INVENTED NOISELESS RIFLE.

J. C. Columbe, Norwich University Graduate, on a Novel Pursuit.

Northfield, Jan. 26.—J. C. Columbe of the class of 1904 Norwich university has just arrived here from Venezuela, where he has been before the officials of that government applying for a patent for his device for a noiseless rifle. This is the latest of Mr. Columbe's inventions and has proved very successful. He is now applying for patents with every nation in the world. The device is about two inches in diameter and runs the full length of the rifle barrel, which contains the acid used to muffle the sound. Mr. Columbe claims superiority in his invention over that of the Maxham noiseless rifle, as his device kills over ninety per cent of the sound, while the latter only seventy-five.

He will remain in town about two weeks during which time he will make several demonstrations before the corps of cadets at the university. Before leaving Venezuela for home Mr. Columbe came in contact with a defective rifle and in making a demonstration had his thumb blown off. Mr. Columbe remembered here as one of Norwich's greatest athletes and a pitcher of much prominence in the minor leagues of New England. Beside the noiseless rifle he has patents on several other inventions, two of which were contrived while a student at the university.
