdoin, probably the strongest of the Maine colleges. The heavy Syracuse eleven had some trouble with Rochester, but won out.

The Dartmouth freshman defeated Goddard Seminary Saturday afternoon at Hanover by the score of 16 to 0. The prep school men were not in the class with the Dartmouth youngsters, who smashed through Goddard's line almost at will. The forward pass also reaped long gains for the home team.

At Cambridge, Harvard 44 Springfield training school 0. At Williamstown, Williams 0, Dartmouth 0. At West Point, N. Y., Yale 6, West Point 0. At Philadelphia, Pennsylvania 12, Brown 0. At Princeton, N. J., 10, Virginia "Tech" 4. At Ithaca, N. Y., Cornell 9, Colgate 0. At Medford, Amherst 6, Tufts 5.

MICROBES IN THE SCALP

The Latest Explanation Is That Microbes Cause Baldness.

Professor Unna of Hamburg, Germany, and Dr. Sabouraud of Paris, France, share the honor of having discovered the hair microbe.

Baldness is not caused through a few weeks' work of these hair microbes, but is the result of conditions brought about by their presence. Baldness may not occur until years after the microbes began work, but it is certain to come sooner or later.

The microbes cut off the blood supply. They feed on the fatty matter about the root of the hair, through which the blood is absorbed. Finally the fatty matter is wholly consumed, the food supply of the hair is gone and it starves and finally dies.

Resorcin is one of the most effective germ destroyers; Beta Naphthol is both germicidal and antiseptic; Picric acid, though not a dye, restores natural color to hair when loss of color was caused by disease. These curatives properly mixed with alcohol as a stimulant, perfect a remedy unequalled for curing scalp and hair troubles.

We want everyone who has any scalp or hair trouble to try Rexall "99" Hair Tonic, which contains all these ingredients. If it does not grow hair on your bald head, stop your hair from falling out; cure you of dandruff; make your hair thick, silky, luxuriant; if it does not give you complete satisfaction in every particular, return the empty bottle to us, and we shall return every penny you paid us for it, without question or fogality.

Of course, you understand that when we say that Rexall "99" Hair Tonic will grow hair on bald heads, we do not refer to cases where the roots are entirely dead, the pores of the scalp closed, and the head has the shiny appearance of a billiard ball. In cases like this, there is no hope. In all other cases of baldness, Rexall "99" Hair Tonic will positively grow hair or cost the user nothing. NORWICH FAILS TO SCORE. University of Vermont Eleven Won, 11 to 0.

Burlington, Oct. 19.—The University of Vermont football eleven defeated Norwich university on Centennial field Saturday afternoon, 11 to 0. Because of the high temperature, several men were obliged to retire from the game. The winners made their gains almost wholly through the line. Outside kicking and the forward pass were repeatedly attempted by Vermont, with but poor results. Norwich worked the pass successfully several times, but the only occasion when it was within striking distance of the Vermont goal it was held for downs. The feature playing was contributed by Watkins and Cassidy of Vermont and Reed of Norwich. The summary:

- Vermont. Reed, 1 o. Cassidy, 1 f. Smith, 1 g. Hughes, 1 g. Hawley, 1 g. Thomas, 1 c. Campbell, 1 c. Buckmiller, 1 r. Dodge, 1 t. Light, 1 t. Clark, 1 t. Back, 1 e. Carwell, 1 e. Logan, 1 e. Maynard, 1 e. Prince, 1 b. Barney, 1 b. Frain, 1 b. Watkins, 1 h. Clark, 1 h. Reed, 1 h. Hemingway, 1 h. Keislich, 1 b. Damon (capt.), 1 b. Adams, 1 b. Score, Vermont 11; touchdowns, Slavin, Watkins; goal from touchdowns, Watkins; umpire, O'Connell; referee, Burleigh; field judge, Munroe; linesmen, Head and Barber, Mevis and Richmond; time, 25 minute and 20 minute periods.

TOWN WILL HELP LOSERS. West Fairlee Town Meeting to Aid Rebuilding.

