

OIL SUIT IS CONTINUED

Will Not Start Trial Before Next Fall, If Then

FOR REBATE ACCEPTANCE

United States Court at Rochester, N. Y., Adjourned and Judge Takes a Matter Under Advisement—Decision May Change Case.

Rochester, N. H., May 25.—The main case of the government against the Standard Oil company, on an indictment charging the acceptance of rebates, will not be placed on trial before fall, if then. Following the close of the government's argument on the question in issue under the "special plea in bar," Judge Hazel adjourned the present term of United States court and announced that he would take the question under advisement and hand down a decision during the summer. Whatever that decision may be, an appeal to the United States supreme court either by the government or the defendant oil company is probable, so that the trial of the main issue may be postponed indefinitely. The question at issue, under the "special plea in bar," is whether a man can twice be placed in jeopardy for the same offense, and is based upon the fifth amendment to the constitution of the United States. This principle is also embodied in Magna Charta and the common law of England. It is a point in procedure, that, so far as known, has never before been raised in the United States courts under the interstate commerce law. The words "in bar" indicate that if the special plea is upheld, its upholding bars the plaintiff from further prosecution of the action.

STRIKE IN COLLEGE.

Following Students' Expulsion Caused by a Fight.

Cleveland, O., May 25.—A Jewish student, L. Isadore Roth of Erie, Pa., has caused a strike of 800 students, young men and women, at the Northern Ohio university, Ada, O. Roth says he has been persecuted by the other students since he has been in the university. He challenged the whole male student body, one at a time.

At a band concert on the campus Tuesday night Roth was again insulted, he says, and renewed his offer to fight the boy students. Chester Rowe of Newark, O., was selected to meet Roth. They fought near the campus and the town marshal stopped them. They repaired to a retired spot and the fight was renewed. Several rounds were fought and the mill was stopped when one of Rowe's arms was broken. The fight resulted in the expulsion yesterday morning of eight of the students who had attended the fight. At chapel the expulsions were announced and 800 of the 1,100 students refused to attend classes until the expelled men are reinstated. President Smith declares that they won't be reinstated.

Bladder Trouble Causes Terrible Pains.

After taking a trial bottle of Dr. Kilmer's Swamp-Root which you forwarded to me, I purchased some from a local drug store and after using three dollar bottles I can truthfully say that I was cured of all the terrible pains I had in my back, side and head, caused by bladder trouble. I had the worst kind of kidney trouble and suffered so that I could not even stay in bed with the pain. Dr. Kilmer's Swamp-Root made me feel just like a new person and I am glad to recommend it to anyone suffering as I did. Very truly yours,

MISS MARY ARDNER, Defiance, Ohio. Sworn to before me and in my presence subscribed by the said Miss Mary Ardner, this 16th day of July, 1909. F. L. RAY, Notary Public. Prove What Swamp-Root Will Do For You Send to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. It will convince anyone. You will also receive a booklet of valuable information, telling all about the kidneys and bladder. When writing, be sure and mention this paper. Regular 50-cent and \$1.00 size bottles for sale at all drug stores.

Terrible Suffering

Eczema All Over Baby's Body. "When my baby was four months old his face broke out with eczema, and at sixteen months of age, his face, hands and arms were in a dreadful state. The eczema spread all over his body. We had to put a mask or cloth over his face and tie up his hands. Finally we gave him Hood's Sarsaparilla and in a few months he was entirely cured. Today he is a healthy boy." Mrs. Inez Lewis, Barre, Maine. Hood's Sarsaparilla cures blood diseases and builds up the system. Get it today in usual liquid form or chocolate tablets called Sarsatabs.

FINE PITCHING.

By Freshman Malcolm Gave Another Game to Vermont Over Manhattan. Burlington, May 25.—The university of Vermont defeated Manhattan college here yesterday afternoon for the third time by a score of 6 to 3 in a game whose feature was the pitching of Malcolm, the freshman athlete, who appeared as fresh in the ninth inning as in the first. Vermont made its runs in the third and fifth innings, scoring three in each and Manhattan got its runs in the ninth. Vermont made eight hits and three errors and Manhattan three hits and six errors. The batteries were Malcolm and Donnelly for Vermont and Hanley and Connelly for Manhattan. Malcolm struck out ten men and allowed three hits, mostly of the scratch variety.

