THE MATCHLESS 1912

Caloric Fireless Cookstoves

Porcelain Enamel Lined Cooking Compartments

(LIKE A BATH TUB)

The Modern Kitchen Marvel

Hygienic—Scientific—Economic

These are Exclusive Caloric Features

You get bigger, better values in the Caloric than you can possibly get elsewhere. You get the benefit and results of years of careful study, experience and experiments in the art of fireless cooking.

The Caloric actually bakes and roasts, as well as steams, stews and boils—its use is real economy—it pays for itself in time, fuel, and relief from kitchen drudgery—a household necessity.

Simple to operate—cooks while you shop or sleep—entertain or embroider—and cooks foods better and more nutritiously than is possible by any other method.

You make no mistake, you take no chances—when you buy a Caloric. It is a pronounced and complete success, as is evidenced by the one hundred thousand in daily use in the homes of satisfied customers and friends.

We believe this Matchless 1912 Caloric is about the limit of improvement in fireless cookery.

A Caloric 160-page cookbook with every Caloric Cookstove. It teaches fireless cookery.

THE CALORIC Fireless Cooker is One of the Three

Notice

a recent writer in Century Magazine says: "The three great scientific inventions of the century are wireless telegraphy, aviation and the fireless cook-stove (not cooker)."

The Caloric is the Only Fireless Cookstove in the World. We are sales agents