West Fairlee, Oct. 19.—The determination of the citizens to rebuild that district of the town over which the great fire of Sept. 30 swept and destroyed much of the business portion, including a hotel, was shown Saturday at a special town meeting.

After much discussion it was voted to exempt from taxation for a term of five years all business blocks that may be erected within the next two years, and to exempt from taxation for 10 years any hotels built within the next two years. Plans of proposed structures must first be submitted to the selectmen and approved by them.

BRUSHING THE TEETH.

Dentists Advise Especial Care at Night.

There has never been a time when so much attention was given to the teeth as now. It is often argued, with some truth, that women go to dentists too much.

They do not wait for anything to happen to the teeth. They make a practice of going at all times and seasons for the dentists to find something the matter.

Once or twice a year a dentist should be allowed to thoroughly clean the teeth so that not a bit of tartar remains. This is important and cannot be done at home. It requires the instruments of a professional.

Experts declare that if the teeth were kept absolutely clean they would never decay. But the majority of women let a dentist do the work twice a year and do not assist him at home.

They do not use dental floss after every meal, and therefore particles of food decay and attack the enamel. They brush the teeth in the morning, but they will not brush them at night. This is a very important mistake.

Soft brushes should always be used. Stiff ones are injurious. Pastes are better for sensitive teeth than powders, and a month wash is the most important thing of all.

Tincture of myrrh is always good, and nothing is better than listerine diluted in water.

GAY FIRM IN BANKRUPTCY

Judgment Creditors File Petition in Boston

THE FIRM WAS TIED UP

With the Hudson River Electric Power Co. and the Pittsburg, Binghamton and Eastern R. R. Banks Were Giving It Time.

Boston, Oct. 19.—A petition in bankruptcy against the stock brokerage firm of E. H. Gay & Co. of Boston was filed in the United States district court here Saturday. The petitioners are I. Norton Beardslie of Canton, Pa., Elliott Norton of New York and Horace E. Farrington of Boston. The petitioners are not heavy creditors, Beardslie's claim, which is the largest of the three, being for \$3,087. The others are for nominal sums. Mr. Farrington is a clerk for the firm. No financial statement of the firm's condition was available Saturday.

The concern is said to have encountered financial difficulties in August last, at which time, by agreement of the largest creditors it was decided to liquidate the business instead of insisting on bankruptcy proceedings, and John P. Reynolds, Jr., of Boston was named as agent in liquidation. The work of winding up affairs has been in progress for about two months. The firm was composed of Eben Howard Gay and Joseph W. Jackson, both of Boston. It was formed about 10 years ago and dealt almost exclusively in bonds. It was said to be heavily interested in the bonds of the Hudson River Electric power company, the interest on which was passed last spring. This condition is said to have been one cause of the firm's troubles. It also met with a loss of nearly \$30,000 three years ago, when bonds to that amount were delivered by a clerk to a swindler in Lynn on a check which proved a forgery.

Elliott Norton of New York, one of the three petitioners against the firm of E. H. Gay & Co., said that the management of the firm's affairs by Mr. Reynolds had not proved satisfactory to the majority of the creditors. He said Mr. Reynolds seemed to them to be acting in the interests only of the larger creditors. Mr. Norton added that the three petitioners would be joined by many others and that there are creditors all over the country, representing claims aggregating nearly \$3,000,000, who approved the action taken in Boston Saturday. E. H. Gay & Co. was described by Norton as a bond and stock brokerage house. It has been in existence nearly 15 years and its secured and unsecured debts were placed by him at upward of \$7,000,000. Its present plight dates from last June, when Mr. Norton obtained a judgment for more than \$170,000, whereupon the creditors required the firm to place itself under the management of a Mr. Reynolds.

GOMMERS AVERTS A RIOT. Stands Between Political Audience and Two Questioners.

Logansport, Ind., Oct. 19.—The meeting of Samuel Gommers, president of the American Federation of Labor, here Saturday nearly ended in a riot, and but for Gommers' composed and timely defense of the men against the crowd's anger was a riot, heads would have been broken.