TOOK CARBOLIC ACID.

While His Two Children Looked On Wonderingly.

New York, May 25.—In the presence of his two children, Louise, aged five, and John, seven, Adolph Schloss, thirty years old, a laborer, killed himself yesterday afternoon, by taking carbolic acid.

Schloss had not worked in several months, and his wife and two children were compelled to go to live with Mr. and Mrs. Max Loewe, on the first floor of the house at 623 East 131st street, the Bronx. The mother trimmed hats to support herself and children.

Schloss has not seen his family for some time and early yesterday afternoon he went to the house. He could not get in the front door and went through the hall to the yard where he climbed the fire escape, entering the apartment through the kitchen window.

TWO SKULLS FRACTURED

When Electric Car Struck Automobile at Buffalo Last Night. Buffalo, N. Y., May 25.—Six people were injured, two of them probably fatally yesterday afternoon when a car of the Buffalo & Lake Erie Traction company crashed into an automobile driven by Gerardo Vinciguerra, a wine merchant of Fredonia.

Vinciguerra and Michael Graeco of Dunkirk had their skulls fractured. The other occupants of the automobile were not seriously injured.

Lightning killed 53 sheep on the farm of William Murphy in Shaftsbury Friday. The dead sheep lay at some distance from a tree that had been shattered, showing that the shock must have been of unusual proportions.

TAFT'S NAME WAS EMPLOYED

In the Lorimer Election, Declared Sen. Lafollette

IN IMPASSIONED SPEECH

The Wisconsin Senator Intimated That More Than Double the Amount of Money Alleged to Have Been Used Was Actually Spent.

Washington, D. C., May 25.—Revelations concerning the election of Senator Lorimer of Illinois may be expected as the result of a second investigation into the bribery charges against Lorimer if the predictions made by Senator Lafollette in the delivery yesterday of the third installment of his argument in support of his resolution of inquiry are realized. Mr. Lafollette prophesied that more than twice the \$100,000 heretofore alleged to have been used would be found to have been spent in Lorimer's behalf.

He said President Taft's name had been used in Lorimer's behalf, and reiterated that Lorimer had personal acquaintance of the use of money in his behalf.

"There is a mine of facts which I venture to predict will be opened up and which will be more shocking and appalling than any that has yet been revealed," he declared. Mr. Lafollette quoted from the testimony given by Edward Hines, a Chicago lumber man, before the Lorimer investigating committee of the Illinois legislature, regarding Mr. Hines' interview with United States Senators Aldrich and Penrose, in which Mr. Hines said that Mr. Aldrich repeatedly had told him that President Taft was especially concerned in Mr. Lorimer's behalf.

"There is no proof that the president was interfering," said Mr. Lafollette "but I think that there was a scheme to put Lorimer through, and it was believed that the use of the president's name would be potential. There is no doubt that his name was used behind locked doors and drawn screens. It helped to influence members who could not be reached otherwise."

Discussing Hines' activity in the Lorimer campaign which was accounted for on the ground that Lorimer would favor a duty on lumber, Mr. Lafollette said that during the last Lorimer investigation by the Senate, Hines was much in evidence about the capital at Washington.

"He sought senators at every turn and was brazen and impudent in his work," he said. "How he was received in all cases I do not know, but I do know that in some cases he was rebuffed."

Then, evidently referring to the election of Senator Stephenson of Wisconsin though not mentioning his name, Mr. Lafollette said:

"In another senatorial campaign in

LIQUID CURES ECZEMA WHERE SALVES FAIL

In regard to skin diseases, medical authorities are now agreed on this:— Don't imprison the disease germs in your skin by the use of greasy salves, and thus encourage them to multiply. A true cure of all eczematous diseases can be brought about only by using the healing agents in the form of a liquid. WASH THE GERMS OUT.

