WILLIAMSTOWN

Union School Superintendent Was Elected Yesterday. At a meeting of the school directors of the Williamstown and Chelsea district union held here yesterday H. D. Casey was elected superintendent, subject to the approval of state superintendent Stone. Prof. Casey comes from Massachusetts, and has had several years' experience in educational work. We have not learned that there were any other candidates for the position. In this connection it is proposed to say the recent rumor, that John M. Comstock of Chelsea and A. N. Fellows of this place were candidates, was without foundation, as neither of them was an applicant, and, in fact, a motion to say, would not have accepted the position had it been offered him. We understand that Washington is contemplating joining the union, which, if consummated, will make three towns under one supervision, and would be a move in the right direction for the improvement of the schools. The cries of some wild animal have been heard in different sections of the town for nearly a year and a few of our farmers have reported seeing a large animal, larger than a common or ordinary sized dog, and state that it is black or dark brown and has a long slim tail and rather short ears, and this presumably is the mutton fiend. Some highly interesting experiments were recently carried on in the harbor of Antibes, France, with a new anti-dredging torpedo, the secret of which is guarded with the utmost care. It is only known that this torpedo is driven by means of electric storage batteries, carried in a compartment located under the torpedo proper. The upper part of the device, which shows above the water carries two small masts, which act as antennae of a wireless telegraph system. By a suitable connecting mechanism, the Herston was acting on these feeders are transmitted to two governors, and likewise to the battery of accumulators, so as to provide for the starting and stopping of the device, and to produce the explosion at what is considered the fitting moment. A man-of-war can carry three or four of these anti-dredging torpedoes, placing them in the water at the point of attack, and start these terrible weapons scouring the sea in the vicinity. They become all the more terrible from the fact that their length does not exceed six feet, rendering them almost invisible to the enemy—they travel at high speed, and their sudden attack strikes all the more to dismay the crews of the enemy, whose nerves are kept strung to high tension by the possibility of entirely unforeseen danger. —In July Technical World Magazine.

Morris Roberts, one of our most progressive and popular young farmers on the West Hill, and Miss Marjorie Sargent, daughter of Mrs. Alvah Robinson were married in New York City Tuesday, June 25th and after a brief wedding trip returned to the former's home and have received the congratulations of their many friends. Wells, highway supervisor for Orange county, was in town Wednesday on an official visit. Mr. Wells is one of the prosperous farmers of Randolph, was road commissioner in that town for several years, is a master in the art of road building, and is said to be one of the best qualified county highway supervisors in the state. Will E. Bacon, a West Hill farmer, is said to have had several of his large sheep killed during the past few weeks, and the only vestige he has been able to find has been the mangled skin and a few pieces of the largest bones, which leads the enquiring mind up to the conclusion that some animal larger than a dog has been "boarding" in his sheep pasture. The cries of some wild animal have been heard in different sections of the town for nearly a year and a few of our farmers have reported seeing a large animal, larger than a common or ordinary sized dog, and state that it is black or dark brown and has a long slim tail and rather short ears, and this presumably is the mutton fiend.