LEAVES \$175,000 TO HARVARD. Grace M. Kuhn Also Remembers Massachusetts General Hospital.

Lenox, Mass., Oct. 19.—By the will of the late Grace M. Kuhn, widow of Hartman Kuhn of Philadelphia, died yesterday for probate in the Berkshire courts, Harvard university received \$175,000 to endow a department of biological chemistry in the memory of a son, Hartman Kuhn, who died several years ago.

The Massachusetts General hospital receives \$10,000 for the clinic laboratory. Three-quarters of the remainder of the estate is bequeathed to Ellen G. Cary, sister of the deceased, and one-quarter to Hamilton Wilke Cary of New York and Miss Catherine G. Cary of Lenox. The estate is valued at \$700,000. Mrs. Kuhn died two weeks ago in Lenox, where she had been a summer resident for thirty-five years.

Check for \$10,000 from Tammany. New York, Oct. 19.—A check for \$10,000, the contribution of the Tammany society to the Democratic national campaign fund, was received by Herman Ridder, treasurer of the national Democratic committee, at New York Saturday. This is the largest single contribution yet received by the national committee.

LOCAL PASTORS OBJECT TO METHODS

Rev. J. W. Chapman Cuts Out Revival Meetings at Springfield, Mass.

Rev. J. Wilbur Chapman, the noted revivalist leader, who is to tour Vermont next week, is not going to Springfield, Mass., as he intended. There are many reasons to which his action may be ascribed. When Dr. Chapman was first asked to go to Springfield, he stated as his desire that he should have a large auditorium to deliver his addresses in. This has not yet been provided. Also, he has received indirectly the news that some of the ministers in that city do not look at all favorably upon a revivalist campaign in Springfield. Rev. Dr. William M. Hall said that he had written to Dr. Chapman, but had not as yet received any answer from him. He said that Dr. Chapman had met with the same opposition in Boston, but that it had not prevented him from going there. Rev. C. C. P. Hiller stated that he had not heard definitely as to Dr. Chapman's coming, but said that Dr. Chapman had said that unity of the churches in the success of any revivalist campaign, and that it might be that Dr. Chapman had heard of the opposition of his going to Springfield, and had decided that the cause would not be benefited by his going.

SAMUEL BOWLES TO WED MISS HASKELL

Springfield, Mass., Oct. 18.—The engagement of Samuel Bowles, Jr., Harvard '08, to Miss Haskell, the daughter of Gov. Charles N. Haskell of Oklahoma, is soon to be announced, and will no doubt be a great surprise to Mr. Bowles' many friends at Harvard. Mr. Bowles is the son of Samuel Bowles, editor of the Springfield Republican and after graduating from Harvard last June went to Oklahoma and was engaged in newspaper work. Being an ardent supporter of Bryan he became acquainted with Gov. Haskell, and later met his daughter about two months ago.

SUICIDE OF JUDGE HOWELL

Newark Justice Shoots Himself in the Head in Branch Brook Park. Newark, N. J., Oct. 19.—Judge David B. Howell of the first criminal court of Newark, in the presence of 100 persons, yesterday twice shot himself in the head in Branch Brook park, inflicting wounds from which he died in a hospital two hours later. Judge Howell was one of the most widely known democrats in that region, and although he was not a candidate for election, he took an active part in the campaign. Sharp criticism was made of the judge because of the fact that he had been divorced by his wife, and in a speech Friday night he replied to the accusers and demanded evidence of their charges. Yesterday he walked into the park while his court was awaiting his arrival, and in the presence of a number of spectators fired two shots into his head. He is said formerly to have been an Episcopal clergyman.

ORDERED TO DUMP BEER

800 Barrels in Oklahoma, Valued at \$7000, to Be Spilled. Oklahoma City, Oct. 18.—A government internal revenue collector has arrived here under orders to dump the stock of beer on hand at a local brewery company's plant, valued at \$7000. There are 800 barrels of beer, which were made a month ago the building was raised by officers, and the beer discovered. Local officials were prevented from seizing it because there was no government stamp on the goods.