A simple wash: A compound of oil of wintergreen, thymol and other ingredients as combined in the D. D. D. Prescription. This penetrates to the disease germs and destroys them, then soothes and heals the skin as nothing else has ever done.

A 25-cent trial bottle will start the cure and give you instant relief. Burt H. Wells, 160 North Main street, Barre, Vt.

FOR THE THIN AND SCRAWNY

Samose Will Make You Plump and Rosy, Says D. F. Davis.

If you are getting thin, you are sick, although you may not know it. If you are losing weight steadily, there is something wrong that needs looking after. If you have always been thin it doesn't follow that you are sick, but you may not be healthy. You cannot be strong if you are thin.

Try then to be healthy and plump; it is not difficult if you know how. Fatness, happiness and health, they all go together. How seldom you see a fat person who is not happy. On the other hand, thin people are unhappy and nervous. Use Samose and be well and fat and happy.

Weight yourself before you begin using Samose. It will not cost you a cent unless it increases your weight and restores your health. D. F. Davis sells every package on a genuine guarantee to refund the money if it does not do all that is claimed for it.

STIMSON ON RECIPROCITY

New Secretary of War Spoke in Boston Last Night

AT INTERCOLONIAL CLUB

Sec. Stimson Indorsed the Arguments in Favor of the Agreement on the Ground of "Broad and Lofly National Interest."

Boston, May 25.—Arguments in favor of the adoption of the reciprocity agreement with Canada were marshalled and objections to it brushed aside by Henry L. Stimson, the secretary of war, in an address before the Intercolonial club of this city last night. Secretary Stimson indorsed the arguments in favor of the agreement made by President Taft as the arguments of "broad and lofty national interest" and as appropriate to the statesmanship which, not content with mere lip service to party formulas, recognizes the economic and social facts and tendencies of to-day and makes wide provision in respect to them."

The speaker reviewed in brief the provisions of the agreement and urged its enactment into law on grounds of national and continental policy. "In the northern half of the American continent," said Mr. Stimson, "lie these two great nations speaking the same language, dominated largely by the same underlying racial characteristics, with common sympathies, with identical moral and social ideas. Their standard of wages is, speaking generally, the same; neither of them has pauper labor. While racially the two nations resemble each other, the difference in their climate and in their present industries makes each, in many respects, the supplement of the other. Canada possesses an immense supply of virgin land suitable for the raising of wheat, which is as yet untouched. In the United States, on the other hand, while the limit of virgin wheat lands has been nearly reached, there can be produced a great crop of corn with which Canada, owing to its more northern climate, can never compete. Canada possesses almost inexhaustible forests; the United States, in its manufacturing, an enormous demand for lumber. Even in similar products, particularly in fruits and fresh vegetables, there is enough difference in season and climate to make the production of one country often serve as a supplement to the other.

"The two nations are separated by 3700 miles of purely artificial boundary. The people of both countries move to and fro across the boundary in great throngs without any regard to the line of demarcation. Never did physical conditions urge two nations more forcibly to mutual trade and intercourse. Nothing so securely cements those relations of amity and good will which should exist between kindred and contiguous nations as the constant intercourse which goes with freedom of trade; on the other hand, imagination could hardly well devise a more provocative engine of prejudice and ill will than a purely artificial tariff barrier, extending over nearly four thousand miles, held up against all of the temptations of nature by mere statutory fiat."

"It has been thoughtlessly suggested that such a trade agreement pointed to rapid political annexation of Canada. Nothing could be further from the real fact. There can be no surer preventive of agitation for a political union than to remove the irritation inherent in trade restrictions. The strongest motive that has led men to urge political union between Canada and the United States, has been the belief that in no other way could they secure mutually advantageous trade relations."

Mr. Stimson cited historical examples to show that abolition of "irritating trade restrictions" had worked to promote amicable relations between countries having naturally close economic ties and at the same time enabled them to preserve their distinct political entities—notably in the case of southern German states and Austria. He noted also the manner in which, he said, the Canadian treaty of 1854 had quieted annexation agitation in both Canada and the United States.

