Stand and be counted. Shyster lawyers, beware! All aboard for Huntington avenue! The Tufts college co-eds are divorced. Shall we plant any trees on Arbor day, Governor Prouty?

Blue noses, red noses, all kinds of noses, will be counted to-morrow.

Of course Doctor Cook's were "swept away." Didn't you expect that?

Mr. Swift and Miss Hurry, who were married in New York yesterday, may be said to have married in haste; and we hope there'll be no repentance at leisure.

Vermont is pleased to welcome Bishop Rice of the Roman Catholic diocese of Burlington, and it hopes for him a continuation of the good work carried on by the late Bishop Milbrand.

St. Albans isn't going to say it has that new hotel until the genial clerk twirls the register around and says, "Register, please." But the things look hopeful, even St. Albans will admit.

The Montpelier Journal put out a handsome "Morrill supplement," containing a sketch of Senator Morrill and half-tones of him and his home, the supplement making a fitting souvenir of the anniversary of to-day.

A little while ago Rutland was advocating a slogan something like this: "If there's anything you want, you'll find it in Rutland." The continued stream of suicides in Rutland indicate they have found what they sought—death.

A GREAT VERMONTIER. That Justin S. Morrill should have risen from obscure life to become one of the nation's great figures is one of the most remarkable exemplifications of democratic institutions. Having had merely slight schooling and passing from that into mercantile life in a small country village, combined with the pursuit of farming, he unexpectedly, and only at the solicitation of his friends, stepped at once into the arena of national affairs by election to the lower house of Congress. It would seem that Morrill had received no training to fit him for the new duties, having held no office save that of justice of the peace in his home town; yet the wisdom of his constituents in choosing him was soon demonstrated, as he grew marvelously in the broad conception of affairs, and within a dozen years he had been transferred to the other house of Congress with his reputation already secure as a man of wide mentality. Although then past middle life, he continued to develop in intellect, and for over thirty years he was looked upon as one of the real "elder statesmen" of his time. And, having risen from the ranks of the sturdy common people of Vermont, he still remained one of them. Therefore, it is with great pride that Vermont, above all states, does honor to his memory on this, the hundredth anniversary of his birth.

BE FRANK WITH THE CENSUS MAN. When the census man comes around to-morrow, or whatever day during the completion of his duties of numbering the population, treat him not as a man who is trying to pry into your affairs, for he isn't; but rather as an agent of yourself, for that he is. While engaged by the census bureau of the United States government, he is nevertheless in the employ of the people of the country, and he is doing work for you—necessary work in the administration of the affairs of the nation. Let no one gain the idea that the census taker will divulge any information about you, except as it shall be used by the census bureau in the counting of the nation's population; he has nothing to do with police duty, or with ferreting you out as subject to taxation or with conscription for military service. The newer arrivals in Barre and other places, where immigrants settle, should bear this latter fact in mind in particular; they may have been familiar with the kind of government which requires a certain number of years of military service from each able-bodied man. This census has nothing to do with spying on you to exact military service, for that kind of service is not imposed by the United States government. Therefore, be frank in giving information. Likewise, the census takers are not detectives seeking information to convict anyone of a misdemeanor or crime; neither are they acting in the capacity of assessors, or listers, for taxation.

Probably the census enumerators will wear badges of their office, so that there can be no doubt of their identity, and

when they come around to-morrow, the next day, or the next day after, be frank with them and make their work as easy as possible. It is not a slight duty to get a correct enumeration of the population, particularly in sections where many of the residents are able to speak but broken English, or none at all; and they deserve all the co-operation which the people can give them.

As the number of Civil war veterans gathering for these occasions decreases, through the inexorable laws of nature, the interest in, and significance of the meetings increase and should continue to increase. After "taps" has sounded for the last veteran, there should be, still, some way of prolonging the influence and the sentiment their assemblies have conveyed.

We have no sympathy with the movement to minimize in the history of this country, particularly as it is taught in the public schools, the Civil war, its causes, its progress and its results. On the other hand, our boys and girls should be taught to thoroughly understand what that great conflict

meant for our national unity and for human freedom everywhere; and to honor and revere the memory of the men, who showed to the world the bravery, loyalty and intelligence of the American soldier, the finest fighter in history. That the North should forgive the South and the South should forgive the North for the cruel wounds each inflicted upon the other; that the blue and the gray should clasp hands everywhere in the amity and respect, which brave men owe each other; that the one flag we love should wave over a thoroughly united nation; all this we applaud with the manifold heart. But when it is proposed to minimize the history of the war for the Union; to dull its salient points, to weaken its vivid colors; to reduce for coming generations its heroic proportions, then we protest. Let us forgive, but not forget.—Concord Monitor.

"Rinking, Rinking, Rinking." With Stella cool and very smart At double turns on rollers, I ain't no skater; she's won my heart; I'm anxious to cajole her. But when she makes my signal sea She "two-steps" by like winking; I follow, though I'm not at ease When rinking, rinking, rinking. My feet feel rather out of hand, Half measures don't content them, They leave me even when I stand Nor can I circumvent them. Their treachery results in spills; My dear avoids me, shrinking. She finds no fun in thuds and thrills When rinking, rinking, rinking.

Village May Run Own Electric Lighting Business. A company of a dozen or more men, who are authorized to investigate electric lighting for the village at the expiration of the lease of the White River Electric company, met in the office of Dr. E. O. Blanchard Tuesday evening to discuss ways and means for the future. One point under consideration is the purchase of the village wiring and procuring electricity from some plant, the trustees or some responsible committee operating it, and so save what is termed the middleman's profit. A report will be submitted at the annual village meeting, which is to be held early in May.

The operation was successful, judging from the present, though the condition was not the same as several of the resident physicians had thought, and differed somewhat from the previous diagnosis.