Check for \$10,000 from Tammany. New York, Oct. 19.—A check for \$10,000, the contribution of the Tammany society to the Democratic national campaign fund, was received by Herman Ridder, treasurer of the national Democratic committee, at New York Saturday. This is the largest single contribution yet received by the national committee.

TEACHERS ASK CHANGES

Important Matters Embodied in Resolutions

ADOPTED AT RUTLAND

Ask for Creation of State Board of Education, the Extension of the Supervisory System and Improvement of Normal Schools.

Rutland, Oct. 19.—The next meeting of the Vermont State Teachers' association will be held in Montpelier. At the final session of the association Saturday these resolutions were presented by the committee, O. D. Mathewson of Barre, W. A. Beebe of Morrisville and Jessie I. Ross of Grand Isle. They were unanimously adopted:

Resolved, That it is the sentiment of this association that the salutary steps taken by the legislature of 1906 be extended by reducing the minimum number of schools necessary for district supervision to 25. And that steps be taken to extend the supervisory system as rapidly as possible over the entire state.

Resolved, That the extension of the supervisory system be accompanied by the creation of state board of education to have charge of the examination and certification of teachers and to have general oversight of all educational interests for which the state makes appropriation.

Resolved, That the state should make adequate appropriations for the support of normal industrial and agricultural schools and for the training of secondary teachers by the establishment of a department of pedagogy in some of our colleges.

Resolved, That the state make a more equitable allowance for tuition in secondary schools.

Resolved, That the department of education provide a more flexible course of study in secondary schools, basing the requirements for the same upon a minimum number of points in the determination of which studies are counted according to some definite rating.

Resolved, That the association advocate the establishment of normal school plants worthy of the work entrusted to such schools and in keeping with the dignity of the state.

Resolved, That the minimum length of the regular school year be thirty (30) weeks for elementary schools, and thirty-six (36) weeks for secondary schools.

Resolved, That some measures be devised for the better equipment of a school room before the school be approved as a legal school.

Resolved, That we urge a better enforcement of the compulsory laws of all truancy and child labor laws.

Resolved, That it is the sense of this association that the fixing by law of a minimum wage for teachers of legal schools is highly desirable.

A BREEZY LETTER

Contributed by Alex. Smith to Granite Cutters' Journal.

Alex. M. Smith, correspondent for the Granite Cutters' Journal, contributes this breezy letter to the last issue of that publication.

"Sorry I cannot commence my remarks with a good breezy poem like the scribble of Hardwick branch, but, sad to relate, I am not gifted that way, nor in any other way, if the truth were only known. That is the reason I have to plod along in my old-fashioned, 'bum-drum' way. I wish many a time that I could write verses which would interest the readers, but alas! the song says, 'What is the use?' We are not all born with the literary instinct, but have to grub along somehow in the shade, and like Uriah Heap, be very 'umble.' My report will be dry and very dry this month to keep in line with the weather, but do not blame me, for I am about shriveled up like an old Egyptian mummy. We have been treated to but one little, tiny shower for the past six weeks, which scarcely even laid the dust. Do not think that the community here have been waiting calmly for the rain to come. Oh, no, they have taxed their ingenuity to the uttermost to draw moisture from the clouds and have even called in professional rain makers, but all to no purpose. Every granite plan operated by electric power has been closed down two days a week for the past month, because the electric company are unable to furnish power. Some time ago this same company installed a powerful engine which they claimed would generate power enough to run all and everything, but we hear nothing of it now when the water is low. Perhaps it costs more than the corporation is willing to pay. This laying off is hard lines on granite cutters, and also on the employer who wants in the worst way to get his fall work out on time. At least one-half of the plants in Barre use electric power, so a large number of men are affected. Trade is fairly good here up to now, but if the dry spell continues much longer, the whole industry will be at a standstill. I have nothing to say about politics this month, but wish to say a word about our nominee for reviser of the constitution. In last circular we were advised by the I. S. T. to put up good, sound, level-headed men, and not nominate a man because he was merely a good fellow. We have taken his advice this time at least, for we have nominated one who measures up to the requirements and is a good fellow to boot. Richard Grigg is the choice of Barre branch, a man we can all trust, and respect. He has proved himself fearless, and upright in all his dealings, and has stood in the front rank of our organization upholding union principles for the past twenty-five years, and is one of our most active members to-day. Bro. Grigg is chairman of our adjustment committee, and has been for a number of terms, so he knows the constitution as well as the next man, both its good and bad points. I will not say any more on the subject, for many of you know Dick as well as I do, so keep him in your mind's eye when we vote for revisers. I wish secretaries would take the hint and not pile raffle tickets on to me, for it is impossible for me to dispose of them under any conditions.