"But apart from social and political justification," continued Mr. Stimson, "the proposed reciprocity agreement stands firmly on the rock of economic benefit. By this I do not mean that some inconvenience, or even possibly hardship, may not be caused to specific individuals or specific localities. No tariff changes in a country as great and diversified as our own ever have or ever can avoid such isolated inconvenience; but there can be no doubt that in the balance-sheet of the whole nation, the resulting benefits far outweigh such instances."

"We of the United States do not have to be mere altruists in order to welcome changes which will develop Canada into a great industrial nation; which will remove the barrier which has artificially forced Canadian trade into an eastward and westward direction and not permitted it to follow the course which nature so clearly intended. Even under the present unfavorable conditions, no country in the world approaches Canada in the amount of its purchases from the United States when population is taken into account. In twenty years, imports into Canada from us have risen from \$32,000,000 to \$233,000,000. When we consider that this has occurred in spite of comparatively slow Canadian industrial development, and against the obstructive force of the tariff wall between us, can we even imagine the extent of trade benefits that would accrue should that barrier be removed?"

"Ah but our friends say this agreement does not remove that barrier on the bulk of our manufactured importations into Canada. My answer is, that it opens a breach wide enough to insure the extension, and continued extension, of our natural trade. Our government has offered to Canada free trade in all commodities; the Canadian commissioners representing a younger country, with younger industries to protect, have felt compelled to decline free trade as to those industries. But the step once taken, the tendency toward closer relations will be irresistible."

"Nor is our benefit as a producer confined to the foreign market which we

We're Strong on Fitting the "Off-size" Fellows

Don't spend double the money for a tailor-made, and then run chances of a misfit.

We're always glad to welcome the odd-size fellows here. We like to show how easy it is for us to fit the lean and the fat.

It takes a wide range of sizes and and expert fitting ability, but we are prepared for all comers.

What we can do in suits, we can also do in underwear or any other article of clothing.

This is distinctly a service store—service to all.

The new suit you want for Memorial Day may need some alterations, so come early.

will receive in Canada. The stimulus which will be given to our industries by the larger Canadian market, a new American demand for our products.

"We have suddenly passed beyond the period of exploitation into one of conservation. The most striking fact afforded by our 1910 census has been the change of ratio between our agricultural and city population. A tremendous increase in population of our great cities has been coincident with a slow growth and in some cases a decline, in our agricultural regions. Coincident with this, and partially as a result of it, has come a great rise in the cost of living.

"Will the American farmer insist on the maintenance of a tariff wall which will cut off of our rapidly increasing city population from additional resources of food? Will he insist upon the continuance of a system which will be sure to force on our factory workers a still higher cost of living? Personally, I do not believe he would, even if reciprocity meant an immediate reduction of the price of wheat and corn.

"But looking at the situation dispassionately, I do not believe that it does mean that at all. It only means an insurance against too great further increase. Reciprocity can now be granted by the wheat farmers without material disturbance of his present price, and its only effect will be to throw into our market the Canadian wheat fields as a guaranty against future exorbitant increases and speculative fluctuation. In wheat, in lumber, in all other great ma-

terial resources of Canada, reciprocity goes hand in hand with our new policy of conservation.

"The nation, through both its great parties, is now pledged to the policy of tariff revision and readjustment and that revision will surely come. The passage of this agreement will hasten it."

WHY CUT WAS MADE. Mr. Coolidge Says It Was Because of Improvements. Boston, May 25.—The expenditure of \$11,000,000 in improvements for addition to rolling stock and for other equipment within the past three years, was advanced as a reason why the recent cut in dividend was made by the Boston & Maine railroad, by William H. Coolidge, attorney for the road, yesterday.

Mr. Coolidge was one of the principal speakers at a hearing held by the Massachusetts railroad commission, under an order adopted by the house of representatives calling for an investigation of the dividend reduction.