"A. M. Smith."

CUT OUT THE GRAFT.

Substitute a System Above Petty Graft.

To the Editor: Much has been said at present in criticism of the existing laws dealing with the control of bovine tuberculosis and there seems to be a strong sentiment toward changing the present method of handling the matter.

It is a many sided subject, but neither in the various editorials nor in the cattle commissioners' report has the key note been struck. It has been asserted, and with good reason, that owners have been able to dispose of their refuse stock at a good profit to themselves by resorting to the test; nothing has been said of the rotten system and careless appraisal on the part of the state agent which permits this graft.

There has been much dissatisfaction with the great amount of money wasted in the past two years; and nothing has been said about the animosity of refusing to realize the value of the cattle which the state acquires, either as food or offal as the extent of the lesions warrant.

If the present law is to be changed, let us begin at the root of the evil, the inefficient handling of the situation by the present authorities.

1. Abolish the sinecure office of cattle commissioner, which is at least not worth more than a figure head. Abolish the petty graft of the two by four veterinarians in whose hands the test has given such unsatisfactory results, and whose appraisals have been the laughing stock of the state.

In their places hire a competent veterinarian, connect the office with the State Board of Health or the Agricultural Commission, pay him enough so that he can devote his entire time to the work and have the testing done by him or under his personal supervision.

2. Make testing compulsory. Otherwise no measure will ever control the disease and it will be foolish to spend any money at all.

3. Recognize the fact that there are instances where the value of the animals reacting and the probability of restrictive measures being complied with warrants the segregation of these animals instead of a compulsory slaughter, and to that end authorize the discretionary use of the Bang system.

4. Recognize the fact that the suppression of this disease is a public health measure, and that while no man should be allowed to make it a means of enriching himself, the state must bear the brunt of the burden.

5. Because of the above fact, and that the state may minimize the expenditure, let the cattle slaughtered be killed under competent veterinary supervision and if found fit for food disposed of as such; if not, let them be sold for fertilizer material in either case thereby securing a legitimate return to the state on what is now being buried and wasted. Let the hide also revert to the state, for if it pays a fair value for the cattle condemned, it has done its full duty and the owner should not expect this little additional graft. It is safe to say that by taking advantage of the monetary values that every carcass represents, no matter how badly diseased, the expenditures of the past two years could have been reduced more than fifty per cent, and it is on this point that your attention should be concentrated, that the state may benefit not by the shifting of the burden onto the shoulders of the farmer, but by the conservation of what is now permitted to be wasted.

There is talk of abolishing all measures for the control of the disease. Such action would be a disgrace to the state and a mistake. Abolish the present system, yes, root and branch, but substitute therefor a sane, systematic, united effort to eradicate the disease from the state. Substitute a system above petty graft and political incompetence and fair to all, one that will not permit the state to be robbed, nor the owner oppressed, and then it will be a question of a few years when we will be free from the curse of bovine tuberculosis.

R. W. Brock.

Money For the Skin.

English cosmetic is pure comb honey strained and bottled. A very little of this is rubbed into the skin with a bit of cotton wool.

This is done just after the face has been thoroughly washed and cleaned—washing is not always cleansing—and the honey applied while the face is wet. After rubbing the honey in let it dry on the face. It may be absorbed by the pores if too much has not been used.

Another English cosmetic for greasy skins is a combination of rose vinegar and rosewater. To make the vinegar half an ounce of dried rose leaves should be placed in a gill of white wine vinegar for five or six days and the liquid strained off.

To this sufficient rosewater is added to reduce it to an agreeable strength. It may be used twice a day or once only if the skin is not very oily.

The Red Ferns. "Stop the auto!" "But, sir!" "I think I saw some red ferns." "Better keep me on, boss," advised the chauffeur earnestly. "Then red ferns is the local constable's whippersnapper."—Washington Herald.

The Open Window. The best part of a modern house is its windows. To keep these open day and night and to make the air inside approach as nearly as possible the air outside should be the first business of the housekeeper.—Good Health.

SORRY YOU HESITATED

Is Unnecessary to Suffer from Stomach Trouble

DYSPEPSIA WILL BE GONE

Give Your Stomach a Good Eat Without Fear of Distress—It Cures a Little Diaperin—It Cures Before You Realize It.

If what you just ate is pouring on your stomach or lies like a lump of lead, refusing to digest, or you belch gas and eructate sour, undigested food, or have a feeling of dizziness, heartburn, fullness, nausea, bad taste in mouth and stomach headache—this is indigestion.

A full case of "Paper's Diaperin" costs only 50 cents and will thoroughly cure the worst case of dyspepsia, and leave sufficient about the house in case some one else in the family may suffer from stomach trouble or indigestion.

Ask your pharmacist to show you the formula plainly printed on these 50 cent cases, then you will understand why dyspepsia, indigestion or gastritis, or any other stomach misery, and eat just one Triangles of Diaperin.

This city will have many Diaperin cures, as some people will call them, but you will be cranky about this splendid stomach prescription. See, if you ever have indigestion or gastritis or any other stomach misery, and eat just one Triangles of Diaperin.

The Practical Parent. "Father," said the poetical youth, "let us go into the autumn woods and read the lesson of the trees."

"That's just what I wuz about to suggest," said the old man, "an' we'll take a couple of axes along an' cut down a few o' them same trees an' split 'em into kindlin' wood for col' weather purposes!"—Atlanta Constitution.

Why is it? Oh, haven't you stood at the telephone. The receiver in your hand or thumb. And pleaded with "central" in humble tone. Persuasive and meek and bland: "Please ring 'em again. I can't stand here."

From now till the crack of doom. And hasn't the thing buzzed in your ear? R-r-r-r-r-r-r! Zoo-zoo-zoo-zoo! R-r-r-r-r-r-r! Zoo-zoo-zoo-zoo! R-r-r-r-r-r-r! Zoo-zoo-zoo-zoo! R-r-r-r-r-r-r! Zoo-zoo-zoo-zoo! —Chicago Tribune.

An Original Oath of Allegiance. In the old days when the Spanish province of Aragon was a proud and independent monarchy the people used when choosing their king the following singular form of election:

"We, the freeborn inhabitants of the ancient kingdom of Aragon, who are equal to you, Don Phillip, and something more, elect you to be our king on condition that you preserve to us our rights and privileges. If in this you should fail we own you for our king no longer."

Pillars of Sand. The deserts of Arabia are specially remarkable for their pillars of sand, which are raised by whirlwinds and have a very close resemblance in their appearance to waterspouts.

Fireworks. Fireworks were originated in the thirteenth century by the Florentines and later were popularized in Rome.

The Tomato. The tomato is a native of South America, chiefly on the Peruvian side of the Andes. From Peru the plant was taken to the United States, Europe and the other countries where it is now cultivated.

A Precaution. "Every man is the architect of his own fortune," quoted the wise guy. "Yes, but he wants to keep solid with the building inspectors," added the simple mug.—Philadelphia Record.

Reason Enough. The Butler—What makes the missus in such a bad humor this morning? The Maid—Some woman told her a secret last night, and she's forgotten it.—London Telegraph.
